Dayan plan

for Arab

self-rule in

West Bank

Mr Davan, the Israeli Foreign

Minister, received mandate from the Cabinet in Jerusalem

today to take to Washington later this week proposals that

would leave Israel in physical control of the occupied West Bank of the Jordan, but allow the Arab residents to run their

own lives.

Mr Dayan is to present his ideas to President Carter and Mr Vance, the Secretary of State, who may then explore them with Arab foreign ministers who will be in the United States at the same time for the United Nations General Assembly.

Assembly.

The Foreign Minister will also take to Washington a draft

of a proposed treaty with Egypt that can be shown to

the Arab foreign ministers, and a covering letter, outlining Israel's view on a territorial settlement, intended for Ameri-

settlement, intended for America neyes only.

The occupied West Bank has been administered since the 1967 War by an Israeli military government, but local Arabs have been allowed to elect their own municipal administrations.

The Israelis also kept Jordanian law in force and maintained the

law in force and maintained the Arab police, judiciary, health,

proposing that this process should be sustained, not neces-sarily through a public, or formal agreement. The military government would turn over to

the Palestinians full control of all government functions except

or security and foreign affairs.

The Foreign Minister has said it is impossible to find a parti-tion line in the West Bank that

would be acceptable to both sides and a ful land final peace

is unarrainable. He believes the people in the West Bank are

rates among major industrial sharply rising levels of inter-countries. The IMF notes that the sheer

scale of current account deficits "is no longer a source o fserious concern", when viewed in terms of inflation and growth rates. Moreover, it asserts the financing of these deficits "should present no problem in the aggregate". The fund is projecting that

the fund is projecting that the major oil exporting countries will have a current account surplus this year of \$37,000 (about £21,000m), which compares with surpluses of £41,000m last year, £35,000m in 1975 and \$67,000m in 1974. The decline has been matched to some degree by declines in the deficits of the

non-oil exporting developing countries. The combined defi-cits of these countries this year will be the lowest seen since Among the developing coun-

tries, the fund forecasts, the tries, the rund forecasts, the more developed will see a \$2,000m cut in their combined current account deficit to \$12,000m, while the less developed, as a group, have a 1977 deficit that is \$1,000m smaller than in 1976 at \$25,000m. The industrial countries will again have a combined tries will again have a combined deficit of \$1,000m.

While the overall debt out-look should prove manageable, there are grounds for concern, notably with some African and South American countries. The IMF appears quite certain that heavy demands on its own resources will continue to be made by these countries, and by others, as large payments imbalances are likely to persist for quite some years.

remain one city.

The proposals for the West Bank would require the development of a new moderate leader-Mr Dayan has made it clear in public statements that Jews must be allowed to buy land and live anywhere in the eWst Bank and movement across the former armistice line in both directions must not.

He has also said unequivocally that Israel will also maintain its early warning system and other military West Bank.

The proposals do not cover the Gaza Strip, which was taken from Egypt in 1967. Mr Dayan has said Israel will exercise full authority in that area. Beirut: The Palestine Liberation Organization rejected Israel's settlement proposals and said it hoped the United States Government would exert pressure on Mr Dayan. "I hope the United States will tell him that this setlement plan cannot be accepted by anyone in the world, a spokesman said.

Houston, Sept 11

Mrs Margaret Thatcher came to Houston and found it her kind of town. Texas took a liking to her, for the political philosophy she is preaching here conforms closely with their practice of prosperity through individual enterprise and the minimum of govern-

Indeed, so keen was she to minded souls that she entered into a spirited dispute with the chairman of the dinner she was addressing on Friday night. After she had answered a few questions he was anxious to wind things up, but, with a cry of "We're all enjoying it", she insisted on carrying on. When she finally did finish, the chairman called her a fellow Texan and she was given three cheers. The dinner, organized by the local branch of the English Speaking Union, was held in

the River Oaks Country Club, reputed to be the most exclusive in Houston. "The members of this club", an oil man confided, " are the old money. That meens they had money be-fore 1920." It was in the twenties that the Texas oil wells brought prosperity to many in

The men wore dinner jackets, the women expensive dresses and jewelry. The chairman introduced some of the prominent members of the audience and Mr George Bush, former hand of the Central Intelligence head of the Central Intelligence Agency, spoke about Mrs

Agency, Spect Thatcher.

"She is bright", he told the diners, who numbered around 500.

"She is frighteningly matter of fact". bright, as a matter of fact.". Since the chairman had already called her one of the foremost ladies of the world, she had

something to live up to.

Before the dinner he aide,
Mr Adam Butler, had circulated piece about basic values and moral courage, family life, decency and patriotism. On the flight from New York, however, she decided that the phrasing was too prim for a Texas audi What remained was a speech similar in substance to the one she had made in New York two days earlier, though more strident. Its message was that taxation should be cut to restore incentives, governments should not meddle in industry, and freedom thrives only under free enterprise.

This orthodox conservative doctrine was designed to please her audience, and it did. when questions came, it

Mrs Thatcher backs moderate line on Grunwick-Mr Prior

By George Clark Political Correspondent

Mr James Prior, the Conser-Mr James Prior, the Conservative Party spokesman on employment, admitted yesterday that there are "differences of emphasis" between him and Sir Keith Joseph, the party's spokesman on industry, at the closed on the question of the closed shop, but he maintained that the moderate line he has taken on that issue, and over the Grunwick dispute, had the full backing of Mrs Thatcher, the party leader. Mr Robert Moss, director of

the National Association for Feedom, reacting to remarks made by Mr Prior in a BBC interview, said that Mr Prior mas a liability to his party and added: "So long as he remains the Conservative spokesman on employment it will be impossible to believe that his party is ready to seize its historic opportunity to play the role of liberator."

Mr Prior had accused the association, in reply to a question, of "union bashing", "I assume this means that he objects to the support we have given to Grunwick" Mr Moss said. "Mr Prior belongs to Apex, the union that is trying to coerce Grunwick's workforce into joining it against their will

their will.

"He has repeatedly appealed in with to Grunwick to give in, with an appeaser's contempt for heroism of the management and staff of a company that has been fighting a battle for all of us. "His latest rearks make it

plain that he is not only wholly unqualified to speak on union issues for a party that stands for individual freedom but he is a positive liability to his party if it really hopes to express the views of the

During the Grunwick dispute many Conservative back-benchers have urged the party leadership to take a stronger stand against the enforcement

approved of the Criticism Sir Keith Joseph made of the Scarman committee findings on the Grunwick arrair.

Interviewed in the BBC pro-Weekend, Mr Prior said: "Mrs Thatcher has behaved impeccably towards me on all this. She recognizes that this is an extremely difficult job. It is something of a tightrope I have to walk, but she has backed me to the hilt."

That was an effective reply to those Conservatives who have suggested that Sir Keith, in his strong comments on the Scarman committee findings, was more accurately reflecting the Conservative leader's views than Mr Prior had done. Sir Keith, in a letter to The

Times today, says that Mr DAVID Steel, the Liberal leader, in his speech last week, tried to drive a wedge between

him and Mr Prior.

"We both want an end to the dispute. We both want to protect the rights of all concerned", he writes, "Mr Prior, an his support for mediation in his support for mediation was not, I'm sure, meaning that an employer should mediate the workers' rights to decide whether or not they wish to be represented by a

wish to be represented to union."

Mr Steel had rushed to defend union bullying by blackguarding him, Sir Keith

Mr Prior, in his radio interview, also had a reply to those Conservatives who are asking that the party should pledge itself to bring in new legisla-tion to ban the closed shop. "We tried that approach in

the Industrial Relations Act, 1971, and we gave the absolute right to a worker not to join a union if he did not wish to do so, but we were unable to enforce that. The union closed shops continued as they did before....
"I am not satisfied with the

law as it is, or with the operation of the closed shop, but I seek to get these things right

Nobel prize author urges kidnappers to 'stop trading in human lives'

From Patricia Clough Bonn, Sept 11 Henrich Böll, the Nobel Prizewinning author, appealed last night to the terrorists holding Dr Hanne-Martin Schleyer, president of the industries federation, to "stop trading in human lives".

More killing, he said, "would destroy everything you want to achieve and will have incalculable consequences for the friends in prison ". The writer was joined in his

appeal by three prominent Protestant theologians, Pastor Heinrich Albertz, former Chief Bishop of Berlin. The West German Government's efforts to channel con-

tacts through a go-between

Payot, the Geneva lawyer and human rights campaigner asked by Bonn to take on the task, last night passed on a message from the kidnappers. It was said to contain precise demands and a fresh deadline ford the release from prison of 11 hardcore terrorists.

After a crisis meeting of top Government ministers and Oppositions leaders, the Government replied but the contents of this message were not disclosed.

Pressure on the Government not to free the eleven mounted over the weekend. A public opinion poll conducted for the right-wing daily. Welt on Sonntag, reported that 60 per cent of the population are opposed to the release of the want the death penalty introduced for such crimes. This compares with 44 per cent in

However, right-wing talk of imminent civil war and calls for police-state measures provoked by the initial shock of the kidnapping on Monday have died down. This may well be due to the reasonably effective blackout on information from Government and police sources which has kept the contents of most of the terrorists' messages and their deadlines away from the public,

Bon, Sept 11.—Frau Waltrude Schleyer, the kidnapped man's wife, appealed through Bild Zeilung today for the 11 terrorists to be freed and her husband's life saved. She said she recognized that the majority of West Germans were against giving in to the kid-nappers' demands. But she thought the inner strength of the state would allow it to meet the ransom demands.—AP.

New national body urged to govern all 30 polytechnics

Ry Diana Geddes Education Correspondent

Polytechnics should be removed from local control and be governed by a national body responsible for the financial and educational planning of all public sector higher education, the Association of Polytechnic Teachers said in a paper pub-lished yesterday. Only then would the objectives set 10 years ago for polytechnics be achieved, it said.

The association, representing about a quarter of the teachers in the 30 polytechnics in England and Wales, has sent the paper to Mrs Williams. Secretary of State for Education and Science, and to Mr Oakes, Minister of State, who is chairman of the committee inquiring into the management of public sector higher education. The Government hopes the report will be ready by the end of the

The polytechnics' niche in higher education has worried educationists for some time. Many would agree that the goal of providing a socially responsive education system of equal standard to that of the universities had not been

Yesterday's paper said the polytechnics suffered from many disadvantages. Their facilities were still catching up universities. The school-leaver applying to a polytechnic usually had lower qualifications. The recruitment of lecturers had poor salary structure...

Local authority control also autonomy.

made the academic organiza-

tion of the polytechnics diffi-cult, it said. In some cases cult, it said. In some cases staff complements had been decided unilaterally by the local authority. In others reappointments and promotions had been decided by people who had "never been inside an institu-tion of higher education except to tell the management how it should be organized".

should be organized."

In the face of such difficulties the polytechnics should be
pleased with the "surprisingly
high" standards they had managed to achieve, the association The paper laid most of the

blame for the polytechnics' failure to achieve the original blame intentions on local authorities. Their role was now very different from that envisaged either in the White Paper or in a later memorandum that said polytechnics should be given all possible freedom to manage themselves "with the minimum of detailed control by The association proposed the establishment of a new national body, representing academic, commercial, industrial, government and local authority sources, responsible to the

No-coalition | Tory praises pledge by Liberals

By George Clark
Political Correspondent
Until there has been a
reform of the voting system
there is no question of the Liberal Party entering into a coalition government with any other party. That was made clear by leading Liberals yesterday after there had been some speculation about the possibility of the party forming a closer liaison with the Labour Party.

In advance of the Liberal Party assembly, which begins at Brighton on September 26, the Liberal MPs who have supported Mr Steel in his working agreement with the Labour Government want to assure the party rank and file that no formal link is contemplated.

The working of the Liberals' pact with Labour will come under close scrutiav significantly, the motion that has been tabled giving the that has been tabled giving the assembly's approval to the MPs' action, and which will be Mr Nicholas Fairbairn, QC. moved by Mr Geoffrey Tor-doff, chairman of the party and West Perthshire, yestercouncil, asserts that any renew

al of the pact shall in no way compromise the independence of the party and that the Liberals will fight the next general election free of any commitment to any other political party".

Mr Emlyn Hooson, MP for Montgomeryshire, and leader of the Welsh Liberal Party, said at Llanidloes. Powys, on Saturday that if the result of the next general election was a very even belance of the parties, the Liberals would be quite prepared to gime equal consideration to an agreed programme with the Conservatives as with the Labour Party.

Mr Chris Gent, national chairman of the Young Conservatives, said at St Ives on Saturday that young people had revised their opinion of t he Liberal Party since the Lib-Lab pact came into opera-tion, "Young people know ... that the Labour Govern-ment and its trade union allies have done more to reduce per sonal liberty than any government in recent history", he said. "These actions are totally irreconcilable with the old con-

The Lib-Lab pact ensures that the Liberal Party maintains in office an anti-democratic government, whose first two years in office brought us nearer the corporate state than anything we have seen since the war."

cept of liberalism.

'democracy' at Leyland

By Our Political Staff It was "refreshing and beau-tiful" to see British Leyland workers reject their shop ste wards' demand that they should strike for a 32 per cent pay increase, Mr Nicholas Ridley, Conservative MP for Cirencester and Tewkesbury, said at a conference of Conservative students at York University yes-

People entitled to rejoice were not those who blathered about a wages explosion, but those who still believed in democracy and who had prayed for trade union democracy to break out. "Among their number there

is no one called Bullock, or Booth, or Benn', Mr Ridley said. "Those three Bs have worked and schemed for the corporate state as practised in Poland and points east, where the trade unions exercise total and West Perthshire, yesterdemanded the repeal of the Employment Protection Act, which he described as

absurd and evil. His call, in a letter to the Booth, secretary of state for employment, comes after a report that the departments of health and employment are dismising groups of casual workers every 26 weeks and reappointing them a few days later. In this way the employment and the employer comes immune from the Act People should be put on their

reard by the Prime Minister's when of himself as Moses, denined to lead the country out of its present troubles, according to Sir Geoffrey Howe, QC, the Conservative spokesman Treasury and economic affairs. He told a Conservative meet-

ing at High Wycombe on Satur-day: "Today's self-styled prophet in No 10 reached his present office not by the votes of the British people but because of the disintegration of his unlamented predecessor.' Sir Harold Wilson could at

least claim to have won three elections; not so Mr Callaghan "So one can and must under-stand how strongly he yearns to be legitimized by an election victory. So we can look for-ward in the months ahead to a lot of distinctly unMosaic soft talk and glad-handing from Mr Callaghan."

'want public to know less'

Pressure is growing for the press to limit the spread of news, Mr David Chipp, editor-in-chief of the Press Association, the national news agency, told public relations officers on Saturday.

He told a dinner of the local government group of the Insti-tute of Public Relations in Newcastle upon Tyne: "I really believe that more and more people want us, and by 'us' mean the public at large, to know less and less."

Pressure came from the "do good", the "establishment" good", the "establishment" and the "let's lean over back-wards to be fair to the accused"

The "do gooders", well in tentioned people, opposed re-porting because they felt it made situations worse. Journa-lists, they said, should make value indgments on such matters as race before reporting. Journalists made value judgments, Mr Chipp said, but those should be solely on whether a report was newsworthy. The Race Relations Act raised doubts on whether a speech by Mr Powell or a National Front election manifesto might be published in full.

The "do good" lobby had tried to limit reporting of Northern Ireland feeling that if nothing was reported the troubles would go away. Mr Chipp had lived as a foreign correspondent in countries where reporting was restricted. It only made rumours worse.
The "Establishment" lobby

was trying to extend concern for national security to cover "national interest". Suggested amendments to the Official Secrets Act covered international relations where "unauthorized disclosure would be prejudicial to British interests, to relations with foreign governments or the safety of British citizens".

The "public interest" too often meant the interest of politicians or civil servants not to let the public know, Mr Chipp

As a recent achievement of the "fair to the accused" lobby he cited the Sexual Offences Act, which ensured anonymity of the accused and victim in rape cases until the man was proved guilty. It was now being argued that reports of sexual cases other than rape should be restricted in the same way.
Surely, he argued, it was better that all the evidence should be seen rather than allow a gossip that "old so-and-so got off that charge".

More people Engineering staff pact will create confidence in Fleet Street, 'Express' chief declares

A "new style of newspaper management in Fleet Street was predicted by Mr Jocelyn Stevens, managing director of Beaverbrook Newspapers, yes-terday. His comment came the day after a return to work was agreed with engineering workers whose action had for a week halted the London Evening Standard and London produc-tion of the Oaily Express and

Sunday Express. He said: "I believe it will spread and create confidence throughout the industry. These left-wing bully boys have to be stood up to and the anarchy that exists in many sections of Fleet Street stamped out. I believe the agreement we have signed

opens the way for this".

The Sunday Express, which was stopped in London last week, was produced with only a small loss of the full printing run yesterday. During the dispute the Daily Express has been printed in Manchester with a reduced circulation. reduced circulation. Beaverbrook

bought by Trafalgar House the management's handling of the dispute has been far more brisk than might have been expected under the previous ownership. At one point Mr William Keys, chairman of the TUC printing industries committee, refused to meet Mr Stevens unless Mr Victor Matthews, Beaverbrook's new chairman, was present. The 161 engineering workers

have dismissed themselves for holding a union meeting during production time have made no immediate progress on their claim for large pay rises, apart from a reference to "meaning-ful" discussions.

The claim was for parity with the bighest paid Beaverbrook employees, and although it was not spelt out the assumption has been that they were referring to typesetters, who earn an aver-age of £250 a week. That would have given the engineers another £100 a week, on average, from January 1.

In the peace formula the management has included a reference to future manning levels. The document says negotiations on the men's claim will include the management's desire to reduce staff. During the talks the management indicated that it wanted engineering staff reduced by a third. The formula also brings in several areas of dispute not directly connected with the pay

claim, such as tea breaks and shift working. The danger of the dispute's spreading throughout Fleet Street was emphasized on Saturday by Mr Reginald Birch, executive member of the Amalgamated Union of Engineering Workers, who led the union side. He said last night: was in my mind from the beginning that this could beginning

soread. We just cannot have our

commend the responsible attiand in persuading his members to accept our terms, which will allow the management to manage and the workers to

work."

Mr Matthews will hold a press conference in the Express building this morning. There are no indications that transfer of the priming of the Daily Express and Sunday Express to Beaverbrook's Manchester works will be pursued, at least at present. Mr Birch was adamant that "we would not

Mr Stevens said: "You could say the terms look pretty innocuous. But it is a reflection on the state of anarchy in sections of Fleet Street that you have to put them down on paper. It seems pretty extra-ordinary, I know, that you have to get down to such things as defining what an engineer's

contentious clause, simply be-cause the chapel [office branch] of the union had not been carrying out many of their

Mr Matthews declared it a engineer. He did not work any rota. Now he and all chapel officers will have to do full -shift work like everybody else Mr. Stevens added - Chanel meetings will no longer interfere with production. No one else in Fleet Stree has go this in an agreement. What we now have, a management able to

manage, is the beginning of a sensible industry." Beaverbrook had some of the worst industrial difficulties of Fleet Street, Mr Stevens said. "You do not realize how bad it was in there. It was like the no-go areas in Belfast. Until the police got back into these areas you did not realize law and order existed."

A reference to the police

being called in after certain machine parts were missing. Mr Stevens said he felt that three things forced the engineer workers sign. They did not have support from Manchester workers and the were under "incredible presfrom other Beaverbrook "In fact, this was the most staff in London and "extracontentious clause, simply beause the chapel [office AUEW executive.

oranch] of the union had not Officials of the Newspaper

Publishers Association had been suprized that the AUEW had agreed to sign the terms, he said. "Our enginers now have the least priveleged chapel in Fleet Street in terms of the rigidty of the conditions they have to abide by. The key point, he felt, was the agreement to sit down and discuss cuts in the number of

proposals after a protest from three areas of the miners' union scheme that was narrowly rejected in principel by the union's policy-making conference in July. Journey through Britain 13: unemployment while economy improves Housewives who pay the cost of the oil industry boom

By John Young Milford Haven on a grey, stormy morning in late sum-mer is not the cheeriest of places. Tourists who have come for the scenery, sailing and beaches wander disconsolately in and out of shop doorways, as much to kill time as to shelter from the rain squalls.

Today there are no fewer than four big refineries on the shores of the Haven and the main terminal for a fifth is at Llandarcy, near Swansea. In annual ton-But those who live all the year round in the far west of Wales have more than the weather to worry about Unemployment is high and a large proportion of jobs in tourism and construction are seasonal

Professor Brass estimates that a total of 3,300,000 nonwhites by the end of the cen-tury would be a proportion of one in 17, as the total popula-tion would not have changed very much. That is compared

with a non-white population in mid-1977 of about 1,900,000, or about one in 30 of the total His forecast is on the basis that present trends continue and is derived from new information - becoming available from the 1971 census and data

birthplaces of parents of new-born children.

Professor Brass's figures take into account three factors. The first is the comparatively large number of young people in the non-white population as a result of immigration, which means that there are already a disproportionately large number of potential parents of the next generation. That alone would generation. That alone would add about 600,000 to their numhers, even if in other respects

"argument, not aggro", and arrested were counter-demon-the main political parties strators. Two or ghem were should speak out more juveniles.

The second factor is their higher than average rate of childbearing so far, although the differential is rapidly disappearing. On present trends that higher rate might add about another 200,000 persons, which is much fewer than

have been estimated

two or three years ago.
The third factor is future migration, which is always difficult to access, as it depends on Government policy, and past trends have been erratic. Professor Brass's figures are based on a "best guess" of an addi-tion of between 400,000 and 700,000 persons, including an allowance, of substantial size, for the births to immigrants after they enter. If the figure or 600,000 is taken, the total non-white population by the end of the century adds up to 3,200,000.

The proportion of non-whites in the population should by then have reached a stable level, according to Professor

Catalans celebrate last national day before their autonomous government is set up in Barcelona

Madrid, Sept 11

Hundreds of thousands of Catalans celebrated their national day in the streets of Barcelona as they awaited the reestablishment after 39 years the Generalitat, their autonomous government sup-pressed by General Franco during the civil war.

The agreement between the Spanish Government and Senor Josep Tarra-dellas, the 78-year-old president. in-exile of the Generalitat, for its provisional restoration while made the celebrations of the national day an intensely emotional occasion with singing and traditional dancing.

Catalonia lost its Generalitat 63 years ago, when the troops of Philip V entered Barcelona in the War of Spanish Succession. The generalitat was restored only in 1931 after the establishment of the second Republic, and suppressed by General Franco in 1938.

Waving red and yellow, hori zontally striped Catalan flags, crowds gathered to hear a re-corded message from Senor Tarradellas in which he said: "Today is the last time that we shall celebrate the fiesta of September 11 without our instiseptember 11 winds 3d insti-tutions. This means that our people, thanks to their sacri-fices, their faith and their unity have obtained a splendid

semi-official news agency Cifra published today, takes the form of three royal decrees that ticians. come into affect on the day of their publication in the official state bulletin. Senor Tarradellas

preside over the Generalitat. The Generalitat will have full legal status in the four Catalan provinces of Barcelona, Gerona, Lerida and Tarragona. It will consist for the time being of its president, Senor Tarradellas, and an executive committee of 12 members appointed by him, plus the presidents of the four provincial delegations. The Generalitat president will also be the president of the Barceonn delegation. The Generalitat will coordi-

nate the activities of Cetalonia and send recommendations to the Madrid Government, which has overall control of it. A special committee will come into existence a month after establishment of Generalitat, made up of the Generalitat and representatives of the state to study what powers it should have.

The final composition and functions of the Generalitut will be included in the new Spanish Constitution, which is being prepared to replace General Franco's fundamental

The reestablishment of the Generalitat represents an astute move and victory by Senor Suarez, the Prime Minister. He has been negotiating secretly

time and more recently with a committee of Catalan poli-

Señor Tarradellas still enjoys considerable prestige in Catalonia and, by going through him. Senor Suarez has probably increased the popularity of his Democratic Centre Union party. The party did very hadly in Catalonia in the June 16 general election. The Communists and Socialists won most of the seats.

Given the known resistance of an influential and highly conservative section of the armed forces to the "breaking up of Spain", it is thought the powers of the generalitat will be limited. While Catalans rejoiced at the prospect of the retoration of their autonomous government, the Basque automo naous government-in-exile in France isued a statement vesterits contacts with the ment and blaming the Govern-ment for the slowness of the

negotiations.
The Basque exile said that only a return of autonomy to the Basqui country would lesson the ten sions there. It issued a veiled threat to call demonstrations unless progress had been made by October 7, the forty-first aniversary of the formation of

the Basque government.

There are fears that the Basque separatist organization ETA will start a campaign of

Marchais doubts on **Socialists**

M Georges Marchais, the secretary-general of the Communist Party, is a much awaited speech today, expressed strong suspicion of the Socialists' objectives in the coming parliamentary election.

He was speaking at the annual "fère de l'Humanité", in the Parc de la coureuve, near Le Bourget, to which crowds were attracted at least as much by the fair ground exhibits and the brilliant sunshine as by the political debates.

'If one kept to the proposals of the Socialist Party," M Marchais said, "one could not put into operation the policy the workers expect."

This emphasis on the unrehability of the Socialists, within four days of the crucial "summit" meeting of the left on the updating of the common programme, can only heighten speculation about the ultimate

intentions of the Communists. Some commentators are already convinced that the Comelection in March, 1978, if the Socialists are likely to come out

OD TOD.

The Communists, M. Marchais went on, were going to the meeting with the determination to defend the interests of the workers, to ensure that the change (of regime) is profitable to them, to see that their hopes of democratic change are not disappointed, and that they do not find themselves in the throes of a policy after the manner of Callaghan, Schmidt, or Mario Soares. We want to reach a good agreement, but in present conditions, we cannot say whether we will achieve

Tunisian dies by French guillotine

Paris, Sept 11

Hamida Djandoubi, aged 28, at Marseilles. He is the third person to be executed since President Giscard d'Estaing took office three years ago. Mr Djandoubi was sentenced to death last February for the murder of his 21-year-old girl friend, and rape and violence against several minors, in August 1974. His appeal was rejected last June and a Presi-

dential pardon was refused.
President Giscard d'Estaing
believes in the abolition of capital punishment and has pardoned four condemned men in the last three years. But he thinks that public opinion is well. He had to put on his not yet ready for abolition, especially in the present climate

insecurity and violence. The two sentences previously carried out involved crimes against minors in particularly horrible circumstances. The one for which Djandoubi was executed yesterday was excention.

indescribable tortures on his victim in a villa in a residential conciliatory. quarter of Marseilles, before a Tunisian agricultural worker, taking her, half dead, to a corwas executed by guillotine at rage in the country and strangyard of the Beaumettes prison presence of two minors with whom he lived. Psychiatrists described him

as a "colossal dauger to society", but his defence counsel, in appealing to the Cour de Cassation, said that he was a "gentle, docile, and honest hard-working lad", who had turned aggressive and un-stable after a labour accident

that had cost him one leg.
Maître Emile Pollack, the
well known barrister of Aix-en-Provence, who led the defence at the trial, said yesterday after the execution that Djandoubi had behaved "remarkably artificial limb to get to the guillotine, which was put in a corner of a countyard, as if one

were ashamed of it.

enough. We have been very M Polkack said he believed

execution. Maitre Goudareau, the other counsel for the defence, who was also present, said: "It all lasted about 40 minutes, that is obviously too long and quite unbearable."

He regretted that this execution had taken place just after the special committee on violence had come out in principle for the suppression of the death penalty, and the substitution of a sentence of 20 to 40 years that could not be curtailed for good conduct or other reasons.

M Alain Peyrefitte, the article in Le Monde last mouth that he was completely opposed to what he described as the legal perpetuation of a form of premeditated murder.

South Africa builds up stockpiles in case of sanctions campaign

From Ray Kennedy
Johannesburg, Sept 11
South Africa is urgently
stockpiling huge amounts of
strategic materials, including
oil, in readiness to withstand an
all-out sanctions campaign.
This weekend, Mr R. F.
Botha, the Foreign Minister,
said South Africans should
brace themselves for new attempts in the next few months
to isolate the country.
He told a public meeting at
Florida, hear Johannesburg,
that people should not become
discouraged, nor should they
ask for more money or a better
standard of living. "We cannot
afford it", he said.

Mr Botha's warning followed
the disclosure of stockpiling by
Mr J. C. Heunis, the Minister

Mr J. C. Heunis, the Minister of Economic Attairs. He suid in Welkom, in the Orange Free State: "We have stored a wide enough variety of strategic minerals, crude oil and fuel in all forms, to see the country through any envituality for a considerable period."

The construction of the country's second plant to produce oil from coal was given priority and the Government was also investigating various projects that would make the country more self-sufficient. South Africa would have to depend more and more on its own resources to finance investment

time that South Africa is stock-piling crude oil, some of it in coal mines in eastern Transvaal

owned by Lonrho.
Observers believe that at the meeting two weeks ago in Pre-toria between Dr Owen, the Foreign Secretary, Mr Andrew Young, the American represen-tative at the United Nations, and Mr Vorster on the Rhodesian settlement plan, it was made clear that, if Mr Ian Smith, the Rhodesian Prime Minister, rejected the package, the West would have to ensure that Rhodesia's oil supply was

cut.
This could be done only if South Africa joined the bov-cort, but South Africa has made it clear on many occasions that it is not prepared to do so. Addressing a public meeting in Durban immediately after the Pretoria talks, Mr Vorster said South Africa would not be per-suaded to force a solution on

White summit: Mr Smith and Mr Vorster will hold a summit meeting Rhodesian tomorrow, the Government

announced.
A statement said Mr Smith
and other ministers would fly
to Pretoria in the morning and return later in the day. It will be the second such meeting in

Dr Kaunda alleges napalm raid by Rhodesia

Uusaka, Sept 11.—Three plans of rebel leader Ian Smith Zambian soldiers were killed and five people injured, includand five people injured, including two civilians, when Rhodedistrict in eastern ZambiaRh sian aircraft dropped napalm bombs on Feira district in eastern Zambia on August 31, President Kaunda told a mass rally here today.

The President also announced quoting intelligence reports

ced, quoting intelligence reports received from Rhodesia, that a Rhodesian sabotage squad had crossed into Zambia to blow up strategic installa-tions. He appealed to all Zambians to be vigilant and attempt to capture the gang

Dr Kaunda said Zambian forces also had napalm bombs, and might be forced to retali-ate on Rhodesians despite the cruelty of the weapon.

He told the cheering crowd that Mr Smith, the Rhodesian Prime Minister, hads dismissed two military officers for allegedly supplying information to him (Dr Kaunda) on the Feira air raid. "He has fired the wrong officers. I want to assure the nation that I am —Agendable to now all the military Reuter.

Palestinian guerrillas protect UN convoys

From Robert Fisk Bent jbail, southern Lebanon Sept 11

Sept 11
Shortly before 11.15 am last Friday two United Nations lorries—a pick-up truck and a water bowser—came bumping round the road junction south of Tibnine on their way to southern Lebanon. The driver of the first vehicle

in battledress with United Nations flashes on the arms, was driving fast, an understandable precaution after the frequent attacks made on United Nations personnel down here. here.
The pasenger next to him

was unusual. Carrying a rifle, wore the red beret of the Palestine Liberation Army—the Palestine Liberation Army—the uniformed, regular force of Mr Vassjr Arafat's Palestine Liberation Organization—and each time the vehicle passed pedestrians he brought the rifle to his shoulder, just to let them know an armed man was on hoard. Round the village of Bent

Jbail and its hinterland these days, the United Nations are nays, the United Nations are in need of protection. They have been shot at, threatened and robbed, and lost no fewer than 55 cars and lorries to armed gangs in the past two years. It would of course, be approximately than the United years, it would, or course, be unprecedented for the United Nations to acept protection from a guerrilla army; yet that apears to be what it has done in

apears to be what it has done in southern Lebanon.

In the offices of the local Palestinian comander in Bent Jbail there seemed little surprise about it. "We've been giving the United Nations protection for two months now", the Palestinian said. "PLA men travel with them to prevent any travel with them to prevent any assaults.

The United Nations denies that it has ever requested pro-tection. "We may occasionally be obliged to carry people", a senior United Nations officer explained, "but this is not a regular thing". He added: "Of course, I cannot deny what you have seen with your own Since the state of Israel came

into existence almost 30 years ago, the United Nations has manned six ceasefire observation posts along the south Lebanese border with pre-war Palestine. The fifty or so sol-diers of 15 nationalities—they include British, Irish and American troops—sit out the dangerous hours in concrete bunkers on the hills above Israel, ostentatiously neutral outposts. The border war outposts. here, in which Palestinians and Lebanese leftists are fighting Israeli-backed Phalangist militla, takes no account of the United Nations neutrality.

China refuses to play role in 'US game'

Peking, Sept 11.—Mr Teng Japanese sources today, Mr relations fully, agreeing to Hsiao-ping, the Deputy Prime Minister, forcefully reiterated here at this weekend that China Teng denied the statements issued by the State Department with Taiwan, withdrawing spokesman at the time of Mr United States troops from the Vance's return to Washington.

Old comrade Argentine human rights leader is abducted

From Andrew Tarnowski Buenos Aires, Sept 11

President Videla of Argentina, returned today from a visit to the United States, where he held talks with President Carter and pledged to wipe out gangs of rightist killers terror-izing sectors of the population. He told a press conference in Washington before leaving

that recent kidnappings and disappearances of prominent people in Argentina were apparently the work of spontaneous groups of killers taking the fight against leftists guerrillas

The President's remarks coincided with news of yet another abduction carried out by men claiming to represent the

Professor Alfredo Bravo, a Protessor Altredo Bravo, a vice-president of the Argentine Permanent Assembly for Human Rights and leader of the Teachers' Union, was taken away from his school on Thursday by two men who identified themselves as police officers. The credentials shown by them were from the federal police coordination department. police coordination department, responsible for countering sub-version. The department, how-ever, has no knowledge either of them or of Professor Bravo.

Despite the President's pledges, none of those respon-sible for the wave of kidneppings is known to have been brought to justice. It is widely considered that the kidnappings of prominent people are often timed to embarass Presi-dent Videla.

Peking journal gives Mao's thought a new bent

From David Bona ia Hongkong, Sept 11

The Chinese Communist Party's theoretical journal has used Mao Tse-tung's own teachings to suggest that his policies were relative to the circumstances in which he worked, and were not a source

of "absolute authority".

The monthly journal Red Flag in an issue coinciding with death, called on party members to avoid lying and covering up mistakes as they have often

the importance of combining theory with practical and thorough investigation, and not just superficial surveys which buried the true facts o fa situa-

superstitiou about the wisdom of a single person, but relied on the wisdom of classes and masses. Individual wisdom is restricted, the wisdom of the masses is infinite," it said.
"Chairman Mao resolutely opposed turning Marxism-Lenin-

ism into as a pinnacle or an absolute authority." absolute authority."

Listing the good results of
the application of Mao's ideas
in China, the journal emphasized the training of officials
and military officers to respect
and understand the views of and understand the views of the common people. It did not refer to the formerly hallowed "new-born things of the Cultural Revolution", such as radicalized educational criteria, exiling of urban youth to the countryside, or "barefoot

This important statement done in the past.

It also laid great emphasis on apparently prepares the way for a much more conservative interpretation of Mao's thought in the future.

13 dead in typhoon "Chairman Mao was not Tokyo, Sept 11.—Thirteen Fili-uperstition about the wisdom pino crew members died and three others were missing after abandoning a 3,000-ton Panamanian cargo ship in a typhoon in the East China Sea, the Japanese maritime safety agency reported today. Ni survivors were picked up.

Spaceman's praise for Tory leader

was apparent that she had not gone as far as some of them would have liked.

One questioner suggested that after coming to power she should abolish the social secu-rity system, but she baulked at

Another spoke of the failures of past Couservative governments which achieved power with fine intentions, but were seduced by "intellectual propoganda" and failed to carry out conservative measures. The reason, be thought, was that Britain had become irretrievably dependent on the welfare state.

Yesterday, Mrs Thatcher abandoned politics for sight-seeing, and had a private lunch and dinner with bankers and businessmen. Her first call was at the scarce capter where she at the space centre, where she was shown round by Captain John Young, who had been to the Moon in 1972.

There was a little mishap when, in her tight skirt, she had difficulty in getting out of the simulated command module. Refusing help she declared: "I can get in and out of all sorts of situations", and she finally did on

and she finally did so.

At the end, Captain Young confided that he had been impressed by her grasp of his explanations. "She's really neat", he said. "A credit to the force.

In the afternoon she put on a pale denim trouser suit and a white helmet for more clambering about, this time in and out of helicopters to visit an offshire oil rig in the Gulf of Mexico. The walk from the ten-der to the platform was up an alarmingly unstable set of steps known colloquially as the widow-maker. She declined to make the climb, but her hus-

band, Denis did. Mr Thatcher has been following one step behind his wife on this tour, but he came into his own on the oil rig, asking technical questions and behaving somewhar like the Duke of Edinburgh.

lukewarm support for Mr Lance

President's

From Patrick Brogan
Washington, Sept 11
President Carter was again asked about Mr Bert Lance while campaigning in New Jersey yesterday and was once again conspicuously moderate in his statements of support.

He said he had not known about all Mr Lance's various banking practices when he nominated him last December as Director of the Office of Management and Budget. He again said his friend should be given a chance to defend himself, and reacted very mildly to yet another call for Mr Lance's resignation.

Senator Robert Byrd, Senate majority leader, had said that Mr Lance's resignation was inevitable. "Obviously I respect the opinions of people like Senator Byrd," the President said.

Mr Carter will hold a press

Mr Carter will hold a press conference on Wednesday, the most dificult since he became President, and his task will be to extricate himself as best he can from the Lance embarrasyment. Mr Lance himself will testify to a Senate committee the next day, and will presumably resign then or shortly thereafter.

The question is no longer when or how Mr Lance will leave office. It is what damage the affair has done to the President. The Republicans think the damage is consider-able and are already gloating

over it.
On television this morning the Republican leaders in Congress, Senator Howard Baker and Congressman John Rhodes, claimed that the affeir would give them an entra 40 seats or so in the House of Representatives in next year's

According to Mr Rhodes, it has given the Republicans more election issues "than you can really say grace over, and we intend to utilize them to the greatest extent."

Olivetti Systems. Intelligent enough to work on their own.

Adaptable enough to join any network.

There's a new breed of distributed data processing systems. They come from Olivetti. Over 43,000 new Olivetti A5, A6, A7 and TC800 systems have been sold worldwide, leading the drive

to data devolution. Their programmability permits them to work independently or to integrate easily with almost any

mainframe computer. Their modularity allows enlargement of existing teleprocessing networks.

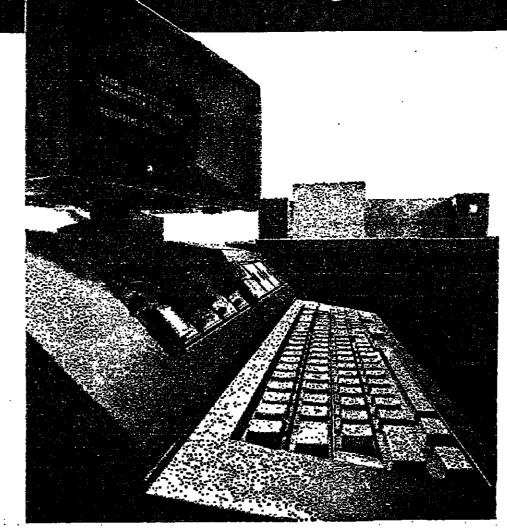

One of the Olivetti distributed processing systems is the TC800, an intelligent modular terminal system with a difference. It can be configured to cope with most of the jobs

previously reserved for larger and more costly computer systems. And it can switch roles from hour to hour the system adapting to the people who use it. All of which makes the TC800 the ideal intelligent terminal system for government, industry, business

Olivetti has installed throughout the world over 115,000 data processing systems and minicomputers, 155,000 terminals and teleprinters and more than 335,000 accounting systems.

Somanyreasons why you should consider

For details of Olivetti systems, write to Peier White, British Olivetti Ltd, 30 Berkeley Square, London WIX 6AH. Consider Olivetti first.

White collar unions get in on the Act

New from Texas Instruments. A whisper-quiet desk calculator. With reliable thermo-électronic printing.

Great value in a printing calculator. so quiet that the londest noise you hear is tearing off the printout. The printing mechanism has virtually no moving

parts to maintain. No messy ribbon, either.

The technology behind these advantages is thermo-electronic printing from Texas Instruments. Proved on more than 100,000 Texas computer terminals and now also available on advanced calculators. With non-impact thermo-electronic printing, the TI-5015 is quieter and more reliable than you would have believed possible.

The compact, attractive TI-5015 desk printing calculator is outstanding value for money. Designed for general use in offices, shops and in the home, the TI-5015 has capabilities usually found only on bulky and expensive specialised machines. Thanks to its independent add-register feature. And its electronia decimal-setting.

And its ability to cope with the fastest keyboard operators.

The TI-5040 at £109.95* Offers both printing and display.

The TI-5040 features the same quiet and reliable thermo-electronic printing capability. Or you can switch off the printer and use only the display --- 10 large, bright green digits with commas. Includes independent add-register feature, plus versatile 4-function memory.

The TI-5200 at £49.95* 12-digit display calculator.

The TI-5200 has a 12-digit display with large, bright green numbers. Full 4-function memory. A handsome and useful desk display calculator for general office, home, or executive use.

See these quality Texas Instruments desk calculators today complete with 1-year warranty — at leading office equipment retailers throughout the Country.

> Listen for the quiet revolution.

Giant technology. From the people who made micro-electronic calculators and watches possible.

Football

Ramsey success unlikely to whet his appetite Miss Evert achieves third win

By Norman Fox Football Correspondent

Suddenly eevryone seems to have become sentimental about 1966. Another performances by England encouraged the reminiscences last week and now that Sir Alf Ramsey is back as one of football's temporary managers there have been such headlines as

"Ramsey still has that magic touch". All 11 members of that World Cup winning team were invited to give their verdict on the present England in a Sunday newspaper. The one positive suggestion came from Alan Ball who said the only player good enough to fill his old shirt was himself. The situation has the makings of football's equivalent. to television's obsession with the war.

The fact that Sir Alf took the wings from the Birmingham City team and sent them out in 4-42 formation to gain their first points of the season

auginst Middlesbrough at Avresome Park on Saturday was hardly the most original answer to a crisis, but it was practical. Just as Ron Greenwood's idea of a Liverpool unit was commonsense, so Sir Alf did what he considered the most sensible thing. Temporary managers are entitled to use temporary expedients, but vision is the key to the future at playing and management

Sir Alf's success in persuading Birmingham City to feel confident enough to beat Middlesbrough 2—1 is not likely to whet his appetite for a comeback. He said after the game: "It's vital a new manager should be found as quickly as possible. In the meantime I'm happy to help as much as I can." Everyone seemed delighted with his dressing room manner, and on the field Francis, who was again one of England's brighter players last week, scored both goals. A new manager is expected to be announced this week and this could mean another link with 66 as Jack

Charlton is among the runners. Birmingham's win lifted them above Derby County and Newcastle United, whose maangers, Colin Murphy and Richard Dinnis, respectively, know the feeling of insecurity.

Quite the reevrse for Laurie McMenemy, of Southampton, who boasts of rejecting an £80,000 offer from the Saudi Arabians, or at least Jimmy Hill, who advises them. Meanwhile, British Airways report the departure last Friday of passenger Revie to the Persian Gulf, Mr Revie leaves behind a "bribes scandal" that this weekend extended further, with allegations against his former Leeds club captain, Bremuer.

and this week's European matches bring welcome fresh horizons. Liverpool avoid the first round of the European Cup on the good grounds of being the holders. They continue to seem invincible at Antield, where they beat Coventry City 2—0 on Saturday, so

chester City are among the favourites to win the Uefa Cup and by bearing Manchester United 3—1 they stayed at the top of the first division. United, facing a difficult Cup Winners' Cup tie against St Etienne, have doubts about the fitness of Macari, who had to be replaced on Saturday by McGrath. Scotland's manager Alistair McLeod has named a pool of 22 for the World Cup qualifying tie against Czecho-slovakia, at Hampden Park on Wednes day, September 21. Bruce Rioch, who withdrew from last week's friendly match in East Germany because of injury, is back and McLeod's main concern could be which three of his five Anglo midfield men to play.

In East Berlin, where Scotland lost 1-0, he started with Macari, Masson and Harrford, Genmill of Derby substituted for Hartford in the second half

next month they should start to defend their title still full of confidence. Man-

From Rex Bellamy
Tennis Correspondent
Forest Hills, Sept 11
Christine Evert, of Florida, aged
22, won the United States tennis
championship for the third consecurive year—a feat last achieved
by Maureen Connolly 24 years ago
—by beating Wendy Turnbull, a
refreshing new recrust to the citte
of tite women's game, by 7—5,
5—2 in 87 minutes here yesterday.
It is even more remarkable that,
on clay courts. Miss Evert has now It is even more remarkable that, on clay courts, Miss Evert has now won 113 consecutive matches and 23 consecutive tournaments: including two French, two Italian and one Virginia Shins championship in addition to her United States titles. "I'm very proud of the clay court streak," she said yesterday, "I don't think anyone else has done that."

In these championships Miss, Evert has beenslightly below her hest form, but has never looked in danger. She has been inhibited by a damaged left shulder that has demanded intensive treatment under the supervision of the official trainer at the championship.

demanded intensive freatment under the supervision of the official trainer at the championship. "I ditn't want to think about it until the tournament was over. Now I will see a doctor." Miss Evert was fortunate that it was not her right arm that was affected. In her last two matches Betty Stove and Miss Turnbull worked her harder than anyone did in last year's championships.

Miss Turnbull, aged 24, comes from Brisbane. She has been on the fringe of the game's officertorps for a year or two. By beating Rosemary Casals, Virginia Wade and Martina Navtatiova in successive matches here she has earned what could be described as a field promotion—which may or may not be confirmed later.

"Wendy hasn't won a major tournament and she hasn't consistently beaten the top players." Miss Evert said. "But she has the potential and she's a lot tourher than she has been given credit for.

There are plenty of players achieve one starting success. The important thing about Miss Turnbuil is that she strong together three of them; and then confirmed the form with an admirable performance in the final.

"She started out very quickly," Miss Evert said. "I haven't been with the she themistics the started out of the Miss Evert said. "I haven't been pushed like that the whole turnament. She moves very well, I couldn't put the ball away. I was buting a lot of shors. I thought were winners, but she was cetting them back. I had to go for the lines, so I made a few more errors than usual."

Miss Evert has more experience Miss Event his more experience of such hig occasions and the made the better start. Then Miss Turnbull began to play so well that, inducing Miss Event to make some mistakes, she broke to 4-2. lost her own service, but then broke through again for 5-4. Miss Event, though, then had a run of nine points out of ten ("the righter the situation, the better I play").

The ser ended with a fie-break

toan usual."

better I play").

The set ended with a tie-break in which Miss Turnbull was a little tooo eager to tialsh the railies. She lost control off her backhand. Miss Evert had a run of ten consecutive points at the end of the first set and the beginning of the second: At 2—3 down in the second set, Miss Turnbull had a break point, but was in the second set, Miss Turnboll had a break point, but was baulked by a controversially close line decision, whereupon she lost seven points in a row "I got a little upset and lost my concentration for a while"). In the last game she had two break points. But she lost the match with three successive backhand errors.

The men's semi-final round pursued a predictable pattern. Both matches were decided in straight though closely-contested sets.

Vilas. All he could do was dis-play his uncommon patience con-centration and ball control in my. centration and ball courrel in my ing to persuade Vilus to hurt him self.

Hesides rallying as soundly as Solomon, Vilus chamanded a greater range of pace and more lactical variety. But he had un exploit these advantages with care: most obviously when he advanced to set up not uttacks by volleying Solomon's looped drives and then cutting off Solomon's attempted passing shous of Tobal Vila's forecourt game wan him the match.

Connors was severely lested by the amatch that, from a tactical point of view, had much in come mon with its predecessor. Commentage of the counter-hitting counter-hitting the stack ing a man who tried to Ture him into error or thwart him with counter-hitting. Counters was always keen to move forward, he intimidate his opponent, to blast him to defeat.

But Barazzutti covered the court of him to defeat.

driver or the 440 yards 18th, which as a sowed the seeds of final disaster, [2]? was not ignorance. The evening a seed his policy well would be not to play safe but to the trust his consistent long game.

ris choice of club was, in a molling sense unwise, and it talled, but it might have been pretisely a lack of self-assurance that made him choose the path of valour rather than distriction. In another context that refusal to play safe might provide the proof of the might provide the proof of the life to the latest a refusal to provide the proof of the life to the latest a refusal to provide the proof of the life to the latest to the

Tottenham's winner a long time coming

Although Tottenham Hotspur had most of the ball in the sunshine of White Hart Lane on Saurday they took an unconscionably long time—until quarter of an hour from the end—before Jones managed to screw home a shot to beat a pedestrian Fulham, 1—0. beat a pedestrian Fulham, 1—0.
This was due in part to poor finishing, to some alert goalkeeping by Peyton, but largely also to the current habit of lofting endless lobs into the opposite penalty area. There is nothing new about all this. The England side, for one, have been doing it for a long time—their minds frozen, as it were, and degrid of ideas of how to open up defences. Since they are expected to set an example it is only natural that others will imitate at a lower

However, there was one man who did not follow suit. The exception was Hoddle, Tottenham's gifted wing half, who either does not go to Wembley or watch nevision. He, at least, was always trying to penetrate the enemy ranks with probing ground passes which at moments lifted the game on to a higher dimension.

frustrated and embarrassed by the ball. The approach work was too lateral with unimaginative passes pushed square to one another as if no one was prepared to shoulder any responsibility. The same could be said of Fulham, too, so that it was all much ado

As a creative match it represented a sleeping pill. Spurs, how-ever, continued their successful start, which doubtless is what counts. The fact that it was the winning of an aerial duel which finally led to their goal might seem to justify their methods. A long pass from Hoddle sent Taylor sprinting to the right hand

Nottingham Forest proved at Molineux on Saturday that they are good enough for the first

division, and also gave us a strong

of the division's most attractive

sides. They beat Wolverhampton Wanderers, who were also promoted from the second division last season, 3-2, but the score

gives no indication of the great disparity between the two teams.

disparity between the two teams. It is true that Wolves had a number of men missing including their normal goalkeeper. Pierce, which made them desperately valinerable in defence, particularly in the air. But the skill and speed which the Forest forwards, Robertson, Woodcock and Withe showed, and the way in which Burns, the new man from Birmingham, has slotted in at the back, suggest that Forest could surprise a lot of people this season.

Woodcock and Robertson are

Woodcock and Robertson are

Woodcock and Robertson are both neat, dapper, little players with a turn of speed that often had the Wolves defenders floundering. Withe, in contrast, is a big man who looks, at first sight, a bit cumbersome but is surprisingly quick and manoenvrable when it is necessary.

Forest's first goal was a good example of Withe's alertness. A rather half hearted free kick from Burns floated high into the Wolves

penalty area, where Parkes rushed out, hesitated momentarily—he may have had his attention diverted by one of his own players—and then allowed Withe ro nod the ball away from his outstretched fingers into the cet.

Forest too difficult for

Wolves to penetrate

corner flag and when he released a deep centre beyond the far post Duncan was up to head square to Jones, who flicked home the winner.

Duncan and Jones can spell danger in the air. They are the target men. But how much more effective they could be if served more consistently on the ground. When Taylor twice reached the by-line to pull back low diagonal crosses Jones missed each time close in—surprised, it seemed, to have to use his feet rather than his head. his head.

Folham largely had their backs to the wall so that little or nothing was seen of their attack, though here Maybank was cager to hunt at the end of a sudden counter attack. But the lact that Daines was not once required to stretch seriously for a shot tells the story. stretch seriously for a shot tells the story.

Whether George Best would have been able to make a dent on events it is impossible to tell. Certainly his absence was felt by Fulham, who are ominously short of goals as they search for their first League win of the season. As it was, he was far away across the Atlantic, snatched back by his American employers only 24 hours earlier. A human lightning conductor, sadly, he seems to attract

earter. A numan nammag con-ductor, sadly, he seems to attract problems of one sort or another. Fulham look to be in for a cold winter of little comfort. Storey almost inevitably, was booked for an incident off the ball. Lacy, Evans and Gale all shone in a stubborn defence and Peyton in a stubborn defence and Peyton pulled off one particularly acrobatic save to a waspish header by Duncan which Taylor crossed on the stroke of half time.

On the Michael of the Control of the Aylor. G. Peyton: R. Erans. I. Strong. P. Storey, J. Lacy, A. Gale. Greenaway, J. Evans. J. Mitchell. Maybak. T. Bullwant. Referee: T. G. Bune (Sussex).

Commitment found in midfield

The score was decisive enough: 3—1 to Manchester City. Most of the City followers would have had the City followers would have had no hesitation in concluding that the old rivals from Manchester United had been sufficiently well heaten to forget last season's two 3—1 results that went the other way and now consider the rest of this season as a downhill run to the championship. Certainly City are a formidable team these days, but to read so much into the 95th Manchester derby at Maine Road on Saturday was perhaps to overlook some important influences.

Manchester United without the

Manchester United without the Greenhoff brothers are not really united. Nicholl stands in as a central defender with conhusiasm central defender with conhusiasm but he lacks any composure under pressure to play his way through crises. He is essentially somebody's right hand man. McCreery plays well enough in the attack yet is unable to support Pearson as strongly as Jimmy Greenhoff. The result, on Saturday, was that Pearson had to fight for everything against Booth and Watson and had to concede defest.

Ridd, playing his third match against his former club but still awaiting his first goal against them, scored twice and could have had at least three despite not having Tueart to provide for him. After 14 minutes, Forsyth flattened Channon for the first flattened Channon for the first time. Owen made to take the free kick but left it for Kidd, whose shot was a beauty, the ball plerc-ing the wall and beating Stepnes low at the far corner. But before that Kidd had headed over the bar from a promising position and Owen had been unable to get enough power into his header.

enough power into his header, United had their chances without ever looking like taking them, whereas City accepted theirs regularly and efficiently. Kidd was especially sharp coming in behind

first half Stepney's goal was under pressure.
United could have avoided the first goal and were at fault again just after half time when Nicholl fouled Barnes. Hartford's kick should have been cleared by Albiston. The ball ran on and Kidd turned quickly to hit his shot in off Stepney.

Sometimes United fought back to give Coorden some anyters as penalty area no easily for United's liking. Some wildly ill-timed tackles sometimes stopped Chan-non but never dissuaded him from non but never dissuaded him from trying again. Barnes supported cleverly, though he might be criticized for not being suffici-ently involved. The commitment for which City are well known was mainly found in midfield where Hartford, Owen and Power were splendidly effective, leaving United's Macari and Mcliroy unly the crumbs

Channon who ran in on the left and played the hall to him as if offering a gift. Kidd raised the ball high over the bar, but City got their third 12 minutes from the end when Hartford's shot rebounded to Channon who took advantage of the disorientated defence to score. Nicholl's attractive goal for United two minutes from the end, lifting the ball over Corrigan from 35 yards, was a defiant stroke against the tide.

MANCHESTER CITY: J. Continua; C. Clebents, W. Dosachie, G. Owen, D. Watson, T. Booth, P. Bannes, M. Channon, B. Kidd, A. Hartford, P. Power.

MANCHESTER UNITED: A. Stepney:

Coventry's expectations cruelly dashed

Then Wolves, to everbody's assonishment, rallied. Bell, who had replaced young Todd, making his first League appearance, in the Wolves attack, scored during a scramble in front of the Forest goal line. Forest's defence lost a little of its solidity afterwards, exemplified when Lloyd blantantly held Richards in the area and Wolves were awarded a penalty. Daley scored with his second attempt from the spot—Middleton saved the first but the referee ruled that somebody had moved laten.

woives struggled for a long time afterwards, seeking for some order and rhythm. They put on a brave face on until the second half when they were finally scuttled—or so we thought—by two brilliandy headed goals, the first from Bowyer, the second by Woodcock

into the area before the kick was taken.

In the few minutes remaining Wolves pressed with some vigour but falled to score again—which is a good thing because if they had done, it would have been a great injustice to Forest.

Forest are hoping to complete the signing today of Peter Shilton, the England goalkeeper, for 1270,000. There seems nothing wrong, however, with their present goalkeeper. Middleton. He made one magnificent save from Carr on Saturday. It was one of Wolves's rare shots, but it might have turned the game had it gone in.

Third division

The dry wits of some of those spilling out from the Kop on Saturday questioned the compliment and apparently sound love of choosing six Liverpool players as the backbone of the national side. Was it, they bantered to lend England some of Liverpool's well-ordered thoroughness, or rather some devilish plot to allow England's shortcomings to rub off on Liverpool, and so give the rest a chance. In that breath of humour straight off the Mersey was a reflection of Liverpool, by their own standards, as out of touch as one remembers them.

They beat Coventry City 2-0 at Anfield because, as much as anything, they took their few chances, while Coventry discarded theirs, but over a long central section of the match Coventry's midfield, splendidly welded together by Yorath, was a match for them, were no more successful than and often made better ase of the

Yorath, was a match for them, and often made better use of the ball.

Callaghan covered his customary acreage, Kennedy strode forward with the intention of a spot of sniping witnever he could, but every avenue turned out to be a cul-de-sac. There was no Heighway,

when the target was inviting, and Coventry's best attempt—apart from that early shot of Graydon's from that early shot of Graydon's —was a fine volley by Wallace which flew a shade too high.
Coventry's expectations were rising steadily when they were cruelly dashed. Two goals to Loverpool in the span of three minutes shortly after the hour underlined once more how imprundent it is even to toy idly with the thought that they might be filtering. Fairclough maked away the first, low and hard, from the left of goal as the flight of Callaghan's cross from the right escaped Dalglish, McDermott and their markers. Dalglish claimed the second with masterly control, flicking the boll deftly past Coop and running on coolly up the middle to shoot past Blyth. Nor will it have escaped those wits from the Kop that neither Fairclough nor Dalglish was in the England side.

Chelsea fail to exploit porous defence

By Gerald Richmond

Chelsea passed up a chance to convince themselves that they really belong in the first division when they drew I—I and failed to take advantage of Derby County's indulgently porous defence at Sumford Bridge on Saturday. They may be early days, but already the league table is taking significant shape and an unnally, scrambling match did nothing to suggest that either side is on the brink of prosperity. Derby's team cost a small furture to assemble but when Jumes was removed from the scene by Garner's crude tackle just before half-time, they had no other source of inspiration.

James had gone past Harris with the kind of embarrassin; ease which makes defenders think that retirement may be the only answer and Derby's goal stemmed from his fierce, swrling shot. Phillipscould not hold it and, as Hales came into challenge the ball hit Droy's hand and bonneed into the net. The referee, as if to underline the sharpness of his reaction, awarded a penalty rather than a goal, Daly scoring by way of

Phillips's right hand post. Then James, already cautinged for disputing a decision, was felled as the carried the ball out of defence and left on an impressive, wheeled stretcher, Garner being caunoned for the tackle. cannoted for the tackle.

Chelsea leaned heavily on Ray Wilkins's ability to pass accurately and imaginatively. He has a considerable range and his distribution sends his minions surrying around eagerly, if not always to great purpose. As Garner's head became the focal point of Chelsea's attacks, Langley, Wicks and Staniey contrived to miss the tarcet from promising positions and Derby, totally disorganized at the back, were kept afford by individual talent rather than any semblance of team pattern. They are, it seems drifting towards another upheaval of the kind which has punctuated their recent listory. For they are making ittle use of the rich gifts of their players. their players.

Southgate regain composure

Hockey

By Syduey Friskin By Sydney Friskin

Southgate 2 Bedford Eagles 1

Southgate, European club champions, clung tenaciously to their balftime fead of 2—1 to beat Bedfordshire Eagles in the final of the inter-league hockey championship, sponsored by Courage, at Aston University grounds.

This tournamen, full of changing fortunes, came to an excitor end.

This tournamen, fall of changing fortunes, came to an exciting end. It was much to the credit of Southgate that they regained their composure after finishing the first day's play in disarray. Injury problems which led to the loss of Ian McGinn, could not, however, excuse their early tactical failures. Bedfordsbire Eagles, who had a managing to stop Shama from scoring, after which both sets of forwards, with adequate support from belind, kept the gome flowing. Cotton struck a short corner superbly in the twenty-lifth minute to put Southgote in the lead, which was neutralized in live

amount to put Southgate in the lead, which was neutralized in five minutes through Shama, who followed up to score off the rebound from Owen's pads. But within a minute Neaie advanced in high gear from Whitaker's pass to give Southgate the lead again. Faulty hand stoping had much to do with the failure of both sides to convert short corners in the second half. Eagles had more of these awards and one particularly god shot by Kavanagh was well saved by Owen. Much of the day's carlier thrills were experienced on the Perry playing fields where Furness Athletic, the Durham and Northumberland champions, having beaten Southgate 2-1 on Saturday, failed to sustain their effort. They leat to sustain their effort. They leat to sustain their effort. They leat to Emministe when goals in the last few minutes. Neale's goal almost on time was decisive in sending Southgate into the final on goal average, an effort which did much to earn him the sponsors' award for the Player of the Championship.

Neil Coles won the first prize that Peter Dawson landed to him in the Tournament Players' Championship at Foxhills, Ottershaw, on Saturday. Even though Dawson won £5,000 in second place, the climat was macabre as he struggled to keep his lead, which had started as six over the field, shrunk to one, revived, and finally disappeared in the trees at the 18th. Coles won by one struke.

Conditions were not ideal for grappling with a first breakthrough: a gusting wind, tricky holes at start and finish, and a first prize swollen by guarantee of appearance money in the world that the prize swollen by guarantee to which victory last week gives to two. O'Leary to one, but they entry. Higgins narrowed the pap fell away and Dawson looked safe at the 12th where he was down. Bedfordsbire Eagles, who had a smoother passage into the final, looked more composed when it begen. Yet Southgate provided the first thriff when Neale advanced with an zir of resolution to take a penalty stroke—the result of Alistair McGim having had his stick hooked inside the circle. But Tatmon in Eagles' goal made a great save which terved as a quickener to inventive genius.

Southgate were in trouble at the other end with Owen just managing to stop Shama from is at. At the 10th Coles overhyt.

shrewdness, was closing the gap last. At the 10th Coles overhit the green, but saved his par from 18ft. At the 12th he was in the trees again, his ball against the root of a tree, but he was standing in a rabbit scrape, and got a free drop, holing again from 18ft, this time for a birdle.

Dawson kept his two hole lead and a solid three at the 16th, where wood was needed, was reassuring, Speciators blocked the ball's way to a ditch at the 17th.

A high kick from Morgan has Rives reaching for the sky.

Irvine's superlative show lifts proceedings to exalted plane

By Peter W st.
Rugby Correspondent
In content and result the first meeting of the Liens and the Barbarians on Saturday left almost everyone satisfied if not exactly cated with supportia. The Queen's Jubilee Appeal Fund is now richer as a result of this contribution from rugby football, by £100,000, and its chairman, Prince Charles, must have thought his journey to Twickerham' had been well rewarded. Shortly afterwards, Irvine put over a penalty goal (for lowering the scrumage) from the halfway line, in the second period, his intrusion gave timely momentum to an attack that brought a try for Evans, pursuing Ferwick's well placed diagonal kick, and he then popped up again, after a poor pass in the middle, to corkscrew out of a tackle, to seize the loose ball and to score himself.

must have thought his journey to Twickerham had been well rewarded.

A greater drive and conesion at ruck and maul and a supertative performance by Andy Irvine at full back helped build an immpregnable lead (23-6) for the Llons, who surely felt they had more to prove in a hard, competitive encounter that smarked not at all of enhibbion. But the scratch side at last acquiring proper coordination in the loose, scored twice in the last quarter and succumber honourably by a goal, two trees and three penalty goals (23) no a goal and two tries (14). It was not a day of distinguished back play after all, and one saw enough to understand why the Lions' backs had suffered biccopsfrom time to time in New Zealand.

Morgan's service was not always on target and the distribution of the centres, notably that of McGeechan, tended to be wayward. A fairly stiff wind could not explain all the mistakes. However, the contribution of Irvine for the first Lions' try lifted proceedings no ah exalted plane.

A dazzling piece of acceleration up the right lwas followed with an inward slant past J. P. R. Williams and culminated, as the cover converged, in a difficult overhead pass for Fenwick to score close in, and for Bennett to convert. It took some time for the French loose forwards to make an effective mark, Basiar (doubties not yet fully honed), cortributed little in the loose. Richards, at stand-off for the Barbarians, sometimes chose the wrong option by curting back inside but Kent, with limited opportunities in the centre, advanced his cause with some typically potent running and a secure, resourceful effort in defence. It took some time for the French It must have seemed like a new dawn for Bernett, the rain and mud of New Zealand behind him, to stable his foot in lime turf once more and to exhibit that famous side-step again. At the dinner afterwards the Lions' captain went

out of his way so pay tribute to Tony Neary, who took over the leadership of the forwards when Terry Cobner was injured. "I'm amazed", lie observed, "how amazed ', lie observed, "how England could ever have left cut a player of such ability ". The sun beamed down, the pitch looked lush and manicured as if from a seedsman's catalogue—and Rement, down the wind, got his Lions off the mark with two early penalty goals, one of them caresed over from 40 yards and the other, after three successful rucks, and an offside offence by the Barbarians, from short range. penalty gool made it 15-0 and if Evans, clear on the left, had not been foiled by a masty bounce. Just before half there a sustained Earbarkans attack broke down when McKay knocked on a pass. But, from the other side of the field, it seemed that the Lions' cover night anyway have cut him off.

period with a characteristic try by Williams, storming through to the posts on a crash-ball from Gravell. Davies converted. The Lions then stretched away with the tries by Evans and Irvine but, beofre the finish, Gerald Davies was slipping the tackles and sparking Barbarian counter thrusts out of almost nothing, the blond and always identibiable Rives was heavering everywhere, and Gravell heavering everywhere, and Gravell and McKay ran in the last scores. But for the splendid cover by Bennett, McKay and Kent might have added to the count. By then, Squires had been replaced on the Lions right wing by Elgin Rees. A. Neary (Broughton Park).

Missing parts no help to uncertain start

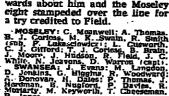

By Nicholas Keith

It would be best to suspend judgment after Saturday's shapeless match, at the Reddings where Moseley best Swansea by a goal, a try and a dropped goal (13 pts) to a goal (5). The two engines coughed and spluttered as if a mechanic had mistaken linseed for lubricating oil.

Swansea were missing three vital parts—Wheel. Richards and Meredith were at Twickenham—and did not really do themselves justice on their first visit to the Reddings. Moseley missed Ayre and Nigel Horton, the new landlord at Hort's Bar, Toulouse; their scrummaging was as solid and imposing as everbut, in the lineouts, they were often one jump behind Moriarty, a blond lock who was the hub of the Swansen puck and had an excellent all-round match. Moseley may not lose many games but they will not win many friends either on this evidence.

There were no points on the board after a strappy first half wenen Swansea lailed to make use of the wind and the slope. Donovan missed a penalty and an attempted drop; Jenkins overran the ball with the line at his mercy. After Cusworth had purt Moseley ahead with a dropped goal, if we minutes into the second bulf. Swansea were struzgling op the down escalator.

Cusworth deserved this score.

Ball accepts Penarth's presents with alacrity

By Peter Evans

Wasps 21

"Come on, Penarth 10

"Come on, Penarth 10

"Come on, Penarth ", an injuries to Palmer and Bohlen measperated Welsh voice shouted from the stand. "You've helped them long ecough." It did seem like that. Both Wasps first half tries in their 21—10 win at Sudbury had come gift-wrapped.

Penarth had started with alactity, James and John, their biblicatity sounding habiback pair, displaying early panache. But it did not last. During the first half at least, Penarth lacked the discipline and cohesion to captaize on it.

Some of the passing by their backs was sustained more by hope than accuracy. Ball, purposcful and amieful at stand-off half for Wasps, noticed this and during the next Penarth attack intercepted a bailooned pass. His try took him the rest of the length of the field from with his own 25. Wasps' other farst-half try was also the result of Penarth laxity.

Wasps' other farst-half try was added by J. Davies and Wasps' by Sardiner.

Wasps: I. Anbolm; I. Bell (sub-

discipline and cohesion to captalize on it.

Some of the passing by their backs was sustained more by hope than accuracy. Bail, purposciul and emietial at stand-off half for Wasps, noticed this and during the next Penarth attack intercepted a bailboned pass. His try took kim the rest of the length of the field from wish his own 25.

Wasps' other first-half try was also the result of Penarth laxiv. Helmore semed to have plenty of time to clear from his own 25, but the lone figure of Raynor appeared at speed, blocking the view and the kick. It was but a snort punt ahead to the Penarth hine for his try. Bail also kicked a penalty for Wasps from just only in the bail, even the lone of the penarth land to the Penarth land

Memoria: stakes at Leopardstown won today's Prix de la Salamandre dvantage over Bilal at the post, then came Kenmare, and the dis-

The owner, Henry Warren, bought Madam Clare, the dam of John de Coombe, for just 2,500 guiteas when in foat to Moulton. Because no buyer could be found for John de Coombe as 2 foat or a yearding. Mr Warren decided to yearding, Mr Warren decided to keep the colt himself.

Faul Cole might not race John de Coombe again this season and next year's 2,000 Guiness becomes the two-year-old's principal target. Geoffrey Baxter, who rode a perfect race, describes the colt as "still green" and feels he will improve even further as a three-year-old.

Philippe Paquet took Super Concorde strsight into the lead when the stalls opened, and for much of the race the pair were followed by Kermare and Little Love. Two furlougs from home Kermare passed the fading Super Concorde and, at the same time. John de Coombe began to make his ram. Taking the lead 100 yards from the post John de Coombe held off the fast finishing Bilai, and Kermare kept third place from Super Concorde, who ran on again inside the last furloug. Paquet said after the race that Super Concorde never settled and publied throughout the Salamandre, but although the spondent the jockey added "things will be very different in the Grand Criterium and I still believe in the horse".

be auctioned in Ireland this month, but views are conflicting as to what effect the ban will have on prices and business generally. Goff's managing director, Jonathan Irwin, described the American decision as "harmful and unjustified". But Michael Opperman, spokesman for the Ballsbridge company, said: "It may not make much difference as far as we are concerned. Our sales next week are beamed at the European market."

European market."

Mr Irwin went on to say: "But what puzzles me is that veterinary officers from America have just arrived in Ireland. The ban is

arrived in Ireland. The ban is ludicrous, because the disease does not affect yearling stocks and mares already pregnant."
However, Mr Irwin considered that there could be one good aspect to the ban. "American buyers who do come over, would be likely to leave horses they

American ban will affect Irish sales

|Alleged should prove much more effective over Arc distance

Racing Correspondent Disappointed that he obviously was not to win the St Leger at Doncaster on Saturday with Aleged, Vincent O'Brien at least ham some consolation when he returned home and heard that he returned home and heard that he had won three races at Phoenix Park with Try My Best. Le Militaire, and Turkish Treasure. With the future in mind, the most significant result was surely the vicotry of Try My Best in the Whitechurch Stakes. Try My Best is by Northern Dancer, who has achieved world-wide fame as a stallion.

Try My Best is reputed to be the most promising two-year-old at Ballydoyle and on Saturday he started at 4 to 1 on which certainly suggests that his reputation preceded him to the course. Now, the plan is for him to follow teh path taken by The Minetrel a year area and have just Minstrel a year ago and have just two more races this season in the Larkspur Stakes at Leupardstown Larkspur Stakes at Leupardstown on September 24, and the Dewhurst Stakes at Newmarket on October 14. If Try My Best does turn out to be better than his stable and galloping companion, Solinus, who made Sexton Blake fight to the bitter end at Donaster last Wednesday, then its clear that he will be a tough nut to crack.

From the moment that he won Great Voltigeur Stakes by seven lengths at York, it was plain that Alleged would be a hard horse to beat in the St Leger and so it proved. He ran a wonderful race on Saturday but was simply beaten by an even better horse on the day. The decision to run Dunfermline against the colts was a brave one, but how well it was vindicated. The duel between Alleged and Dunfermline was a classic race in the truest sense and when we come to recall the highlights of the season, the sight of those two supremely well trained and well ridden thoroughbreds totally outclassing their opponents will

coming to Dublio for our sales next Monday and Tuesday. Of course, if the ban lasts, it could affect those buyers here who have been in the habit of resubmitting their purchases at two-year-old sales in America. We know that some lots bought at Ballsbridge last wear have their purchases.

Vincent O'Brien, who handled The Minstre all through his bril-

The Minstrel all through his bril-liant racing career, said: "The ban is very damaging to the Irish breeding industry. America are our best and most consistent buyers. Having this market cut off without warning, will be a real blow as horses cannot be placed in cold storage."

Dennis Bushby, Clerk of the Course at Yarmouth, retires on

Thursday after a 44-year association with the seaside track. The

occasion will be marked by a

presentation to Mr Bushby, who

Racing clerk retires

Dunfermline enters the winner's enclosure after her St Leger victory at Doncaster.

than average, the St Leger was run in a fast time, just 0.76sec ourside Cantelo's record. The fast even gallop set by Gregarious was obviously an important factor, but so too was Lester Piggott's decision to lie close behind the leader on the favourte. When Alleged went to the front half a mile from home, I thought for a second that the prize was at his mercy. But Dunfermline had never been far behind and suddenly there she was breathing down his neck in not pursuit. Together, they drew lengths and lengths ahead of their rivals in the straight as only two high class racehorses would have done. Slowly but surely, Dunfermline wore the favourite down and won in the end going away by a length and a half.

There was a tense time for 20

Stroma, when she was a yearling at the sales at he sales at he sales at the sales at he same que sale punder soil of the family to carry on the line.

Tartan Pimpernel added the finishing touches to a perfect day for her connexions by winning the sale and won her classic. Tartan Pimpernel is he now has two much more distinguished members of t

length and a half.

There was a tense time for 20 minutes after the race when the stewards held an inquiry into possible interference inside the last furlong, but they allowed the result to stand after seeing the film of the race taken from head on. I also saw that film, and it showed that it was six of one and half a dozen of the other, and that Alleged and Dunfermline were equally to blame. So a reigning sovereign won the St Leger for the first time at Doncaster. It was Dick Hern's fourth St Leger, which me tirst time at Doncaster. It was Dick Hern's fourth St Leger, which is a brilliant training achievement, and Carson's first. Dunfermline emulated Meld and Cantelo, the only other fillies to have won it since the war.

Being by the Derby and Guineas winner, Royal Palace, and out of a mare by the Derby and St Leger winner, St Paddy, Dunfermline has a classic pedigree if ever there was one. And her success in two classics this season can only be a source of immense satisfaction to

national championship at Wood-bine in Toronto in October, and then have her covered by Roberto in the United States next spring, but that has had to be shelved for the time being because of the han on the import of bloodstock into North America from Europe. In the circumstances, I will not be surprised if Dunfermitne is allowed to rest on her laurels. to rest on her laurels.

In no way did defeat on Saturday diminish the great chance that Alleged has of winning the Arc. though, and I will expect him to give his backers a great run for their money at Longchamp on October 2. Alleged stayed the Leger distance all right, but he could easily be much more effective racing over a mile and a half again.

Miss Prior-Palmer's patience is justly rewarded

By Pamela Macgregor-Morris
Britain regained both team and individual titles in the European three-day event championships yesterday, at the Burghley Horse Trials, sponsored by Raleigh Industries Having recognized the dustries. Having monopolized the team title since 1967 at Punchestows, until losing it to the West Germans, in Kiev, in 1973, the team of Lucinda Prior-Palmer on Mb. II gh Straker's George, Jane Holderness-Roddam on Mrs Howard's Warrior, Clarissa Strachan on Merry Sovereign and Christopher Loilins on Smokey VI, regained it from the West Germans, who won in 1973 to Luhmuhlem. Ircland finished well up, in third place.

Both prime protagonists, Eritain and West Germany, started the fluird phase fielding only three horses, thus climinating the margin for error of the customary four, with the best three to count. Merry Sovereign who cut his knee going across country on Saturday, had to have 15 stitches in the wound, and not only would it have been risky to start him, but the local anaesthetic contained cocaine, which, had he been dopetested, would have put him out. For West Germany, Harry Klugmann's El Paso was eliminated on the steeplechase.

mann's El Paso was eliminated on the steeplechase.
With an overnight lead of 40 points after the speed end endurance phase the team ride seemed relatively safe in British hands, but Miss Prior Palmer was by no means home and dry in the defence of the individual ritle which she won in 1965 on Be Fair. Eight points behind the leader. Kari Schultz on Madrigal (who had reproduced their Olympic form by leading in the dressage and the reed and endurance phases) she clso had Horst Karsten breathing reading in the dressage and the clso had Horst Karsten breathing down her neck. His 1972 Olympic horse, Sloux, had won at Boekelo in the Netherlands last October and at Lummuhlen in July. He was less than one noint in arrears.

But her winning streak did not desert her. After the long suspense—she was last in the running order—it was another splendid day for this outstanding personality. Madrigal, whose strong polut is not show jumping, fauted coming out of the treble, Sloux rolled a pole going i, but George was gloriously clear to win by less than two points.

Yet on Saturday it seemed as though all was over when, walking

though all was over when, walking the cross-county course, it was announced on the public address system that George had fallen on the steeplechase course and in-curred 60 penalties. Later it trans-pired that he had fallen outside the penalty area (in effect, on the

flat) and there was no penalty. In fact, when Miss Prior-Palmer turned somewhat simply in the interests of a good time, George had become entangled in the filmsy blue twine which bounded the fences and in places hung in festoons, and brought him down. She said yesterday: "He just stood there, I jumped off and he jumped away. But the fall did affect him on the cross-country—he was a lot more tired than he should have been. I don't feel I made a very good job of it either. I am just glad that he was George and knew what to do."

Miss Prior-Palmer does not expect to ride George in the world championships at Lexington, Ken expect to ride George in the world championships at Lexington, Ken tucky, next year. He is, after all, 12, and has been campaigned for a long time by the Strakers before she took him over and created a record precedent by winning Badmianon and Burghley on him in the same year. "It is not my place to even discuss his future. The owner and I are on very good terms, and I just take it from day to day. I shall ride Village Gossip at Boekelo in October and probably at Badminton next spring." Miss Prior-Palmer, who has won Badminton on three different horses, has put herself, at the age of 23, into the class of David Broome. There are many one-horse riders, but to win at world level on a succession of different horses is the true test of a rider.

Ireland, who also started a man chart with Wards Market and his

world leves on a succession of different horses is the true test of a rider.

Ireland, who also started a man short when Van de Vater and his Olympic horse Blue Tom Tit were eliminated on the steeplechase, which took an unusually heavy toll of three, did exceptionally well to win the bronze medal. Once again the result was a triumph for the English and Irish-bred horses, and it was reassuring to know that George, who was bred by Mrs Craker by the premium stallion St Georg is yet another product of the Hunters' Improvement Society and duly won the trophy offered for the best performance by the progeny of a premium stallion. It is worthy of record that the current European show jumping champion, Johan Heins' Seven Valley, representing the Netherlands, is also by a former premium stallion, the late from Ore. Results:

supremely confident race here this afternoon to take complete com-naud of the Italian Grand Prix in totus-built John Player ecial and lead Niki Lauda across finishing line by a comfortble 17 seconds.

But despite his win Andretti
had to say goodbye to his slim
hopes of becoming the next world
champion, for Lauda's second
place—his sixth this season—

place—his sixth this season—means that only Jody Scheckter (who retired (cday) with engine failure after leading the early laps can now step Lauda from becoming the next champion.

To do so he has to win all three remaining Grands Prix with Lauda failing to score in any of them. They would then the with 69 points each and Scheckter would become the champion by re-son of his greater number of race victories. In motor racing it rerson of his greater number of race victories. In motor racing it is not the habit to concede victories, but even Scheckter must know that the championship is going back to Austria.

Today we saw a race of attrition, with only mine of the 24 starters surviving to cross the finishing line. Alan Jones, the victor in Austria drove a smooth race

in Austria, drove a smooth race In his Shadow-Ford to take third place, chased hard by Jochen Mass in his McLaren-Ford, who in turn was hard pressed all the way by Clay Regazzoni, who brought his Clay Regazzoni, who prought his Ensign-Ford into fifth place on his hundredth appearance in a Grand Prix. The only other driver to complete the full 32 laps was Ronnie Peterson, last year's win-ner, who had to be content with sixth place this time in his six-

ner, who had to be content with sixth place this time in his six-wheeled Tyrrell.

Two other drivers finished two laps behind—Patrick Neve in his Williams March, and Jacques Laffite, who loat his two laps at the start when his Ligier-Matra stalled on leaving the start line.

A further two laps in arrears came Rupert Keegan, whose Hesketh stopped on the circuit and was eventually coaved back to the plis for a check up.

Although Hunt and Reutemann shared the front row of the grid, it was Scheckter, starting from third place, who emerged at the end of the first lap holding a comfortable lead from Hunt and Andretti. But Andrett, who moved into eccond place on lap two, soon closed the cap on Scheckter and went into the lead he was never to lose on lap 10 Scheckter kept station some two

high drama when Gracomelli's engine blew up, coating the track with oil, and Reutemann spun off the track and out of the race.

Both the Brabham-Alfas disappeared with engine trouble, Watson's after only three laps, Stuck's soon after half distance when running fifth, while Depailler had to abandon his Tyrrell on the circuit, and Nilsson retried his JPS Lotus with a broken front upright after an early incident. Jabouille drove his Renault for nearly half the race with a front wing cocked skywrds after a first lap incident with lan Scheckter, then had to give up with engine failure. The elder Scheckter also had to retire after looking to be set for seventh place.

So once again the uncanny reliability of the Fertrari Lauda combination has brought a rich dividend. It was not sufficient today to beat Andretti and Team Lostus, with also lowered the Monta lap record to Irain 39-tsee during their victory drive, but it did make him the 1977 world chambion in everything but name. The final confirmation of that will surely happen at Watkins Glen in three weeks' time.

RESULTS: 1. M. Lauda (Fertrari 124 7.2b) 1. M. Lauda (Fertrari 125 7.2b) 1. M. Lauda (Fertrari 126 7.2b) 1 Motor rallying

Fowkes leads Dunn knocked London Sydney rally South African

Britain's Tone Fowkes, on his first forcion raily, is leading the London-Sydney car raily sponsored by Singapore Arthues.

Fifty-two o title 62 cars which Johannesburg, Sept 10.—Gallie knoore, the South African heavy-weight, knocked out Richard Dunn, of Britain, with a flerce right to the jaw in the fifth round of their scheduled 10-round bout. Knoore event the Yorkshirestarted from London, are now waiting in Singapore for shipment to Australia where the final 15,000 km or this 30,000 km rady will be run. The rally is not expected to respect from Fremantic until September 20. man crashing to the canvas to land on the steeneth, and though Dunn tried to struggle to his feet, be ild not bear the count.

The Pretoria peliceman attacked the Englishman after a probing list round, and though Dunn until September 20,
Fowkes, in a Mercedes Benz, has displaced the Pelish rally champion, Sohieslaw Zasada, in a Porsche, on the second fiat-out special stage in Malaysia. Fowkes only incurred a imin 39sec penalty, while Zasada became lost and incurred 9min 25sec. However, the Pole managed to hold second place ahead of Scotland's Andrew Coman in a Mercedes. stood up well to some solid runching, there was little doubt about the outcome though it look longer than some would have rook longer than some would have liked. Dunn, a contender for the vagant Brinch title, whose four trips outside Britain have all ended with knock-out defeats, becan to lock uncomfortible at the end of the fourth round.

But it was halfway through the lifth that Knoetze, who weighed in at 15ct 5th charpared to Durn's 15st 10h nourod on the right hand

Woods breaks record When Leigh beat Blackpool 62—15 in a second division ruby league match yesterday John Woods broke the club record individual score. His tally was 38 points, comprising 13 guals and four tries.

Is the House of Commons too big to work properly?

Sir Peter Rawlinson, Conservative MP for Epsom and Ewell

and a former Attorney General, looks at

the way Parliament functions and considers possible reforms

Few today have a good word to say about Parliament. In-dustry, commerce, the City, and the professions seem tutions of government and of our law-making process. Judged by public reputation, something must be very wrong. Of Crown, Lords and Commons only the first seems to carry widespread public approval.

Because of this anxiety and questioning of the competence and responsibility of govern-ment and Parliament, some now call for a bill of rights. Others demand a change in the role and composition, or even the abolition, of the House of Lords. But the heart of the matter lies with the Commons.
And over this institution talk
of reform inside or outside
Parliament is strangely silent.

to be the principal national forum in which national issues should be debated and minis ters questioned. It is the centre of the law-making pro-cess. Before scrutinizing the need for a bill of rights or reform of the House of Lords, a hard look needs turning upon the Commons. How well does that House afford the opportunity for true debate on national policies? How effectively can it question ministers and probe administration? competently does it perof law?

I do not believe that with its present size and under its present rules and conventions it performs efficiently enough any of these functions.

The composition of the Commons is inevitably and obviously partisan. Its members have been elected on a "ticket". They have been if or many years. The reactions of MPs in debate or in law-making necessarily reflect this. Because the existence of a whose Ferraris had been running nose to tail from the start, to move into second and third places, dine seconds behind Andretti. Hunt, meanwhile, had survived a spin which dropped him from third to eighth place, but later he made a long pit stop in an attempt to cure a front end vibration, and retired shortly after resuming the race. Lauda until a broken exhaust slowed him on lap 35, when Lauda went ahead. Fire laps later came high drama when Giacomelli's engine blew up, coating the track with oil, and Reutemann spun off the track and out of the process. not, a government and their and thus too attractive for This need for constant polities, making the last speech for whips prevail. Parliamentary modern ministries. The opportical and parliamentary attention leads to excessive power versial debate can know what it is like. Harold Macwillan are are few and short. Thus the curbed and responsibility within a sensational or the provocative. But there is another factor department being handed over is at a premium for the MP which affects the role of the to officials. Moreover, officials with a marginal seat.

Commons in its influence on are often of higher intellectual.

can participate on the second secretary of state have correst many modern ministers, for reading (debate upon the prin-pondingly increased. They what they have a high and jusciple) of a major bill. Few need to spend more time in fified reputation? Certainly days are devoted to general their departments. issues. To sustain the govern-ment or to delay the government are the main duties of ranks of the legislators. The MPs who have been elected on prime base upon which the the "ticket" of a mass party. The most imperative reform, which would give back to MPs their freedom to exercise judgment, would he first the cli-mination of the right of a prime minister effectively to select the date for a general election; and, second, to define and limit the occasion parliamentary defeat must lead to resignation.

guestions. Parliamentary where a serious probe of a minister's action, is intended. are usually meaningless. Since the question is generally aimed with a frenkly political pur-pose, the answers are either political in return or evasive. As in debate, nectical avoi-dances and the smart side-step are the rule. Technique is the prime talent. Evening adjourn-ment debates directed to a sin-

is prolix and often obscure.
This is more often than not the government hangs upon the fails to give express and clear result of every major vote, the instructions to the draughtsresult of every major vote, the instructions to the draughts voting on the principle of man, sometimes apparently every bill, and on each clause of a bill, is usually predictable. The confrontation ment which has negotiated a procedure of the committee pact this is so. Members are stage upon a Bill is not approposable meaning the procedure of the committee objects and the principle of the clarification of the deside meaning the principle of the clarification of the deside meaning the principle of the clarification is the principle of man, sometimes apparently deliberately, in order to retain the principle of man, sometimes apparently deliberately, in order to retain the principle of man, sometimes apparently deliberately, in order to retain the principle of the principle of man, sometimes apparently deliberately, in order to retain the principle of the p Even with a minority government which has negotiated a procedure of the committee "part" this is so. Members are stage upon a Bill is not appropriate for the clarification of the country, speaking, disting, the ritual of the "wind-up"? accessible to his parliamentary colleagues, inconobing in smoke or tea-room, defending or consolidating his position in party biererchy, the darling of the party conference, and you will probably find a minister who may enforce broad political guidelines but whose exercise of control over his department and the management of his duries and responsibilities to a public wider than his political cronies might in other days have led to his impeachment!

Certainly ministers must remain answerable to Parliament. But that answerability must be effective. It should also be so organized that it is sufficiently concentrated to leave a minister free for a substantial part of each year to get on with his job.

With the growth of departmental burdens on a secretary of state has grown a change in Parliament itself. The House of Commons has always been a rough assembly, even in modern times. Anyone who has sar through the "Suez" debates in 1956 can give testimony to the But in the past 20 years its manners seem to have coarsened, like the crowds at modern Wimbledon or Lords. Not now, of course, the great language of Churchill. But not even the elegance of Anthony Eden, the earthiness of Herbert Morrison, the pyrotechnics of Aneurin Bevan, the self-emusing ellipticalness of Rab Butler, the tun of Leslic Hale, or the grace of Harold Macmillan. There is either no time nowadays for such style. With the growth of departtime nowadays for such style. Or tehre is not the talent. Save for Michael Foot, on his day. And is there still a place

even in so robust a debating

mean? In my opinion it means that for efficient government, for better government, there must be some reduction in the size of Parliament and in the sittings of Parliament. While the principle of the respon-sibility to Parliament of ministers must be maintained, it should and could be strength-ened by the more efficient use of a smaller Parliament freed from the fear that every antigovernment vote would lead to a general election.

To be continued tomorrow

The flowers linger as autumn winds send the thistledown scurrying

thicket at the top of the wildest hill.

shouted their apparent joy as the briars came into flower. By jubiles week each bush had produced such a profusion of

rate or deep pink rose's that the small flowers on the rabbut-grazed turf below.

It seems, this autumn, as if every other day is grey and rain; so that it is only on the fine days between, man the chalk hills are alive again with flowers, that the thistledown can blow.

The whole spring, summer and autumn have been memorable for the successions of carpets and mistiggs of profuse wild flowers. Any unspoils downland banks and steep valley sides, warted with grassy old ant-hills, were smeared with the blue of hairy violets in April and soon after riots of taller cowslips, changed the colour.
Only a lew early purple orchids and
straight green hare paths interrupted the gold spreads.
Wide patches of wild thyme, yellow birdsfoot trefull, corse-spoe yetch and rock-

roses made backgrounds for the first

beries of spotted and then the brighter pyramidal orchids. Cuckoos, turticeoves

and a couple of rival nightingules, in a

were eclipsed unless the echning shades of scinancewort or the wands of lady's bedstrak caught the eye. As the roses feded, mikworts intro-duced the high-sammer carpets of purples

and blues. Each patch of small scabious, of "The Pride of Sussex", or blue round-headed rampion, and royal purple clustered campanula, was outlined by paterns of small ox-eye daisies and golden hawlibits. Ragwort tiper caterpillars, plusworms and dor beetles scurred among the

As the short knapweed flowers opened and linked each flower colony into a suffusion of mixed colour, tree-pipits.

willow warblers and common whitethroats were on singing from the flowering boson of priver, digwood and pay-

taring trees.

By the time the birds had stopped singing, the dwart thistles were out, each of them occupied by a young queen bumble-bee. The harebells bley to add to the colour of all the other flowers and still, a thistletiown is blown from the centre of each thistle leaf-rosette on the fine days between the rain, the downland banks and slopes are full of flowers. A going cuckoo was calling on his way out when I was up on the hill yesterday. "The rain must have wetted his whistle", someone said in the village. The first of the autumn gentians and the final member

of the wild orchid tribe, autumn ladies'

tresses, were starting to come out. Alison Ross

world cannot stale Puccini's Lo Boheme, a hymn to love, youth and penury in Paris of the 1830s, the composer's greatest opera, and one of a handful, hors roncours, not be be precombiled, in the operation library. Neither great singing nor inspired conducting, nor a virtuoso production will suffice such a masterpiece, though they can all enhance the Boheme essence which is its lightsome, romantic, elusive atmosphere. Jean-Claude Auvray, the producer of the English National Opera's new Boheme, pinpoints that atmosphere, like an expert lepidopecrist, in the second act outside Cafe Momus. He and his designer Hubert Monloup, have gone back to a contemporary print of the cafe opposite St print of the cafe opposite St Germain l'auxerrois (reproduced on the cover of the programme book) and brought it to life. The crowd is not large, this Christmas Eve, but busy and intent on fun; at curtainrise, and later, the throng freezes into tableaux while a spotlight picks out one salient feature, such as the four Bohemians' welcome to Mimit the device, old-fashioned but Walter Raleigh. A pleasant motion: does it, does anything in Mr Auvray's production, make the drama and its characters more truthful and touching? I suspect not. It is a conventional opera production which throws no new light on the character-relationships.

Valerie Masterson's Mimi is demure, very pretty, nicely but not outstandingly sung. Lorna Haywood, as Musetta, makes a

evocative, is used throughout flambuoyant, not the opera, but carefully, always to telling visual effect. At the end of the first act Mimi and All the repertory routine in the now a wrap for self-fancying Mimi) sprawled on the floor in

pool of light.
The second act, in which the principal characters merge with the crowd, is the most successful and attractively detailed. The episode of Musetta's paining foot is newly motivated but so that the call for new shoes, to be bought by Alcindoro, does not quite ring true. Schaunard has acquired a young lady, but not much is given her to do, and beside Mimi and Musetta he appears decidedly the spare guest at a wedding. There is Musetta's waltz-song.

delivered between a line of devotees who have thrown down their cloaks for their idol's passage, in the manner of Walter Raleigh. A pleasant notion: does it, does anything

championship of Bartok, has maintained a steady practical

concern about the performance

of modern music: the older in Edinburgh he admitted that he could only continue to play

the Beethoven and Brahms con-certos with fresh appreciation

because he is constantly study-ing and performing music of our time. For his own violin he

modern music: the other day

charming young antipole for Mimi. David Rendali's Rudolph conveys a soul filled with poetry in a body unable to cope with crisis: When life Rudolph walk away, leaving a poetry in a body unable to plaster cast of the Venus de cope with crisis: When life Milo, its white covering (the looks black he collapses on to Bohemians' rablectorh, and just his bed and hunches his knees, as if returning to the womb. He is unromantically podgy, somewhat small though pleasing of voice. Christian du Plessis not encouraged to bring Marcel out of self-alienating brown studies. I liked David Marsh's forthcoming bearded Schaunard, even more than John Tomlinson's ripe-voiced Colline.

> The Bohemians' attic is drab and dank, with an upper level for Marcel, the whole turned round for the fourth act. The Barriere d'enfer has a substanrial scaffolding outside the tavern, no snow but dreary rain, and a serrated sky which too ciosery resembles a turbulent sea. Mr Autray's production aims at truthfulness, but one misses convincing, idiosyncratic dramatis personae. There are pretty touches, such as the sur reputious eating and drinking during Schaunard's homily on the subject. Charles Mackerras conducted with constant care for pace and sonority and musical pointfulness. There were musical pleasures in this preformance if as yet no special

Menuhin's premiere

RPO/Groves Usher Hall

William Mann

The last of this year's orchestral visitors to the Edinburgh Festival is our own Royal Philharmonic who have brought two of their principal conductors with them, Sir Charles Groves as well as Antal Dorati. Sir Charles was in charge of Thursday night's concert which included the first performance of a new violin concerto commissioned by its soloist Yehudi Menuhin, as well as Roussel's delectable Third Serves

delectable Third Symphony and Walton's greatly inventive Hindemith Variations. Eminent virtuoso executant musicians do not nowadays compose their own music, as Spohr and Paganini and Liszt did (not to mention Mozart and Beethoven). When they do evince some interest in contemporary music, they often choose timidly among established or academic composers, and the results benefit nobody in the long run. Menuhin, since the 1940s

the wild card in an orthodox pack. Christina gets her country through the 30 years war, dwarfing everyone else around her from the sycophantic Déscartes to her bereaved Descartes to her bereaved mother who sentimentally treasures the king's member in a casket and is alway grumbling about her pension. is always

However, the atuhor of Dusa. Fish, Stas and Vi is not one to leave things there; and she persues Christina's sexual odyssey to France and Italy in an action spanning almost 60 year. Political history features only where it casts light on her quest for identity and the play does not leave you much wiser about Christina's interest in the Catholic enlightenment nor her interests in the crowns of Naples and Poland.

What it does is to put her liberation to the test. She meets her first rock in the shape of two bigoted Erench feminists who have declared war on man.
"Where are your blue stockings?" asks the jorial queen, whipping up their skirts. The joke does not go down well.

The Neapolitan adventure reaches its climax with the unexit in hunting costume, is one of the big moments of Penny Cheru's production.

Up to that moment the play sticks simply to showing her as masking of a traitor, her lover Monaldescho, whom Christina and two of her men stab to death. For her, this is the ultimate masculine gesture, but its

It is perhaps, for the theatre,

company of 30 actors the range

of romantic emotions from

comedy to murderous jealousy.

night, no more stimulating

speaker has ever appeared in this admirable series.

All three programmes have, f course, been hand-picked.

Last night's Promenaders appeared particularly grateful for the chance of hearing Ravel's Daphneis et Chloë complete,

which is to say not the orches-tral suites but the whole ballet

as originally written, with voices too. Just for the intro-duction to the second part alone

Entanglements matter to

effect is to throw her back on her own nature, first into a deathly sickness from which she is saved in an extraordinary mute scene where a child feeds her with sweets. That is the end of her masculinity, she cannot fight, she only regrets the children she has not had. The end connects sadly with the be-ginning and wil raise no cheers from the liberationists.

However, the play itself is a most masculine performance, if I can use that word to imply energy, fair-mindedness and bold construction.

The stereotypes of the first act change so highly detailed minor characters in the second, incisively sketched in by a quickchange company including Char-lotte Cornwell, Barrie Rutter, and Nigel Terry. But there is never any rival to Miss Allen's magnificent performance; an irreplacable piece of casting

combining sheer physical power with a bisexual quality which resolves every discord in the part. I can think of no other actress capable of playing a court masque, a murder, a seduction, with her variety and generosity of emotion. And who would leave you quite so convinced that Christina is And worth attention not as a queen but as a member of the human

Memorable production of Coward permits him to focus a play's in passion plays where the partaction on a single table where a couple are drinking or argu-

ners of either sex, are interchangeable, or they serve the rich, carrying endless cockrails or playing piano while the final idylic moments of disillusion are haunted by Berlin, that other European capital where romanticism and passion are being marshalled to war.

a couple are drinking or arguing while a world of social
events swirls visibly in the
background. The word I would
use for his design is ravishing,
the same word that would have
described his last production.
Chinchilla. Robert David Macdonald's play about Diaghilev. Presumably, Mr Prowse In both plays he captured a words into Coward's play, but the Nazis are only a visible comment which adds depth to moody sensuality, but also loaded the eroticism with criticism. Coward's play is so crowded with assignations and Coward's bitter La Ronde. revolving relationships that it promises, whether sometimes seems to be an married, lesbian or homosexual are as shallow as a piece based on impossible ideals. Mr Prowse will allow no illusion of a perm-Hellzapoppin of sexual intrigue. the last spasm of romanticism and Mr Prowse draws from a anent happiness to escape.

The performances, while occasionally lacking that dry tone which would make Coward's exchanges frantically Coward's characters and the word "love" is bandied with desperation. Relationships are never allowed to remain trivial, or successful. The people are either the idle rich, involved coward's exchanges frantically comic, are so elegantly diverse that it would be invidious to single out particular actors. They have served Mr Prowse'as well as he has served Coward. It is a memorable production.

curious how clinical he seemed in the Prelude from *Tristan* and *Isolda*. But Jessye Norman melted him in the Liebestod. She cherished every innuendo in the text as well as offering a lovely flow of melody.

If balance went against the singer in the climax, it could scarcely have been more fastidiously weighed in Berg's Der Wein, where in all three songs there was constant delight in delicacy nuance as well as gen-erosity of tone and phrasing at high spots. Here in in Webern's Passacaglia Op 1, added to the duction to the second part alone
Mr Bouler's insistence on the
full hour's worth on the concert
platform justified itself. The
BBC Singers and Choral Society
were marvelously malleable
here. The orchestra playing was
no less ravishing throughout.
Since Mr Boulez so completely succumbed to the
sensuous in Ravel, it was programme as introductory bonus, Mr Boulez again released a wealth of romance (despite each composer's self-imposed disciplines) that he denied Wagner in that Tristan

dodge, stuat.

and even the Navy itself.

Rum Bum and Concertina

By George Melly

(Weidenfeld & Nicolson, £4.95) This is not an important book like Mr Melly's Revolt into Style. This is another volume cheeky autobiography, and it doesn't add much, though it does add something, to the library of the sea, alcohol, public schools, homosexuality, or popular music. But it is a very witty read. A boisterous entertainment. An advertisement for life-and yet George's vulgarity is fit for most drawing rooms, not just these days but any day. There's no malice in him but gossip. He's in the Defoe and Carry-On tradition. He's a cad. He's not serious.

I read it laughing into a handkerchief on the back seat of a bus the day after Elvis Presley died. It made me think how sad is today's life of a superstar. Why is it that the open society of the 1970s seems so mean, grubby and greedy in practice—dronelike compared with Mr Melly's butterfly days? In the conscripted Navy, in the age of austerity and rationing at the end of the Second World War, there was so much generosity and openness.

This book pre-dates Mr Melly's first published volume of autobiography ourning Up, which dealt with the 1950s when George was a raving chauvinist heterosexual singer in the Mick Mulligan band. Wine women and plenty of song. Run, Bun and Concerting is earlier when a younger Melly was a raving chauvinist homosexual teenager. From Stowe he left to enter the Navy, a posh-ignorant child, emo-tionally left-wing but a prig who couldn't rank above able-seaman and didn't mind because he was in love with working

class boys. A pity I thought there's no philosophy in Rum, Bum and Concertina. Not much concertina either but plenty of the other. Mr Melly's faggish days, and nights, were outrageous and, as he admits, on an emotional level as flat as Norfolk. George was a tart in the Navy. Seeing action mainly at HMS Butlins Camp Skegness and Pwliheli. petty officers. Letting the rest of the crew goad him into acts of outrage. On HMS Dido he of outrage. On HMS Dido he was protected by a heterosexual Leicester yob whose Clockwork Orange remperament is charmingly described. The yob called all nasty things "mongolian" and all nice objects "baronial". Melly Major was

baronial. When King George reviewed the Home Fleet on the Clyde, he attended a variety concert and one of the acts booked was young Melly to sing "Frankie and Johnny"—what a dish to set before a king.

Unfortunately, Melly was, at Jean Bernard Pommier

Wigmore Hall

Max Harrison

Replacing Hephzibah Menuhin at short notice, Jean-Bernard Pommier played two works each by Schumanu and Beerhoven on Saturday evening. The two Beethoven items were com-posed two years apart, while two decades separated the final versions of Schumann's pieces. Despite having different opus numbers, the Beethoven sonatas he chose are a pair, being dedicated respectively to a Count and Countess you

Browne: Mr Pommier wisely played the later score first. His account of the first move-ment of The Sonata Op 22 was vigorous, even aggressive, and as such quite exhibitating; but the Adagio, where deeper per-

ceptions are required, was somewhat pedestrian. The Minuet was neatly rurned, yet its Trio was so vehement and heavy as to be out of proportion. There was a similar lack of balance in the finale, where the main tune's various appearances all had a certain grace, but were separated by several ungainly episodes.
The Countess's sonata, Op 10

Pommier inflected the opening Allegro's themes with consider

understanding. A certain brashness became apparent as music gathered intensity but perhaps the young Reet hoven bimself might not have disapproved of that. The central movement, an Allegrento, is more suave, and this was played with considerable feeling, as was the Perpetuum Mobile

finale. Despite this, Mr Pommier seemed able to identify more closely with Schumann, and proved himself to have all the dexterity—and, more surpris-ingly, the lightness—demanded by the Abegg Variations Op 1. This has a rather colemnly poetic theme, out of which are conjured all manner of glittering, cascading episodes, and Mr Pommier's interpretation was most enjoyable in its dash and

colour.
Schumann's Kreisleriana Op 16 is a far more arduous task not only because of its technical difficulties, but because it so closely juxtaposes such varied facets of musical expression. Few planists can do justice to the class of the parties. to them all, and Mr Pommier was most effective in the slower movements, such as No 2, which, like the middle section of No 3, showed him to possess more subtle senses of phrase No 2, is an earlier yet more and colour than his Beethoven interesting affair, and Mr playing led one to expect.

Germany must stand up to these sick gangsters

As a six-year-old, soon to flee with his parents from Hitler's Reich, I first met urban terror in the streets of Berlin. Jackbooted SS men, smashing up Jewish shops, then burning down the synagogues. With demonic (rather than Germanic) logic the killing followed.

The historians are merely left with statistical discrepancies: were four or five or six million gassed? If the Jews really were the source of all evil, was it not virtuous to kill them? The Nazis had their ideals, and they are far from dead in the Lewisham in which I now live. Who today would claim that

Germans have a monopoly on the sick kind of idealism that is both fanatical and murderous? It is only in the realm of effi-ciency—even the efficiency of terror—that the Germans may still have the edge still have the edge.

There may appear to be no direct line from Adolf Hitler to Andreas Baader. Were it possible to merge today with yesterday, the two would unhesitatingly gun each other down. Their left and right wing labels, however, are less relevant to understanding them than their messianic dreams. The real link is a deeply romantic idealism that will stop at nothing to prove itself. The ideal is more important even than success. Such irrational their deep hatred. Their idealism nearly always envis dreams, admittedly, are not like idealism nearly always envis-ages some kind of "new and better humanity". Before that ideal is buried with its pro-ponents 40 or 40,000 or 40.000,000 may have to die.

With Hitler it was 40,000,000. With the Baader-Meinhof gang it is not yet and, I hope, will not reach 40. Two years ago I talked to its leaders in their prison cells, urging them to end their first prolonged hunger strike which had then cost one of them his life. Are they mad, or totally evil; are they potential political leaders? In their own eves they are an avant-garde army, fired with a kind of religious fervour. Crusaders, who will one day be recognized

as true visionaries.

The enemy of mankind in this hattle is bourgeois society.
The heroes are the dispossessed of the world, not now in Germany but in Latin America and other far-off places. Their theory, avidly studied but little understood, comes from Marx and Lenin. But not their desperado terror which is a product of their own idealistic mythology, their deep-seated hatred of our kind of society and their desperate need to live dangerously and spectacu-

larly.

Their perverted idealistic passion is like Hitler's. So is

Their its considerable brain-power. Hitler's, but a lot more humane. Yet when the only road to their "new Jerusalem" is through mangled limbs and pools of blood the dream is turned into a delirious nightmare. "Let me say, at the risk of seeming ridiculous", said Che Guevara. that the true revolutionary is by great feelings of The Baader-Meinhof terrorists are not in that

league. Politically more impor-tant is the fact that they are not revolutionaries at all.

They have no relation to power. They have never scriously sought to capture it. They have no relationship either to any significant sociological grouping. They are deeply dis-affected middle class drop-outs who loathe their own background. They have nothing in common with workers, least of all workers on the political left. Their only allies are a relatively small group of rootless, disaffected and unhappy intellectuals who wish they themselves had the nerve to quit their villes and limousines and join this wildly romantic personal controllers and part of the production of the second controllers and part of the production of the second controllers and part of the second controllers and the second controllers are the second controllers and the second controllers and the second controllers are the second controllers and the second controllers and the second controllers are the pseudo-revolutionary band. Fome of their lawyers answer to that description. One or two have actually "joined the army" and provided some of

At some point in his struggle to assert his personality, Hitler recognized that his dream could become the dream of millions. All his energy went into per-suading them that he was their saviour. He succeeded. As a brilliant young journalist Ulrike Meinhof, fired with ideals of social justice (as Karl Marx had been a century before) did try to convert people and society. But all the injustices remained. She failed. She came to hate her own pseudo-success and prosperity. In a "fransis-can" gesture she left all; fame, popularity, family, wealth... and soon was submerged in a

dead end. . Her suicide was a logical consequence of a search for meaning that ended in total despair. Gudrun Ensslin, 100, almost certainly set out on the path to terror because her puritanical Christian ideals had been frustrated by a selfish

community of violence and bate. That too lead to a socially

all the best intentions in the world, the indignant enemies of permissiveness (who are often right in what they condemn) are also often perilously close to the fascist mentality. If the Baader-Meinhof phe-

nomenon is a form of social paranoia rather than a serious paranoia rather than a serious political movement, it should be treated as such. Pathological criminals, though politically motivated and self-styled soldiers, should be vigorously pursued by all legitimate police methods and when captured, dealt with by the courts firmly, rapidly and in contrast to their court streaters are streatered. Immension For complex reasons, often

not discreditable, the German political and indicial authorities have largely failed to do this. The "Red Army Group", never within the remotest reach of political power, has actually been allowed to acquire a special kind of power over the whole West German over the whole West German scene. The authorities, by giving them such special treatment, aided by the sensation loving media, have largely created that situation. Whatever is said to the contrary, they have been treated as if and greed-oriented society. She is a parson's daughter. It was her despairing mother who said to me: "If only we had not brought Gudrun up with such strict standards."

The road from unbending morality to demonic immorality is shorter than many people sentence. The authorities, by giving them such special treatment, aided by the sensation loving media, have largely created that situation. Whatever is said to the contrary, they have been treated as if they were dangerous political enemies rather than sick, missis shorter than many people

push the government into en-acting special laws to deal with them, by making it possible for them to fight collective for them to light collective battles, even from within the prison system, by considerably reducing the civil liberties of all citizens, the state has allowed them to push it a little nearer to being the repressive system they believe it to be. That is a sad victory.

For the German political left it is a tragedy. And for Ger-man liberalism. The effect of the terror is to strengthen substantially every reactionary tendency in German society. The Bonder-Meinhof hard-core are, I believe, so totally isolated by now from social reality, so Weltfreind, that I doubt if they even recognize the paradoxical degree of their own success.

They probably hate the whole social system so much that they could not care less whether could not care less whether Helmut Schmidt or Franz Josef Strauss rule Germany. Every dead policenan, soldier, indus-trialist, politican, banker is a symbol to them, a "sacrament" in blood, pointing to the millennium they themselves do not of criminal melodrama, not of history.

gangsters.

German and to western society
By allowing their tactics to as a whole is whether such threats to law and order can be faced calmly and self-critically, rather than with fear and

Must the whole government machine in Bonn and in the Lünder rise to the bait of these isolated, though efficient, ter-rorists? Must Chancellor Schmidt negotiate with mur-derers and kidnappers? Nothing is unjustified if even one life is saved. But something, some-where has gone badly wrong when a nation allows itself to he held to ransom by a group of desperados.

My sympathies are firmly ith the politicians in Bonn have convincingly broken Germany's authoritarian past. May they stand up both to the terrorists and to a frightened and increasingly re-

ctionary public. Ultimately the roots of aliena tion in modern society, be it capitalist or socialist, will not be eradicated by police with automatic weapons and computers. They lie deeper in us

The long, mercurial career of 'Mercurio

Today the Chilean newspaper El Meccolo celebrates the 150th anniversary of its first issue. It is not quite the oldest surviving newspaper in the Spanish language (the Diario de Barcelona first appeared in 1792), but it is far and away the most venerable in Latin America, and the undisputed patriarch of the Chilean press. The Chilean post office has issued a special stamp to mark the occasion, and this seems no less than fair. For El Mercurio is rather like The Times, not only in the measured language of its weighty editorials, but also in the acknowledged place it holds as an endearing 150th anniversary of its first it holds as an enderring national institution.

It was founded in Valparaiso in September, 1827, and became a daily two years later. Chile had only recently won her independence from Spain, and Valparaiso was just beginning to establish itself as the dominant port on the yest coast of South America a position it retained. America, a position it retained until the 1906 earthquake and the building of the Panama Canal ended the heyday of its prosperity.

El Mercurio was designed to serve the growing commercial interests of the port, and its front page long gave pride of place to the movements of shipping. Its earliest years were marked by a bewildering succession of owners and edi-tors (one of whom, Domingo Faustino Sarmiento, later bebut, at a time when most South American newspapers were very ephemeral, it somehow learnt to survive. In March 1843 a disastrous fire gutted the paper's offices. A few days later a handbill announced its

reappearance with the jubilant cry, El Mercurio lives! That it should have lived so long is a remarkable achievement. A distinctly enterprising spirit has always been part of the Mercurio tradition. In the 1840s and 1850s it began printing not only a special edition for Santiago, the capital, then a day's journey away, but also a formightly "Steamship Mer-

to Weinstockism, that triumph of surplus value over industrial diversity. We could walk a clean road, uncluttered with the garbage of unsuccessful ortho-doxy. I agree with the real Eric Varley when he wrote in the Derbyshire Miner: "The British

I would stop almost all investment abroad. Combined with restrictions on unneces-sary office building, funds would then flow into British industry at rates which would turn many "non-viable" projects into very attractive ones. British capitalism would have to back, rather than back at, Britain, In 1974 Labour promised

"extending public ownership into profitable manufacturing industry . . . to stimulate investment . . . to create employment . . . to combat private monopoly

Then Lord Ryder got NEB, Harold Lever got Finance for ladustry through, and Tony Benn got the sack. The funda-mental and irreversible shift in the balance of power and wealth in favour of working people" had been cancelled and reversed.

We are told that today's lower pound is somehow pre-ferable to yesterday's confetti money, that we are better off when factories are closed and homes are not built. We are assured that our country is healthier when the Health are cold, and when resources go

An Industry Secretary should

Macmillan kind. A socialist Industry Secretary would recognize that the "world" recession is only a capitalist recession, and that the domestic economy will not be revived by butchery discuised as pruning. If I were HM Secretary of State for Industry, I would make the index of induswould make the index of industrial production more important nationally than the FT Index, the Remil Price Index, the Vatical Index, and the Value of Eight Score Draws combined.

A Department of Industry with this objective might break free from the Whitehall faith in Woinstellism that triumph.

Labour movement has always stood for the extension of demo-cracy and a new social order.

a general strike. Add to these frightening events several mutinies, riots and a civil war.

to help nationalized industries diversify". What hopes we had for an expanding Britain that an Industry Secretary could have realized.

into armaments rather than machine tools.

put the options to the people instead of resting on and blam-ing the International Monetary fund. No minister should worry unduly abour speaking the truth. Everyone, with the possible (but unlikely) exception of Margaret Thatcher, knows that we cannot go back to laisser faire capitalism, even of the Margillan kind.

gine Determin

dia es des

curio" (part of it in English) to coincide with the departures of the steamers of the Pacific Steam Navigation Company. An era of further improvements began in 1880, when the paper was bought by Agustin Edwards, the head of a powerful family whose founder settled in Chile in 1807. In 1900 the main edition was transferred to Santiago, where it has remained ever since, although the Valparaiso Mercurio continues as a separate newspaper. Under the Edwards dynasty, in fact, El Mercurio has increasingly become the centre-piece of an expanding empire of newspapers and periodicals without equal in Chile. Its most recent innovation (in 1969) has been a weekly airmail edition, containing a selection of the week's articles and editorials. variations over the years have become legendary. "It knows all the political parties perfectly", suggested a writer in 1847, "because it has belonged

to them all." At times, com-bativeness has brought predict-able consequences. The paper was closed down for a few months at the end of 1858 by the authorization President Manuel Montt, and again in 1891 during the brief civil war dictatorship of President José Manuel Balmaceda. In more recent times, despite one or two memorable lapses, El Mercurio has generally been a staunch pillar of the Right, and a familiar target for the abuse

as well as the criticism of the During the Marxist govern-ment of President Salvador Allende, it was alleged that the paper had received funds from the CIA, though this was and for the Pinochet government has perhaps become slightly less unconditional over the past year or so. In the longer term, no doubt, El Mercurio can be relied on to find ways and means of con-tinuing its own essential tradirion, the tradition summed up in the handbill of 1843: "El Mercurio lives!"

Dr Simon Collier

Eric Moonman

Quebec: the third nation?

land, would like to go it alone. This may or may not be true; certainly the SNP is vociferous enough, but nowhere in Scotland have I encountered the mood of bitterness to be found in this part of Canada or the personal rancour against the *Enzlish speakers ".

The Ouebecois mean business: many I spoke to want to remove every trace of the wealthy Anglo-Saxon Protestant culture (never mind that many of the English-speakers are poor Jews and that there are also a vast number of Irish, Italians, Greeks and Portuguese who are tied to neither France nor English culture). And there are fundamental differences between the Quebecois artitude to separation from Canada and the Scottish nationalist attitude to its relationship with the United King-

Sheer size makes one differcuce: the Province of Quebec covers some 600,000 square miles, equal to the combined areas of the nine north-eastern United States, with ample room to accommodate France and the British Isles as well. It is already a self-contained trading and administrative area, and America as consisting of the

But the real key to the claims of the Quebecois for independence is the language of a people whose ancestors came from France more than three

raised by the independence issue in an interview with Parti Quebecois in its formative Claude Morin, Quebec's Foreign period. Minister. M. Morin was born in Quebec in 1929 and is a former Professor of Political Economics at Laval University, Quebec City. He is considered the City. He is considered the leading policy-maker in the Quebec Government.

thing was to take power. Now constitutional aims. Naturally, that you have done so. I many Parti Quebecois leaders asked M. Morin, "is this still have a strong personal attach-your view, and what is being ment for our vieux pays, but done with the power you have

Strikes, for instance. have been reduced and people are beginning to see a mider purpose to their existence. roose to their existence. of the population Franch-speak-We have been criticized for ing. the economic life of handling of economic Montreal is already French.

published within the past week shows that our long-term investment trends are good. We have given priority to Bill 101 (the French language Bill), because that touches not only on language but on the culture, the dream of Quebec." My second question con-

cerned the Quebec Govern-ment's declared intention to hold a referendum in the province before the end of its four-year term. According to a poll taken just before the Quebec election, only 18 per cent of the electorate favour separation. Since the Levesque Government got only 40 per cent of the popular vote in the election, how far, I asked, could they go on the road towards separatism without a further election, and what would happen if the referendum went against the Parti Quebecois's policy on this

issue ? Morin replied: "We don't talk lightly of separa-tism. But whatever the outcome of the referendum we will accept it. We won't resign though. You have to under-stand that we differ from Eng-lish-speaking Canada and the United States; they encourage a melting-pot of all nationalities and groups. That is an maps already prepared by the important concept for their tourist boards show North society, particularly for the society, particularly for the United States, but it's not ours. a difference, and we have the infrastructure to achieve it."

I then went on to ask about intervention by the French Government. President de Gaulle's shout of "Vive le from France more than the centuries ago and who have Quebec libre from a monute balcony is only the best-known incident. One French political went so far as to movement went so far as to offer financial support to the

period.

M Morin: "I am making no special deals with the French and it is mischievous for anyone to say so. Quebec would certainly look to France as an important ally, but not our most important one. And we "A year ago, at the beginning are certainly not looking for of your election campaign, you any external support, from said that the most important France or anyone else, for our the majority in our party see

achieved?"

"There is no ambiguity in that independent Quebec would our strategy. We may not achieve all that our supporters aim for, but in this first electron we won more than just Language Bill 101, which has received considerable opposition from a large number of tion from a large number of French-speaking business and professional people. The Bill is designed to ensure the supremacy of the French language but, with 80 per cent

Many clauses of the Bill are felt to infringe civil liberties and to constitute a threat to the freedom of non-French speakers (e.g. making French the only language for use in the courts). The restriction of English schools and the teaching of English in French schools is felt to endanger the position of French-speakers position of French-speakers vis-a-vis the rest of North

M Morin claimed there was little choice: "The English language symbolized status and privilege against the French-speaking by the English-speaking. And there will not be discrimination against the English-speaking people already here, only those who emigrate here. Had we not acted, the decline in the French-speaking population would have been total: in 1900 it was 40 per cent of the M Morin claimed there was 1900 it was 40 per cent of the total population of Canada, now it is only 28 per cent."

A senior civil servant also confirmed to me that the Bill would not discriminate against confirm English meakers in the

large firms. would not discriminate against existing English-speakers in the province, but I have the feeling that the Bill has not been adequately thought through. Few English immigrants or Scandinavians will be prepared to select Quebec Province to settle in, despite its great beauty and history, if their children are to be forced to attend is 26 millions. This does not in-clude two million women who Shirley Williams). Including egriculture, less than 91 mildren are to be forced to attend French schools. If they do not want such immigration, this is certainly the way to stop it, but population, are employed in production. And 20 per cent of all their output goes to keep alive the unemployed and their it was clear from my talks that they do, in fact, want immigra-tion. The Bill is plainly unreali-The unemployed, at work. stic, but it is clear that M would produce an extra £10 billions of gross domestic product

accountants

Morin is more rational on this issue than some in his party, Prime Minister Trudeau has recently promised to consider other measures, to advance the cultural aspirations of the French-speaking minorities in predominantly English-speaking provinces, but it is doubtful whether this will be enough to stay the hand of M Levesque

and his Government.
I am unconvinced that the separatist road is the right one Ouebec - indeed, there seem to be positive disadvantages in the province, however large, isolating itself linguistically from the rest of North America. But the suphistication and statesmanship of Levesque and Morin may see it through.
If the Scottish National Party succeeded in attracting such leaders, they would now hold all the Scottish constituencies, and that on their own

ure of successive governments to tackle Scotland's problems. If the Parti Quebecois can electorate, it could win on the reterendum and Quebec will be-come, as the map already shows, the third nation in North America.

What I would do if I were...

Eric Varley

payments deficit since 1066.

parts. And not horse-power fit for the knackers' yard. First, however, I should look

talist). Unused capacity, pushing up overheads, is the main domestic cause of inflation. Killing inflation, too, should be the responsibility of the DOI.

prominence to the detriment of everything economically and socially important. This is the great hypocrisy of our time, comparable with Roy Jenkins' balance of payments. Its target

is the same—cutting real wages. Those who talk most of inflation do least about reducing real costs. If I were Eric Var-ley I would make the whole cost of unemployment (including wasted social capital) a wasted social capital) a occur. No government has yet attempted such a total cost benefit analysis.

The public sector is not moti-ated by socialist principles. Yet it already produces more efficiently than private indusshows, the third nation in North America.

The author is Labour MP for Basildon.

C. Times Newspapers Ltd, 1977.

Trist, nowever, I should fook efficiently than private industrial industry. I should reverse the current pulicy of cutting industrial innot exclusively British, it's capi-

industries, where new muchi-nery can be injected immedi-ately, without fuss, and for the public good.

More nonsense is talked about profits than anything else. Profits do not provide the seed corn of industry; no-one invests because of past or current profits. People may invest in expectation of future profits, but that depends upon their long term assessment. Present rising UK profit levels are dependent upon wages which are depressed by the social contract. There is no reason to believe that this will continue, and with the lack of confidence of our British betters in their own British future, investment will not be putriorically based. Over and above profitability, geographical diversification is the policy of every large multi-national corporation, especially diversification away from a politically volatile country such as the UK. Why, within living memory, a government was brought down by industrial action and we have had

Cracy and a new social order."

Times Newspapers Ltd. 1977. at the University of Sussex.

LEAPMAN IN AMERICA

I was taiking to someone the them banned should they acdother day about Concorde, She, an enthusiastic supporter of Britain's inalienable right to inthousands of innocent New Yorkers, argued that it was nonsense to suggest that the eardrums of the natives would be harmed by the additional noise Concorde would create.

After all, she pointed out, was New York not an outra-geously noisy city in any case? What difference would a few hundred extra decibels make?

While I do not accept the logic of her argument, I could not quarrel with the accuracy of its premise, particularly as she was bellowing down my car to overcome the roar of the air-conditioner in the ice-cold restaurant in which we were scated. Life in New York goes on against a background of constant hum. whine, cletter and shricking.

The subway, the underground railway system, is the worst manifestation of this. The noise der to a stop, would surely volate the noise standards of any British underground station and would be enough to have

dentally find their way Cockfosters or Clapham C (There are a few new car-

riages, which are quieter, but which are fitted with extraneous gongs to presage the closdistorted intercom system on which the announcements of stations to come are generally incomprehensible.

Cars and buses have quiet engines, but traffic noise is still greater than in London because of the state of the roads. The potholes—caused partly by the freeing of the conditioners of edjaceur houses surface during the winter - get worse from year to year. In almost any street, the day's bustle is punctuated or intervals by the clunk of a vibrating chassis as a wireel sinks into a pit sometimes a took deep. Lorries rattle for several seconds, their loads bouncing is several decibels more noisy

Historical parallels are always risky but it is worth remembering what happened after the assassination of Walther Rathenau in 1922. He was an industrialist and politician who became Foreign Minister. Unlike Herr Schleyer he was in favour of industrial self-government with the participation of employees. Unlike Herr Schleyer his enemies were mainly rightthe jubilant wing nationalists. But the up-lives "That roar after he was killed brought in the Law for the Defence of the Republic which was used enterprising largely against the left and been par of played some role in facilitating

trying to save Herr Schleyer's life but also trying to save the liberal assumptions on which the system has rested over not quite. thirty years of existence. The pressure for much more authoritarian measures is growing. These could include stricter police surveillance, fewer rights for defendants, and modifications in the federal structure of the police system, which was intended to guard against the accumulation of power at the centre. After that the scope for normal political dissent and diversity could be further narrowed by a more frightened and intolerant society.

It is easy for outsiders to say that the German public is overreacting, and to point out that the actual number of people killed is still relatively small. This is partly true, but it must be realized that the victims have powerful symbolic status as captains of industry and pillars of society. This is why they have been chosen and it is also why the public is much more disturbed than if they were unknown. The terrorists are striking not just at individuals but deliberately at what they represent. The attacks also undermine the confidence of the whole layer of the establishment from which the victims are

Insecurity is further increased by the knowledge that these terrorists have been born and bred within the society they are now attacking. They are the nice sons and daughters of the nextthe rise of the right.

Although the situation now is nearer home. They come to the very different, Herr Schmidt's door as friends of the family

with their guns concealed by flowers. Attractive and neatly dressed, they push a pram across the road so that four men can be murdered on the spot and another kidnapped. Moreover what they want is nothing less than the destruction of the society which produced them. With such enemies society hardly dares ask whether it is in some way responsible for producing them. The temptation is to try to see the threat as somehow external. The necessary introspection is then avoided.

By a curious apparent coincidence West Germany happens at the moment to be going through a phase of soul-searching as it discovers to what extent its past is still around its neck. It finds its children are ill-informed about Hitler while its neighbours seem to remember him all too well. A new wave of books about the Nazi period coincides with a wave of foreign distrust of Germany sparked off by the escape of Herr Kappler, the war criminal imprisoned in Italy, but probably deriving more from the extent to which Germany is outdistancing its neighbours in economic strength. Most of the criticism comes from the left, which is quick to see dangers from the right where most Germans now see them coming from the left. The result is a feeling of isolation and uncertainty which could scarcely have come at a worse moment. If there is one thing West Germany needs just now it is a little bit of help from its friends. Without this there is a danger that its internal politics could drift gradually away from the central common ground which holds Europe together.

the Pacific Polytechnics have never quite advanced technology raised to university status. In addition, local control was seen as a safe guard of that elusive social responsiveness that polytechnics were supposed to exhibit. Councillors' common sense, it was hoped, would protect the colleges against that academic snobbery which might tend to convert " bowdlerized into them universities ".

Status is an underlying factor in the argument, but efficiency and academic freedom are involved as well. Universities are financed by the University Grants Commission, an independent statutory body which disburses grants and advice as it. sees fit to institutions which are essentially self-governing within the limits that impose. It works well; but then it is small. Polytechnics are in a state of relative subjection. They cannot even start a full-time course without the aproval of the Secretary of State. Local education authorities have a formal share in their management, and no doubt this is in some cases exercised in a petty or overbearing way, even though the original intention was that it should involve the minimum of detailed control Financial responsibility is complicated. Many of the small authorities existing before 1974 could not afford to provide higher education on their own, so a pool was set up, with all education authorities contributing. Those that provide advanced further education have their costs fully met from the pool. This does not encourage efficient control of spending, for an

most of its burden onto its fellows. A national pooling committee exists, but its oversight goes little further than weak protests about staff-student These arrangements are open to criticism on grounds of

extravagant council shrugs off

accountability as well as complexity, and a committee under Mr Gordon Oakes, Minister of State for Education and Science, is to report later this year. There is a case for saying that higher education is a national or regional function rather than a county one. But it is doubtful whether simply severing the local connexion would bring polytechnics many of the benefits that are anticipated. Intrusions by are a less important source of discontent than the present constraints on educational expansion of all kinds, and the inherent uncertainties of polytechnics' intermediate place in the educational system. It is unlikely that the government would be more open-handed towards a Polys' Grants Commission than it is towards councils. The case for retaining as wide a range of educational provision as possible in the hands of the authorities responsible for the greater part of it is a strong one. The town hall is held in low esteem, not wholly deserved, by many of those who work in services which are at once national and local in character. But it remains a valuable safeguard against remote and monolithic national controls, for all its faults.

BLEAK YEARS FOR CHILE

It is now four years since the the intelligence services, known as DINA, which has been behind power from President Allende. The event caused a worldwide stir at the time because of the n Collier hopes that had been placed by many people in the Allende government. Today, although Chile is by no means exceptional among the military regimes of Latin America, it remains a byword for political repression and with good reason. Over the past four years thousands of people have been arrested and tortured as the regime tried to stamp out anything it regarded as Marxist. Many are known to have been killed and many others have disappeared without trace. Efforts to get information about them have run into a blank wall, with the courts reductant, or frightened, to confront the dreaded intelligence services.

There are signs that General Pinocher and other leaders of the regime are concerned about their reputation, particularly since President Carter has placed such emphasis on human rights. But there is still no indication that their latest moves portend more than a superficial change. There was, for instance, the announcement, made with a great deal of fanfare, of the abolition of the notorious directorate of

most of the arrests of the past four years. But since it was immediately replaced by a new organization with a different name, there is room for scepticism about how much will

Another sign was General Pinochet's speech in July, in which he spoke of a return to democracy in Chile and how he thought it should take place. There would, he said, be a series of stages, culminating in the setting up of a legislature in 1984 or 1985, which would be partly elected and partly appointed by the President. This, like the abolition of DINA, has been heralded by the Carter Administration as a big step forward. But the legislature is still some years off and General Pinochet has made it clear on many occasions that he regards the political parties, including the Christian Democrats, as having been responsible for Chile's movement towards a Marxist

system. At the moment, there is a surface calm in Chile, largely the result of the repression of the past few years. Inflation is down from the enormously high levels it reached under President Allende and in the aftermath of the coup d'etat, and even unemployment has been reduced. But the political parties have been abolished, the trade unions are unable to act freely and there are tight clamps on what may be printed in the newspapers or in books. Chileans know that they have to keep in line. It is a tragic situation for a

country which once prided itself

on its democratic traditions and in which the armed forces, ironically, had the reputation for being apolitical. These four years have shown a polarization in Chilean life, as if there were only two possible models-the Popular Unity government of President Allende, and the military government of General Pinochet. The Christian Democrats, once the largest party in Chile, had hoped to provide a middle way between them. In fact, they hoped that after a decent interval the armed forces would hand over the reins of government to them. But the military soon showed that their own views were much closer to the small groups on the extreme right and they have now broken. with the Christian Democrats entirely. Unless there is a significant change, this means that Chile faces a prolonged period of military rule—and one in which its opponents are deprived of any legal way of expressing their views.

societies are in very large measure people who have no comprehension

Falmouth, Cornwall

LETTERS TO THE EDITOR

Defining economic terms

Sir, With "reflation" appearing that economy is extremely likely again a couple of times on the front to experience inflation as it is page of yesterday's edition of The generally understood—a rise in the page of yesterday's edition of The Times, Lady Wootton's pertinent question about the meening of the term in her letter of a few days earlier, deserves a plain enswer. In the present circumstances "reflation" does and can mean only one thing which those who call for it do not date to describe by its proper name, viz, accelerating the inflation.

Yours faithfully, F. A. HAYEK, Obergurgi, Tyrol Austria. September 6.

From Mr David Kinnersley Sir, In your memorandum published today (September 7) "inflation" means increasing money supply and prices are rising, but "deflation" means a reducing money supply or prices are falling.

Presumably in a memorandum on style, this difference is intentional and significant. Do you mean that prices and money supply are independent variables downwards but not upwards? If so, why? If not, what is the point of the difference between or and end? Yours faithfully.

DAVID KINNERSLEY, 28 Stanley Hill Avenue, Amersham, Buckinghamshire. September 7.

"Beth "and" and "or" stand for the ingical but inclegant "and or ". An increase or decrease in prices follows an increase or decrease in money supply after a time lag.— W. R.M.

From Mr Bryan Holmes Sir. While agreeing with the impli-cation in "A memorandum on style" (W. R.M.). September 7) namely that words used in economic discussion should be given precise meaning. I beg to differ with his proposed definition. ("Inflation means that the supply of money is being increased...") If the word is to be confined to one particular meaning, that meaning must be

meaning, that meaning must be objective and descriptive only. As your letters column has shown for a long time, there is a great debate concerning the causes of inflation and your contributor's definition is based on one possible cause. Only one example needs to be given to show that inflation may not be the direct result of changes in money supply. If the goods and resources in an economy are suddenly reduced (say, through natural disaster or military conflict) while

From Professor F. A. Hayek, FBA the supply of money is unchanged, general price level. Yours faithfully,

DRYAN HOLMES. 34 Saxton Avenue. Heanor, Derbyshire. September 7.

From Lord McCarthy

Sir, WRM's note (September 7) indicates that he had not read sufficiently widely in the subject and has confused definition with ausation. The term "inflation" refers to an upward movement of the price level. The assumption that this depends on a prior movement in the rate of increase in the money supply in problematic and a subject inconclusive empirical researh. To include problematic assumption in a definition makes it impossible to test the validity of the assumption. Indeed, in the way it is used by WRM the term "inflation" be-comes a restatement of an incomplete version of the monetary theory. For even crude monetarists will allow that price movements depend on factors other than the rate of increase in the money supply -- for example, velocity of circulation and the rate of inrease in the

Furthermore, the phrase "reflation" refers to attempts on the part of the Government to raise the general level of economic activity. This is a complex process and can be assisted by measures which have little or nothing to do with the money supply—for example, reductions in the rate of taxation which shift the consumption function. Once again, the attempt to read into definition, problematic and doubtful assumptions does not help to clarify the doubt. Even Malthus knew better than this. Yours faithfully. McCARTHY,

Nuffield College, Oxford. September 7.

From Lord Douglas of Barloch Sir, "A memorandum on style". Your modestly titled suggestions to your staff might well have been entitled "A guide to clear thinking on inflation". As such they deserve to be send in all your they deserve be read in all newspaper offices. in government offices and by all who are concerned in economic policy. No rational course of action can be planned except on the case of clear and coherent thinking. Yours sincerely,

Mr F. H. Miller, sums it up by

saying "never argue with a man who knows" and goes on to propose that "since we cannot argue" the only course is to ban the marches of "Alf Garnett's political

party"!

Aims of National Front From Mr John Tyndall

Sir, There are a few points that I would like to make arising out of your published version of an interview with me last week and some readers' letters that followed.

"I am described as favouring in the interview, a "state-controlled economy", with the implication that this amounts to socialism. In favour a m ct we enterprise economy, with higher profits after tax, greater work incentives and more bracing competition than have been allowed under the last few Tory governments.

We say, however, that this economy should be subject to some state regulation where the national interest requires; we reject the laisser-faire, free trading, free-forall of contemporary international capitalism which allows thousands of British workers to be put out of their jobs in order to preserve the right of an entrepreneur to transfer his capital from Britain to Hongkong or Singapore, where he may employ cheap labour to produce goods to dump on the British market -at the expense of more British jobs. There is a difference.

In another section it is stated that we wish to take Britain out of Naro. What in fact we seek is reforms in Nato which would make Eritish forces independent of foreign command and Britain self-contained in all necessary modern weapon production and supply. We would only withdraw if such reforms could not be negotiated within. In this event, however, we would still recognize the need for the closest possible coordination of Western defences consistent with the principle of national sovereignty.

A Mrs Fearne, in her letter of September 1, suggests that we are evasive about letting people see our membership rules. This is not so and I have arranged for her to be sent copies of those rules care of your office. Her other points have been competently answered by Mr E. Pendrous in his letter of September

Mr Gardner, on September 2, suggests that the liberalism that maintain has sapped Britain's strength over the past 100 years has in fact been a part of our national fabric since Chaucer, and he cites Shakespeare as speaking of his England as being renowned for "Christian service and true chivalry". Not everyone, Mr Gardner, accepts your implication that political liberalism and Christian service and chivalry are necessarily synonymous. As for "tolerance" is this an absolute virtue in itself or does it depend on, what we are being asked to tolerate? I suggest that tolerance of subversion, treason and moral depravity are not what make a people civilized.

In most of the remainder of the correspondence the overwhelming impression is one of time-worn cliches and irrelevant side-tracking being used as substitutes for serious argument. One correspondent, a

misery, civil disorder, not to men-tion bloody violence, on a scale unprecedented in modern British History. Any Government engaged in such democratic activities would require the solid backing of the armed forces to maintain "Law and Order", and the police intelligence

services to root out and deal with

whose counter activities might

hinder these democratic policies. As a result the personal freedom of ordinary men and women would be severely curtailed and a dictator-ship (of the "proletariat") would take over as seen in Nazi Germany and Soviet Russia. No Mr Pendrous, the National Front is not, nor can ever be democratic.

Of course there exist problems but they are exceedingly complex and cover a wide range of human needs and desires. They require careful handling by people whose expertise and experience extend beyond the mindless clamour for bestiality in the name of democracy. remain your obedient servant, C. I. GIBSON,

1 Chester Terrace, Barbican Road. Barnstaple, Devon. September 6.

Journalists' closed shop

From Mr Peter Edwards Sir. Michael Conway's well reasoned letter (August 31), regarding news-paper freedom and the closed shop falls down because, on his own admission, he fails to see the difference between the National Union of Journalists compared with the Law Society and British Medical

Grunwick and the Scarman report

From Sir Keith Joseph, MP for 5), the upholding of the law in all Leeds, North East (Conservative) its dour rectitude. Sir, I welcome Mr Steel's recogni-tion (September 9) of the right not to join a union. But how can he then support the Scarman recommendation that the apparent wishes

of the workers not to belong to a union should be overridden? Both the Scarman Report and Mr Steel seem to me to be under-mining the very basis of law by implying that by standing on their rights the law abiding are semehow responsible for the violence of the

law breakers.
Certainly I feared from the start that a court of inquiry might devalue the rights of employer and workers. I had hoped that this would not occur. I now see that I should have expressed my mis-

Mr Steel tries to drive a wedge between Mr Prior and me. We both want an end to the dispute. We both want to protect the rights of all concerned. Mr Prior in his support for mediation was not. I'm sure, meaning that an employer should mediate away the workers' rights to decide whether or not they wish to be represented by a union.

Mr Steel himself rushed to defend

union bullying by blackguarding me. He now suggests that the employer—not the union, nor the union and the employer, but only the employer—acted unreasonably. But what is unreasonable? The Scarman report, which has no legal force, and Mr Steel unite in seeming to define as unreasonable a refusal to accept union dictation. In fact the Scarman report, supported by Mr Steel recommend. ported by Mr Steel, recommends that the employer and the workers—the victims of illegality, violence and intimidation—should not only comply with the law but with the will of the law breakers. KEITH JOSEPH, House of Commons.

From Mr P. B. Matthews Sir, May I express my support for Mr David Steel's sensible clarification of the Grunwick issue (September 9), which pinpoints the matter as the reasonableness or otherwise of enforcing what everyone admits to be Grunwick's legal rights and not, as Sir Keith Joseph would have us believe (September

its dour rectitude.

Does Sir Keith Joseph really believe that a man with a legal right should always exercise it, that it should be pursued to the bitter end, that the law must at all times and in all circumstances be ucheld?

Has Sir Keith never beard of Robin An employer almost invariably has a legal right to sue striking employees for damages at law.
Would Sir Keith advocate the pur-

suit of this legal right in all cases? He has a right to sue if I tread on his hwn (subject to the de minimis role). Would he do so if I, his next door neighbour, walked across it to retrieve my tennis ball? Why is it that a battered wife never sues for damages for assault, even though she has an undoubted right so to do?
Surely Sir Keith must realise that,

perhaps, sometimes, in some fields of human endeavour such as family life, neighbourly acquaintance, and industrial relations, the definitive thud of legal boots may exacerbate a difficult situation where what was demanded was the tactful tiptoe of human understanding.

human understanding.

Thus is reached the question Mr Steel poses and the Scarman report answers: Was it reasonable in all the circumstances for Grunwick to

rely on their legal rights up to the hilt? No, Sir. it was not.

I do not ask Sir Keith Joseph to accept my answer—it is, after all, a value judgment—but I am sure Mr Steel joins with me in wishing Sir Keith would accept the question. Keith would accept the question. Yours faithfully.

PAUL MATTHEWS, 1 Grafton Close, Christchurch,

Dorset September 9.

From Mrs A. N. Sanders Sir, The TUC's righteous indignation towards Grunwick is interesting.

Would APEX and the Strike Committee have abided by a decision if it had gone in Grunwick's farour? Grunwick's favour?

seem to recollect that mass picketing, and more, was called for in anticipation of such a verdict. Yours muly,

Census questions

From Mrs Joanna Clark Sir, I have been considering the proposed census. My family consists of:

Two adopted daughters, who are haif Indian, born in Britain, One adopted son who is totally

Myself, English (by going back to the 1600s, I can list Dutch, Spanish and Swedish along with the English, Welsh, Scottish and Irish ancestors -but I classify myself as English). However, I was born in India, with parents and grandparents also born Inda and various parts of the British Empire.

Are any of us immigrants? And under what shades of colour should we classify ourselves. Yours faithfully. Joanna Clark, 19 Top Park, Kent.

From Mrs Hema Archdale Sir. I have been following the correspondence on the proposed Census experiments with great interest and am at a loss to under-stand why Mr W. Kuo and Mrs N. Williams (September 7) should sound so indignant and offended by Mr S. C. Boxer's suggestion (August

As a Madaysian of Indian descent (British nationality by birth and marriage), non-Jewish and a non-practising Hindu who was educated at a French Catholic Convent, I hope I do not sound conceited—or even treacherous—if I state publicly that I rather enjoy being "black" and do not mind in the least bit which category Mr Boxer cares to place me in. In my 14 years of living in this village where I am

the only black, I have never known anything but love, kindness and true neighbourkiness and I doubt if the "white" people I know would ever grade me an Epsilon or wonder if the colour of my skin was due to a genetic fault!

In my experience, I have found that it is the attitude of mind rather than the colour of one's skin tbat makes or relationships. Yours sincerely.

HEMA ARCHDALE, Qak House, Crowle Green, Worcester. September 7

From Miss Virginia Low Sir, If faced with a question about our race in the next Census. suggest we all write "don't know as some of us did in the last Census when asked about the geographical origins of our forbears. doubt that we would convince those who worry about race with any other answer anyway. VERGINIA LOW, 68 Queen's Head Street, N1. September 7.

From Mr A. J. Turner Sir, It is not the fault of Mrs (Norma) Williams (September 7), that she was born black; it would not be her fault were she classifiably

Epsilon. But that does not affect whether it is true. I beg to remain, Sir your obedient servant. ANDREW TURNER.

Otter Lodge, Clifton-Upon-Dunsmore. near Rugby, Warwickshire, September 8.

Violence on television From Mr G. Campbell-Smith

Sir, Many studies have been made of the effect of television violence on the subsequent violent behaviour of viewers. Without exception (although Dr Belson comes within an ace of it) they fail to measure and explore what the child would be doing and learning if not watching television. They might be playing with friends, quarrelling, learning to make up in order to continue playing and generally learning a bit of self-control and tolerance. Or they might be interacting with their parents and learning about authority which, when internalized, would enable them to have more authority or control of their own feelings and

In other words, the very fact of watching television, whether violent or not, is depriving young people of normal education towards maturity in human relations. Babies normally have very violent feelings which, luckily, have few physical consequences. Adult babies (emo-tionally) having tantrums when their wishes are not immediately gratified produces violence in society. I trace the growth of violence in society to the post-war abdication of parental authority and responsibility, and to the effect of watching television to the extent that children are deprived of emononal education. Yours faithfully,

G. CAMPBELL-SMITH. 20 Fairlawns, Putney Hall, SW15. September 7.

From Mr N. Eriksen Sir, I would like, if I may, to add

my own opinion of Dr Belson's report. It appears to me that Dr Belson went out with a theory already formulated, seeking evidence to support it. He found (probably correctly) that there is a connexion between the amount of violence watched on television by young boys, and the amount of violence practised by them. Dr Belson seems, however, to have mis-understood cause and effect. I believe that it is not a boy's rele-

vision viewing which affects his behaviour, but rather his behaviour (and his natural aggressiveness) which controls which programmes he watches. Furthermore, a slightly violent boy, by watching a programme such as Starsky and Hutch, may work the violence out of his system. I do not believe that we ave bred a generation of morons who can be brainwashed simply by watching a fictional programme on the television. I would like to add that I am 18, watch Storsky and Hutch, but have never be involved in violence of any sort. Yours faithfully, N. ERIKSEN, 59 Westbridge Road, SW11.

September 7.

What to drink with haggis From Sir Herbert Thompson

Sir, Twenty fours years ago at Dunvegan itself the incomparable Dame Flora McLeod of McLeod herself made it clear to me that when the original "auld alliance" -with France-required a new Chieftain to drink in one breath a quantum of claret it was from a vessel which seemed to me to

measure about two quarts. Apart from the danger to life of such a draught of whisky, doubt if even Goliath could have managed haggis whether before or after such a potation. Yours faithfully,

HERBERT THOMPSON. Fair Acre, Haddenbam, Buckinghamshire.

September 8.

Who is responsible? From Mrs B. Shaw

Sir, Re: Your sub-heading in today's The Times (September 8), page 3: "AA box stolen." Could it have been Doctor Who?

Yours faithfully, 54 The Vineyard, Richmond, Surrey. September 8.

Welfare state 'a nursery'

The welfare state was criticized by the Archbishop of York, Dr Blanch, when he spoke to the national seminar of the United Kingdom Federation of Business and Professional Women's Clubs at York University on Sarurday. He said: "I think the view of and Professional Women's Clubs at York University on Saturday. He said: "I think the view of the welfare state is that a perfect person lives in a council house on social security.." He feared the welfare state was a nursery for people to be kept safe in, rather than a net to catch those who fell.

ITELETATION OF SAIC COUNTY OF THE EXTRACT THE WOLLD SAIC COUNTY OF THE WOLLD SAIC COU

One of the most striking affects

of British manipulation of EEC farm policy is that imported butter

costs less here than in shops next to the creameries in the countries of origin. The cause of the gap can be traced back to the refusal of the British Government to devalue the "green pound", the device with which Community farm prices are expressed in sterling. That refusal reduces the cash value of EEC prices to British farmers.

The difference is even more marked in the trish Republic, where milk is delivered to more than half of the households in the country at \$1p a pint. That price is artificially low because each point carries a subsidy of 2p. Bottled milk is cheaper there than in the United Kingdom, while butter is dearer.

In the United Kingdom the sub-

public receive more pence for the plats they sell to creameries because the Dublin Government has held the value of its "green pound" closer to the macket value of sterling than London

The case for a representative Roman Catholic assembly

Not only did the National Conference of Priests, at its annual meeting in Birmingham annual meeting in Birmingham last week, unanimously endorse the proposal for a national pastoral conference which would at last provide the Roman Catholic Church in England and Wales with the representative assembly it lacks, it also offered an illustration of precisely the kind of question such a representative body would be uniquely fitted to deal with.

Room was made on the

priests' agenda for the Arch-bishop of Birmingham, Mgr Dwyer, president of the Bishop's Conference, to come and inform them in detail of the correspondence the bishops have had with Rome over the administration, at services of penance, of general absolution without previous individual

That is a matter the Doctrinal Congregation, the former Holy Office, has been much concerned about, especially since an American bishop, Mgr Carroll T. Dozier, of Memphis, Tennessee, bired a stadium

Marriages

Dr the Hon J. P. H. Hunt and Miss M. Kuhlmanu

and Miss M. Kuhlmanu
The marriage took place yesterday
at St Jacob am Thuru, Salzburg,
Austria, between Dr the Hon
Jonathan Hunt, elder son of Lord
and Lady Hunt of Fawley, of
Cadogan Place, London, SW1, and
Miss Monika Kuhlmann, only
daughter of Dr Herbert Kuhlmann,
of Schloss Urstein, Salzburg, Anstria, and Mrs Evelyn Kuhlmann,
of Eaton Place, London, SW1.
Pfarrer Del Negro officiated.
The bride, who was given in
marriage by her father, wore Austrian national costume and was
attended by Philip Monderla and
Pia Finsterwalder. Dr Murdoch
Laing was best man.
A reception was held at Schloss
Urstein and the howymboon will
be spent in Portugal.

and Miss A. M. Rush

The marriage took place on Saturday at the Church of St John the Divine, Felbridge, Sussex, between Mr Jeremy Syers, only son of Sir Cerli and Lady Syers, of One Grand Avenue, Hove, Sussex, and Miss Alison Margaret Rush, elder daughter of Mr and Mrs David Rush, of Little Warren, East Grinstead, Sussex. The Rev C. R. Boff officiated.

officiated.

The bride, who was given in marriage by her father, was attended by William Morris, Harriet Faulkner and Mrs Paul Caddy, her stster. Mr P. A. Davidson-Smith was best man.

A reception was held at the home of the bride and the boneymoon will be spent in the West Country.

The marriage took place on September 10 between Mr Ian Fleming, of Eyarth House, Ruthin,

and Miss Zara Stewart, of North Green, Kelsale, Suffolk.

The autumn term begins today with 730 boys in combined senior and junior schools. C. B. Farquharson is head monitor and L. I. Gabb captain of football. Carols will be sung in chapel on December 11. The 111th annual Shakespare play on December

Shakespeare play on December 14 to 15 will be Othello. The building development fund has reached £164,000.

Autumn term begins on September 13 and M. E. Jenkin becomes head of school. The college's centenary

for a well publicized service of penance with general absolu-tion.

Rome is afraid that if general absolution is freely available the practice of private, indivi-dual confession will be weak ened. It insists on the simul-taneous fulfilment of three contions before general absolu-tion can be given: that there must be a great number of penitents, that there are not enough confessors available to bear individual confessions properly, and that those attending such a service of penance would otherwise be deprived of

the sacraments for a long time. The English and Welsh bishops, who first began discreetly to introduce the practice in 1975, have found it of great pastoral value. In their experience it has enabled Catholics to be reconciled with the church who otherwise would have remained alienated from it. Nor has that been at the expense of individual contributions. the expense of individual con-fession. In fact, many priests have reported an increase in private confession after general absolution had become avail-

All that, and more, was represented to Rome by the English and Welsh bishops in correspondence which Mgr Dwyer read out to the representatives of the country's 5,000 secular priests.

Later the priests voted by Later the priests voted by a substantial majority to endorse the bishops' handling of the situation. Their resolution congratulated and supported the bishops in their implementation of the option of general absolution. It recurded the priests' feeling that the bishops should continue to use their discretion so that that way of administering the sacrament of penance ing the sacrament of penance was available for use in Eng-land and Wales, "thus avoiding serious pastoral conse-

"one of the most hopeful signs in the church in the past 20 years". In his view the histops were "realizing their position as pastors of England and Wales, as the successors of the

apostles in these countries."

In that way what only a few years ago would have seemed the unlikely event of the president of the Bishops' Conference reading out correspondence with Rome to the assembled representatives of the clergy in the presence of the press, served to strengthen the served to strengthen the bishops authority and make their exercise of it more under-

standable and acceptable. No one was suggesting doing away with the church's long tra-dition of private confession. Nor was anyone attacking the obligation of private confession in cases of serious sin. What they were concerned about was to make that means of recon-ciliation more effective.

quences".

One priest, Father Patrick Murphy, of Chesterfield, found the spectacle of the bishops being willing to use their discretion and to argue with Rome one of the most hopeful sizes. where such services of penance with general absolution were being held, the introduction of the option, in England and Wales, at any rate, has met a long-felt want.

A national pastoral conference, provided, as the priests have said, it is truly representative, will enable the laity's voice to be heard and will thus strengthen the church's ability to work out how best to fulfill its mission in an age when it can no longer rely on the old loyalties that sustained it.

And, as that example suggests, it will enable the church to face calmly, and probably with a surprising degree of unanisativ, questions that only a few years ago would have been regarded as divisive and controversial. To take another example, priests request to the bishops to reconsider

ordination of married men went through almost on the nod. That such a thing was both possible and desirable now settined to be taken more or less for granted. But one question to which nobody knows the answer is how such a proposal would be greeted by the lary. Only a truly representative national pastoral conference can answer that kind of question.

MR KENNETH P. O'DONNELL

OBITUARY

Mr Kenneth P. O'Donnell, a close adviser to President Kennedy and also Kennedy's apointments secretary and pecial assistant at the White fouse, has died at the age of B.

In 1952, O'Donnell left his bb as a paper company salestan to do precinct organization work for Kennedy's sucssful campaign for the Senate senst the Republican Henry bot Lodge. He then returned pour left he new public relations work, but 1957 he moved to Washing as administrative assistant Robert Kennedy, who was a counsel of the Senate or Rackers investigation httee.

ROMAN ZAMBROWSKI

A correspondent writes:

Zambrowski, Roman prominent Polish Communist during the Stalinist era, died in w on August 19 at the age of 68. Born in Warsaw, the son of a Jewish rabbi, he joined the underground Communist Union of Polish Youth in 1925. He was sentenced to three years imprisonment in 1927 but was released in 1929 because of poor health. In 1936 he became a member of the illegal Com-munist Party of Poland (KPP). arrested once more in the spring of 1939 he was sent to Bereza prison but was "liberated" in September by the German

invasion. Zambrowski took refuge in eastern Poland occupied by the Red Army. He know that the KPP had been dissolved in 1938 by the Comintern, but having escaped the mass purge of the former KPP members residing In Russia, he emerged in April 1943 as political commissar of the First Polish Division to follow General Anders's army to the Middle East. When in the summer of 1944 General Berling entered Lublin at the head of the First Polish Army, Zambrowski was his chief political commissar. He was soon coopted by Wladyslaw Gomulka to the Politburo of the Polish Workers' Party (PPR), formed in Warsaw in January 1942 to

replace the dissolved KPP. In December, 1948, Zamfrom the part yin 1949, returned to power—Zambrowski was a member of the "Pulawy" group supporting a measure of "liberation" and attacking the "dogmatist" and antisemetic "Nantolin" group. But in the 1960s he, and a few other "Moscovite" Communists of Jewish extraction, had been criticized by the "Partisans", that is Communists who remained and resisted in Poland under German occupation. In July, 1963, he had to resign from the Polithuro and the Secretariat, being the last Jewish member o fthese key bodies. From 1947 he had been constantly reelected to the Seim (Parliament), but at the parliamentary "elections" of May, 1965, his name disappeared fro mihe list of candidates. He received, however, a sinecure in the form of deputy chairmanship of the Supreme Audit Chamber, presided over by General Mieczyslaw Moczar, head of the former "Partisans".

The Zeszyty Historyczne (Historical Fascicles), a valubla form Polich able free Polish periodical published in Paris, printed in 1976, a richly documented study by Zambrowski in which he revealed that the march of the Red Army on Warsay in 1920 = was ordered by Lenin to trans

British creameries are deter-

mined to go on increasing this country's share of its own butter market. At pretent more than three-quarters of butter sold in the United Kingdom is imported. Yet the country has a small and persistent "mountain" of home-produced butter that traders

persistent "mountain" of nome-produced butter that traders find more advantageous to store under EEC intervention rules than to sell. At the latest count the "mountain" weighed more than 9,000 tonnes, a minute pro-portion of annual consumption.

portion of annual consumption.

"There is no sense, rhyme or reason in Britain selling butter into intervention", Mr McGough said. "Ireland, a net exporter of butter, will have been through the whole of transition without selling one tonne of butter into intervention. Britain is a net importer and yet has sold into intervention."

Transition is the five years

from the start of 1973 in which

the EEC allowed its new members

to adjust their food policy and

knocked £40 a tonne off their price to enlarge their market share ", Mr McGough said. Country Life is the brand sold in Britain on hehalf of creamery organizations that are members of the English Butter Marketing Company. "We were hortified when they did it again in 1977", Mr McGough went on. "We have alleged that it was Covernment financing. We have not been able to prove that."

The Milk Marketing Board, a statutory body that regulates

producers", he said. "I think that where there is a conflict in his tide it should be resolved by relieving him of his responsibility for food. I am speaking about this from the heart. He has cost us a lot of money by fillibustering on Community prices which were not subsequently backdated to when they should have been."

The Irish Republic is proud of

The Irish Republic is proud of its close adherence to the com-

mon agricultural policy. A rural country that relies heavily on

exports of livestock and food,

much of it unprocessed, can

benefit greatly from the gener-

ous farm support machinery of the EEC. It is as expedient for

the republic to support the EEC policy as it is for the United Kingdom to change it.

The Irish food industry is here

The Irish food industry is here that the United Kingdom, having joined the Community, referes to abide by its rules. Mr According was particularly angered by the continued entry to Britain of thousands of tonnes of butter and cheese from New Zealand.

"I think it absolutely unsustainable that New Zealand cheese should be allowed to stay one minute later than midnight on December 31, 1977", he said. That is the date when the written

on December 31, 1977", he said. That is the date when the written EEC agreement about access for New Zealand cheese will expire. Arguments about the said of New Zealand dairy produce in the EEC will be examined in this column next week.

September 11, 1952 Compensation for Jews

From Our Correspondent Tel Arty, Sept. 10.—At a press conference given this evening at the Foreign Ministry it was stated that ratification by the Bundesta. of the compensation agreement signed this morning at Luxembourg would not take place before the end of November. Under Israel law it is not necessary to secure suffication by the Knesser. Cer-

tain provisions of the agreement wal come into force immediately—notably that by which the G_man Feder. Republic will place part of its sterling balances at the disposal of Israel for the purchase of crude oil from British companies. Details of this provision are being withheld, it can be stated, however, that the amount involved is the sterling equivalent of 70m marks to be used immediately and a further 70m marks to be made available for the best "financial" year. Government spokesmen do not hide the fact that they consider the German terms, if not generous, at least much bester than was expected when Israel's original claim was made.

at imposing oil output cut as sanction By Kenneth Owen

If this happens, it is unlikely to be either of the two British

for Overseas Containers, who will operate the British and Commonwealth ship, said over the weekend: "We make no secret of the fact that we are over-tonnaged.

"But it could be worse. Many think the South African economy is at its bottom, and a modest rise is possible over the next year or two. North-bound cargo has grown, and is now running at about the same level as southbound."

The big ships are being delivered in two batches, and Mr Butterwick points out that the critical point will not be reached until about this time

Between now and next June four big ships (including the two British) and three smaller (1300-box; one for Safmarine, two for Lloyd Triestino) will be delivered and will operate an integrated service covering Britain, north Europe, and the Mediterranean to South Africa. Trouble will come with deli-

very of the five remaining big ships between July and December next year. If the three smaller ships could be sold or chartered, the big ones could be diverted to fill part their spare capacity with Mediterranean cargo.

Mr Butterwick believes that once the integrated container service gets under way, the conference lines will win back cargo from the outsiders.

EEC textile limits 'too

y Caroline Atkinson

Economists know too little Correspondent

By Our Industrial prices over the next few years were likely to be geared to general inflation rates.

Their report issued last night affir all to provide useful or accurate forecasts of the economy, as in country according to Professor James public 25 kg Ramsey, an American econo

Ramsey, an American economist.

Professor Ramsey, writing in Professor Ramsey, writing in the latest Hobart* paper published by the Institute of Economic affairs, says that governments base their economic policies on forecasts which have little validity and which therefore mislead the policy makers.

Econometrics (the mathe-Econometrics (the mathematical formulation of theory

which may then be tested by the facts) is too young a science to give answers to many of the questions which governments wast to know, such as how to make the economy grow. Instead of "naive" predictions and hunches, economists should leave the figure to the markets. The professor's arguments are unlikely to deter economy watchers from analysing the batch of statistics to be published this week.

Wholesale and retail price

figures for August are expected to confirm a slowdown in the rate of inflation; retail sales last month and the industrial production index for July will

generous' By Our Industriel

sion for being too generous over forthcoming textile import limitation talks with developing nations. Dr Brian Smith, presi-dent of the British Textile Confederation, said that the Com-mission was offering the developing world the opportunity for communed but more orderly access to the EEC mar-

ket.
"The principle of that approach is right. But despite welcome constraints for sensi-tive products, the proposals offer a total import growth rate of 6 per cent a year. This seems over-generous figure", he

Dr Smith noted that imports from a wide number of develop ing countries had increased in the past few years. The 6 per cent growth rate proposed, he continued, far exceeded the ex-pected low rate of growth in domestic demand.

EEC officials will shortly start talks for new bilateral agreements with about 30 developing countries. Imports from these nations to the Communications bears have the contractions of the countries.

munity have in recent years been growing by about 22 per cent. If the Commission is able to reach satisfactory bilateral agreements with exporting nations, it would pave the way for Europe to support a new Multi Fibre Arrangement negotiated with the Gatt.

impose restrictions on its oil production, according to reports at the weekend from Jeddah. Shaikh Ahmed Zaki Yamani, the Saudi oil minister, was quoted as saying that production would be limited to 8.5 million barrels a day until real progress was made towards a Middle East peace settlement. Saudi Arabia operated a similar limit until last Decem-

similar limit until last December, but abandoned it after a pricing dispute with other members of the Organization of Petroleum Exporting Countries (Opec). The overall ceiling on output for 1977 has been 10 million barrels a day.

The true effect of the announcement is likely to be less than might appear at first sight. Saudi Arabia had already cut its production of light crude oll by about 10 per cent, to a oil by about 10 per cent, to a limit of 7,650,000 barrels a day, according to Petroleum Intelligence Weekly. The reason given for the cut was concern over falls in oilfield reservoir pressure.

Until the weekend aunouncement by Shaikh Yamani this still left a possible 2,350,000

A forecast that the United States, instead of reaching self-sufficiency in oil, would have to import at least 10 million barrels a day, three-fifths of it from the Arab states, by 1985, is con-tained in a study just published by the Organization of Arab Per-

Exporting Countries (Opeć). Japan would also have to import 6 million barrels a day from the Arabs, while the member states of the European Community might decrease their imports of Arab oil slightly from 6.5 million barrels day in 1976 to 6 million in

According to Opec figures. the United States imported 1.6 million barrels a day of Arab oil last year, while Japan imported 2.7 million.

No "disruptive" shortage: The International Trade Commission believes the world supply of crude partyleum "may

of crude petroleum "may righten between now and 1985" but expects no disruptive shortages" (AP-Dow Jones

ITC economists also forecast that any increases in world oil said that if inflation rates

averaged about 5.5 per cent a year between now and 1980, the price for the so-called marker" light crude, at present about \$12.70 a barrel at Saudi Arabian ports, might advance to around \$15 a barrel by 1980 and about \$20 by 1985. Opec nations, particularly Saudi Arabia, would continue to "balance supply with demand in most of the world's petro-leum-consuming nations". The Soviet Union probably would remain self-sufficient in crude

Tokyo 'aware of problems' in

Lucas vote averts Leyland shutdown High praise By R. W. Shakespeare

Lucas toolroom workers' decision to end their 11-week pay strike today, on the basis of a company offer that represents only a marginal improvement on one made at the outset of the dispute, has come just in time to prevent a total shoutdown of British Leyland's car manufacturing.

However, it will be some days before production already stopped by the failure of components supplies can be resumed and 18,000 Leyland workers now laid off can be recalled.

A Leyland management spokesman said yesterday: "From tomorrow morning managements at each of the plants affected will be assessing their own situa-

"But obviously, with so many plants involved and a wide range of electrical components to be restocked, it must be a case of a phased resumption of output. a case of a phased resumption of output, probably over a period of severay days."
Leyland has suffered great production losses over the past few weeks, with models like the Princess, Marina, Maxi, MG, Triumph Spitfire and Triumph Dolomite all halted by components schortages caused by the shundown of 14 Lucas fac-

ories in the Midlands. Lucas itself had to lay of 11,000 other workers.

These losses may well precipiate a new financial crisis for the state-owned motor company. Most of them will not be reflected in Leyland's half-yearly figures which are due to be published on Wednes-

day and which are already—it is widely predicted—poor enough in themselves. Even with the Lucas dispute out of they, Leyland's troubles are far from over. Its Jaguar car plant at Coventry remains at a standstill with 3,00 workers laid off because of component supply problems involving two other compani

At the five bus and truck factories in Lancashire 9,000 Leyland workers began an all-out strike over pay demands at the weekend, although it will not become effective until next Monday because the factories are in any event closed for a holiday this week.

The pay issue at the Lancashire fac-tories is only one aspect of a much wider wages quandary affecting almost all of Leyland's operations. The company wants to rationalize pay

structure and negotiating procedures right across its car plants by setting a rate for the job which will apply in every plant

Commercial Editor

Mullard, the Philips subside

iary and sole British manufac-turer of colour television tubes is being invited to talks aimed at an acceptable deal with Hitachi.

Hitachi is the big Japanese lectronics company which

electronics company which wants to assemble television

sets at a new factory at Washington New Town in the north-east of England. Local in

terests, including a group of MPs, want a government sauction for the factory because it will provide up to 500 jobs.

But the British television in-

dustry, including component makers, fear that further Japanese expansion might eventually cost 6,000 British

jobs. It is wary of Hitachi's claims that it would use 50 per

cent British-sourced com-ponents at Washington and

eventually raise the figure to a

and by giving all pay agreement a common starting date Not only have these plans run into some

shopfloor opposition already but they mean stepping outside both the 12-month rule (the legacy from phase two) and the Government's guidelines for pay increases. Leyland believes that the sort of wage increases which would be necessary to put the plans into operation are justified and that to a large extent they can be "self-financing" through improved productivity; but the company and the unions will have jointly to convince the Government that this is the case.

Ford is due to give its reply this week to the package of demands tabled by union leaders representing workers in its British plants about a month ago. This will be another crucial test for the Covernment's pay strategy.

In spite of union protestations that the claim is "realistic" it adds up—when improved fringe benefits and so on are taken into account—to something like 25 per cent on present going rates in Ford.

If the company offer comes anywhere near to meeting this the pace will be set not only for the rest of the car industry but for much of the engineering industry.

it would go over to the produc-

rion of larger-screen televis s. It has also been pointed out

in the industry that Hitachi need not necessarily continue to use British-sourced com-ponents once it is established

To firy to clarify these diffi-culties Mr Gordon Bagier, Labour MP for Sunderland

South, who is one of the Commons group supporting the Hivachi plan, and bo has been consulting closely with

the Japanese company, plans to meet the Muhard management within the next fortnight.

He said: "Hitachi has been

quite forthcoming about this issue of trust. It makes the

point that it is interested in investment throughout Europe,

and it would not want to be seen as betraying any trust."

would be prepared to have a

written agreement on sourcing

of British components. This

could be a critical factor in the Mullard talks.

talks on Hitachi plan

this job he will have to demonstrate convincingly on Thurs-

day, when cross-examined by members of the Senate's Goveromental Affairs Committee, that all the allegations made against dim are unfounded—that he is an honest man, and that he has the qualifications that are needed to manage the nation's public binaries in Lance faces a difficult task that increasing numbers of

observe4s now say is an impossible one. The views of people who have long known Mr Lance, most particularly the views of people who have been his panking and political rivals, have been given little con-sideration in the United States. But they explain why dent Carrer is so reluctant to lose Mr Lance's same ich siews with several of these

people in recent weeks strongly suggest that Mr Lance is indeed a competent adminis-Those interviewed all believe that Mr Lance has been un-fairly treated and deeply maligned by the torrent of press reports and by state-ments by public officials in Washington. Mr Richard Ket-tel, chairman of the Citizens and Southern Bank of Atlanta and a anking rival of Mr Lance, described him to me as an honest man of "very great integrity." An almost identical comment was made by Governor George Busbee, who waged a tough and bitter capaign against Mr Lance for the gov-ernorship oo Georgia in 1974.

Republicans, who were replaced by Democrats on Mr Lance's Washington staff have the highest admiration for Mr Lance. Some left the budget office only a couple of months ego. One says Mr Lance was most fair and straightforward in dealing with the Republi-cans left on his staff in his first few months in office. He delegated work well, gave the office forceful leadership and demonstrated all the qualities needed to sell the office's

plans to the cabiner. President Carter evidently shares these views; but he has failed so far to convince Congressmen and it looks increasingly probable that the budget office will soon get a new director. A final decision on Mr Lance's status is now exceptionally urgent, as otherwise the whole budget process could become chaotic. much more formidable.

Frank Vogl

Partners look again at | Mullard asked to new £90m steel venture

By Peter Hill Partners in a £90m invest-ment to establish an iron ore direct reduction plant on Type-side are apparently reviewing barrels o-day production of medium and heavy crude oil although the present world oil surplus includes a particularly depressed "heavy crude" the light of the poor state of the steel market.

The scheme, which was under discussion between various private sector steel companies for over three years, received the go-shead from the EEC earlier this year. The European Commi the cost of the venture. It would produce 800,000

tommes a year of iron one briqueres as feedstock forrelec-tric arc seedmaking furnaces as an alternative to scrap metal, which is subject to wide fluctuations in price, according Originally the partners in

employ about 150 people on a 50-acre site at Jarrow Slake.

In brief

Japan to boost spending on public works

Japan might spend as much as £73,11m on next year's budget plan, an icrease of 19.5 per cent over the initial level set for the current fiscal year, according to estimates published in Tokyo.

Presenting the rough demands for future expenditure to the cabinet, Mr Hideo Bo, the Finance Minister, revealed that plans for a vast increase in spending on public works and housing might provide Japan's economy with a sig-nificant boost next year.

Under the initial demands examined by the Cabinet, Treasury investments and loans could be increased to £38,709m, an increase of 51 per cent over the level of the current fiscal

Wimpey gains £6.5m building contracts

George Wimpey has won con-trols totalling £6.5m, the largest being for the construction of 219 houses at Morden in Surrey for the London Borough of Merhousing development and off-shore platforms for an oil com-pany in Trinidad.

Wimpey is also building a 20-storey office block i nSutton. Towco Gratte, the building services engineers, have just been awarded a £2.1m contract for the block's air conditioning and electrical services.

He produced documents, obtained in the United States, which recorded that at a series of IATA meetings held in Geneva during July the airlines moved towards offering a return fare on their scheduled services across the North Arlan-

tic only £10 dearer than Skytrain.
Mr Laker said that if cheap fares on the IATA airlines were possible now why had they not offered them in the past?

The IATA airlines' response was that they had wanted to, but, like Mr Laker, had been held up by the fares fixing machinery of governments on both sides of the Atlantic.

Mr Laker maintained that the IATA airlines bad only promoted their budget and standby rates at £149 return between London and New York after he had forced through, after seven

years of argument, a Skytrain return of £139. Minutes of the IATA meetings also showed, he said, that the big airlines had taken powers to withdraw there new low fares at short notice. Such a move would be taken, he suggested, if the IATA airlines forced him to drop the Skytrain, leaving the public without any cheap fares.

The next move in the battle

£500,000 a year in crew costs and fuel, and make the service more popular with the public. Frank Vogl writes: The Ameri-can Civil Aeronaurics Board can Civil Aeronautics Board decided to give full approval to the proposal by several commercial airlines to start selling standby tickets at \$146 (nearly £84) for the New York to London run and at \$110 from London to New York.

Mr Laker will take some conceletion from the face they the solation from the fact that the board decided that proposals by the arrines to reduce sharply the cost of their Apex (advanced booking) tickets to \$299 return have been rejected.

The next move in the battle between Laker and the big air-lines will come with the announcement by the Civil

Aviation Authority in London, probably this week, of its deci-sion on Laker Airways' applica-

tion to have the London ter-minal for Skytrain moved from

The Board stated that it was willing to approve the proposal by the commercial airlines to introduce their budget scheme only if the airlines increased the fare. The airlines proposed an identical fare to that they intended to offer for standby tickets and, had the board accepted this Skytrain might have been forced out of business.

The budget plan allows pas-sengers to book guaranteed seats in advance, whereas the standby system and Skytrain do not permit seat guarantees.

PRINCIPAL ACTIVITIES:

Through the provision of an appropriate amount

of computing power in the form

of a mini-computer close to the point of use

it is possible to ensure that any

machine is committeed to only a limited range

of functions and the operation of the

central computer is greatly simplified. Although

computing facilities are distributed

throughout the factories and depots they are

subject to central control.

One of the many advantages which have emerged in the 1970s with the application of mini-computers is that it is now possible for rarge organizations to computerize ever more of their activities and provide facilities at outlying depots, factories, and so on, while still retaining a relatively simple and manageable system.

Large, highly centralized systems with remote terminals provided many of the desired facilities, but often at the expense of making the operations of the central computer so complex as to make costeffective management of its capacity difficult. One of the main causes of this difficulty arose from using one machine for a large number of different

However, through the provision of an appropriate amount of computing power in the form of a mini-computer close to the point of use it is possible to ensure that any machine is committed to only a limited range of functions and the operation of the central computer is greatly simplified.

The distinction between the two types of system is between on the one hand having remote terminals through which access is gained to the central com-puter, which does all the computing, and on the other hand actually providing com-puting capacity at the terminal

Apart from removing exces-

sive complexity in the central computer operations, a system which diffuses the computing capacity throughout the organization can probably more readily reconcile the needs of the various parts of an organization with those of the

administrative centre than can a heavily centralized system. One company which has adopted this kind of systemit calls it "distributed intelligence "-is Birds Eye Foods, the Unilever subsidiary with headquarters at Walton-on-Thames. Early in the 1970s Birds Eye began considering its future computing needs as existing equipment approached the time for replacement. The

the consultation structure in

council, usually comprising 10

According to Mr Michael Moriarty, controller for the

southern region: "Each branch team includes not representa-

tives of groups but someone from sales, the order office,

operations, transport and so on, with the main union people and

"All facets of the business

of that branch are there, plus representatives of the people."

They meet every iew weeks to

discuss local problems and situations, and to put forward

items for the quarterly regional

meetings, or to hear reports from them. He calls it "the work's own board meeting."

magnitude of the facility required was indicated in a monograph* by Brian Doouss, adviser to Birds Eye and Garfield Collins of BIS Applied Systems, acted as consultant.

It gave the average number of Birds Eye deliveries as 12,000 a day, a product range involving 750 different packs produced at six factories, distributed to 85,000 customers from 40 depots and run by 21 administrative units. The whole thing is further complicated by the aim of making deliveries within 24 hours of orders being placed and by changes involved in special offers, and so on.

in special offers, and so on.

One important aspect of the solutions adopted by Birds Eye

one important aspect of the store handling costs have been reduced by 7 per cent. It is

is that although computing facilities are distributed through-out the factories and depots they are subject to central con-trol. The system cannot here trol. The system cannot here be described in detail but it is based on an IBM 360/65 com-

puter at the centre, with ICL 2903s in the factories and Nixdorf minis in the depots. At the end of each day in-formation needed for complex analytical purposes, not directly related to the 24-hour delivery service, is transmitted to the central computer from the outlying facilities.

Among the benefits achieved

now possible to make a recal culation of stocks required every night, as against the weekly estimate which used to be made. Mr Doouss says that by diminishing the margin of error this has made it possible to reduce stock by 1,500 tons.

The system provides facili-ties for making out and pricing invoices at the same time as delivery documents, so that payment may be received on the spot for small deliveries, as well as for weekly listing of invoices for the major multiple chains Savings are expected to reach about £800,000 a year during the course of next year when the sales ledger is computer-

One feature of the system is that it minimizes the inconvenience caused by any break-down. Thus there is capacity so that for most kinds of defect it is possible to reprocess fect it is possible to reprocess and catch up by the end of the day. Again, the system has been arranged so that the files from one depot can be removed to, and reprocessed on another depot's computer. Also, the fact that the complex analytical work is done on the central computer means that even if it is out of order it is unlikely directly to affect the day-to-day operational work.

*Distributed Intelligence, published by MCB Monographs, Keighley Road, Bradford.

A structure and climate for better working relations

Publication of the Bullock methods. The basic element of negotiating committee, includ- tion targets. Reasons for deviareport has focused attention on the need for employees to participate in decisions that affect their working lives. However, while Bullock concentrates on employée representation at board level, which is a legal requirement in many other countries, it largely ignores the structure of works councils and other consultation structures that underlie the board representation in most other

An example from a British company, the gases division of British Oxygen, underscores some principles of consultation that will probably become familiar quickly as other concerns explore structures to suit their own needs. The principles are simple:
1 The consultation structure

must be explicit, and visible to consultation—two-way communication—takes a long

time to develop. 3 The process can be hastened if managers learn to listen more than they talk in consultation meetings. 4 Employees should have a major say in preparing the agenda—or changing it on the major say in preparing the a working party to deal with agenda—or changing it on the spot as necessary.

5 The consultation structure people from the departments,

manager Mr Pat chairs the meeting, tradition and by by BOC We believe pasmembers. sionately in this branch council idea", he says firmly.

The meeting bears out his words. A driver makes suggestions for improving sales. Courses for supervisors, ini-tiated at the suggestion of the branch council, are reviewed with satisfaction.

One shop steward says: "Most people feel very ade-quarely trained for their jobs now. We're starting to plan the training for palletization—the safety aspects and how to handle forklift trucks and so on. We'll have certificates when we finish, telling how qualified each person is."

Harry Allen, the most senior representative in the Bristol branch council, con-cludes the meeting: "The in-terest in our work has gone up at this depot. We've had a boss who tells us more. As a result people are more interested in getting new business. A worker must have interest in his job. We appreciate the participa-tion."

Nancy Foy

Are you due a VAT refund?

British companies are losing millions of pounds through failing to claim refunds of value idded tax in the European Community according to Euro-Vat Services, an organization which offers assistance in the recovery of these sums.

According to Euro-Vat it is possible under a little known section of the EEC second directive for companies to recover VAT levied on a num-

ber of their services or supplies. They say that these provisions apply to companies which do not carry on taxable activities in France or other countries of the European Community, and who are engaged in those countries in the hire of stands at trade fairs and exhibitions, advertisements in all media, promotional material, as well as fees and commissions payable to their sales agents.

This tax is included in the price of goods manufactured or marketed by the British com-panies with the result that the goods, which are taxed when imported, are in fact taxed twice, unless the refund is secured, in respect of the portion of the price representing the cost of the services in question

LETTERS TO THE EDITOR

House purchase: your moral and legal rights

From Malcolm H. Moss Sir, Most charges of duplicity and gazumping ("House pur-chanse and an Englishman's bond", Letters, September 2) need to be examined.

If a vendor and a purchaser

agree for the sale and pur-chase of a property subject to contract at a stated price what bargain (whether or not a deposit has been paid) has been rearried at that stage? It is a bargain that whilst each party intends to proceed with the sale, and purchase, he expressly refuses to be obligated to do so until written contracts.

When property is sold by suction, written contracts are normally exchanged between bendor and the highest bidder there and then. That is possible not only because the form of contract has been available for inspection for some weeks prior to the sale, but because intending bidders have had time to make the vital searches in advance of

When property is sold by private treaty it is scarcely ever feasible to exchange contracts there and then. The intending purchaser's solicitors must not only peruse the contract and raise any queries: they must also make the vital searches from local authori-

ties and others. The searches may disclose almost anything from a demolition order to an intended com-pulsory acquisition of the front garden for street widening. Hence nearly all private treaty sales are made in the first in stance subject to contract, and written contracts are not ex-changed until all has been

Since it is of the very essence of a sale, subject to contract, that neither party will be bound until exchange of formal contracts, it is not normally admissible to charge either party with moral turpitude if he re-siles before exchange and thereby exercises a right which

Inflation accounting proposals

From Mr G. Gitter From Mr G. Gitter

Sir, The latest CCA proposals
for an adjustment to reflect
the effect of gearing September 2 would appear to
penalize those companies that
have either moved furthest in
recognizing the effects of inflation by carrying our regular revaluations of assets within the context of the so-called historical cost convention or, in spite of inflation, have main-tained the ability to purchase the most up-to-date assets.

This apparent contradiction spises because the proposed Morpeth/Hyde system, tollowing the recommendations of the London Society of Chartered Accountants, plans to in-corporate within the profit and loss account only that element of the total additional depre-ciation and cost of sales adjust-

ment financed by equity. Yet these two adjustments are obtained merely by taking the aridmetic differences between a precise current cost Ealing Vill Calculation and an imprecise London W.5. calculation and an imprecise historical cost figure.

Insuring a car for European travel

From Mr Roger Bennett

Sir, We have been unable to and other British adustries are find any British motor car inexploring Commenced markets.

Surers who will cover a car while British car insurers sit surers who will cover a car used all year throughout the Common Market, Switzerland and the United Kingdom. Everywhere we are faced with excuses about size and

complications of Continental claims.

There are two other matters which many of the public seem

not to comprehend.

First, when an estate agent, who has sold a property subject to contract, receives a higher bid before contracts have been exchanged, it is his bounder duty to acquaint the vendor of that fact; he has no option: and, if the vendor accepts the higher bid, the agent is utterly Secondly, if the vendors are

executors or trustees (which is often the case) it is their absolute duty to sell at the best price obtainable. If, having sold subject to contract, they receive a higher bid, they are not en-titled to adopt the high moral stance that they are honourably to do so would be a breach of trust and the trustees would be personally accountable for any

If a party to a sale subject to contract resiles, public assessment of his morality seems to depend on whether he is vendor or purchaser. If he is the vendor or purchaser. If he is the vendor (which is pretty rare) then he is, it seems, a dirty dog; but if he be the purchaser (which is commonplace) he is considered blameless.

Every day contracts are sent out to persons who have agreed to purchase subject to contract. following which the vendor learns for the first time that there can be no sale until the purchaser has sold his own house at a favourable price, or has raised a big mortgage : or that the purchaser has since seen and prefers another house. Is it not the plain fact that if, under any normal circumstances, a party to a sale subfect to contract resiles, in exer-cise of a right which is openly

and mutually reserved, he is not in breach of an Englishman's bond? There was no such bond. Yours feithfully, MALCOLM H. MOSS. 48 Outwoods Road, Loughborough, Leicestershire LE11 3LY

Therefore, for any two companies less than wholly financed by equity that are precisely the same in all aspects of gearing and performance and differ only in their "historical. cost " valuations of fixed assets and stocks and in the age of their essets (assuming that ear-lier bought essets cost less in money terms than later bought assets and carry less historical assets and carry less therorical cost depreciation), the amount shown as profit will be higher for the company in the weaker position and it will therefore be tempted to distribute more, which is precisely the problem that CCA set out to remedy.

Surely the Accounting Standards Committee and the Inflation Accounting Steering Group have not got it wrong yet again?
Yours faithfully.

G. GITTER, 55 Ealing Village, September 5

Yours faithfully, ROGER BENNETT,

Director, Lovehayne Farm Limited, Lovehavne, Southleigh, Colyton, Devon EX13 6JA.

Imports and the growth rate of the GDP

From Lord Kaldor, FBA Sir, I have not yet seen the August issue of Economic Trends on which your correspondent, Melvyn Westlake, reports in your issue of September 5, but if his account is enywhere near correct both the civil servants who wrote that special study on The Home and Export Performance of United Kingdom Industries and Mr Westiake who reports on the study (without sporting the error) are guilty of an economic hower which marks how'er which might have cost them dear if they had made

it in a Tripos examination. The fact that the rise in the proportion of exports in the national output overall fully matches the rise in the proportion of imports in home sales overall is an automatic conse-quence of the operation of the "foreign trade multiplier"; and so far from providing a refutation of the case for import controls, it provides the strong-est possible support for it.

For it shows that the Harrod theory really works, and that any rise in the share of imports in total domestic expenditure causes a fall in demand for home output, which in turn leads to a reduction in both consumption and investment in successive steps until a sufficient contraction occurs in the gross domestic product relative to exports to make the spot-taneous rise in the one ratio

be matched by an induced in-crease in the other. Import penetration and export/output ratios have both tisen from 17 to 23 per cent from 1968 to 1975, but at what cost in terms of the cumulative loss in real national income relative to the full employ-ment potential? The authors of the special study should be asked to go back to the drawing board, or rather to their writing desks, and work out the correlation between the rate of change of import penetration and the rate of growth of the GDP. The result, I am sure, will not be nearly as flatment attributed to them accordng to which these changes are just a part of the general move-ment in world trade and the tendency to increasing inner-national specialization.". Yours faithfully,

NICHOLAS KALDOR, La Garde-Freinet,

Pay allowances

From Mr C. S. McIntyre Sir, Pay policies come and go but the payment of "London. allowances " seems destined to remain forever; but why? Presumably, such payments are intended to compensate for the high cost of housing and travel in the south-east of England.
However, listle comparative data exist to show that the ment tigures compare regions rether than towns.

Payment of London all ances is brought further interpretation by the pigment of big town a selection by the pigment of big town a selection believe that the cost of hyld is sometime related to the ship of population in a given town Yours faithfully. C. S. McINTYKE,

Heathercombe ". Birchway,

Merseyside L60 3SX. September 6.

How M4 brought Ford to Bridgend

Detroit, the thriving American industrial centre, and Bridgend, a small bustling market thwn in South Wales, have never had anything in common. But last week workmen erected a notice board on a 185-acre site on the outskirts of the Welsh town and a bilingual announcement cold. it now has a strong tie with the

American city. The message in English and Welsh read: "This site has been reserved for a new factory for the Ford Motor Company". This great shot in the arm for Welsh industry was welcomed by everyone and haifed os a great vote of confidence in Britain and the Welsh wor-

ters. Understandably, the Welsh Understandably, the Welsh Development Agency and Welsh Office officials were bubbling with pride for they had played leading parts in bringing the £180m engine plant to the Waterton Industrial Estate just outside Bridgend.

outside Bridgend.

With it will come 2,500 new jobs not to mention the spin-off that such a project will bring to South Wales where unemployment has been running at 8 per cent. About 12,000 of those out of work are within commuting distance of the new project.

project.

The buildozers are poised to start preparation for the million square feet plant which will produce engines for Ford's new car—code named Erica—in

1980.

For a long time Waterton has been considered one of the choice sites for large-scale development. Until now there has been one major drawback. has been one major drawback— road communication. But the imminent completion of the M4 motorway across South Wales has placed a different com-plexion on the situation. The decision to give priority to this road link is a point that Mr Morris, Secretary of State for Wales, stresses played a viral

Industry in the regions

hour by road from the main South Wales ports. It is just 18 miles from Rhoose airport which South Wales hopes will be developed as the principal airport for south-western Britain when the Government's

Britain when the Government's White Paper on future regional airport strategy is announced in a month.

Bridgend is on the new high-speed train route from London to South Wales, has a large workforce, ample housing and Ford has placed importance on the majorithm of months and its proximity to university and technical colleges.

Industrial estates have sprung up within an eight-mile radius to provide accommodation for scores of light industrial concerns and to tidy up development. The major estates are Bridgend and Waterton which are separated by a main road which also puts them into different counties—the boundary divides Mid and South Glamorgan at this spot. So although the new Ford factory will be within two miles of the Bridgend town centre it falls inside the borough of the Vale of Glamorgan. Industrial estates have sprung

Glamorgan. Factories on these estates range from small units employing a dozen people up to the large, government advance factories with work for 500. The attraction of Bridgend and the carrot of sovernment grant and carrot of government erant aid began to pay dividends and a few years ago when three major concerns opted for the

area.

The most interesting was the decision of Sony, the Japanese electronics group, to centre its European operation in Wales. Morris, Secretary of State for Wales, stresses played a vital part in the selection of the site. Since it started producing Waterton is a little over two colour television sets at Bridemiles from the M4 and widening of a link road is well on its way to completion. way to completion.

Sired midway between Cardiff but praise for the Welsh work-

Ford's decision to join them Ford's decision to join them may have been swayed by the intervention of the Prime Minister, but the Prince of Wales has been given much of the credit for Sony's arrival in the Prince was on a Far Eastern tour he met Sony's president and when told of Sony's plans for Europe suggested that suitable sites and a good workforce were readily available in Wales. Shortly afterwards, Sony, after Shortly afterwards, Sony, after looking at Scotland, the north-east and other areas of high unemployment opted for a vacant Bridgend factory.

Williams Scotland, 1888

Wilkinson Sword was also impressed with the area and established its garden tool centre at Waterton.

Smith Kendon moved out of its London home to make its famous "travel sweets" at Waterton. The copany, under Mr Haydn Wilkams, its Welshborn managing director, brought many of its London staff to teach the Welsh the art of making boiled sweets in the traditional method—cooked in small batches in copper kettles on batches in copper kettles on

open fires.

These three of the latest arrivals in Bridgend are surrounded by other household names who have established factories in this part of South Wales.

The Christie Tyler furniture empire is comred on the area, so is the Avon Rubber Company and Zimmer orthopaedic. Just up the road the Americanowned cosmetic company. Region International, has its European imanufacturing been querers and British Tissue querers and British Tissue paper milis.

BY THE FINANCIAL EDITOR

A case for taking some profits

Last Friday's fall in Minimum Lending Rate followed hard on the heels of the equity market's narrow failure to breach the previous all-time FT Index high, marks an appropriate moment for shareholders to ask whether the time is ripe to sell. A techmical pause such as we have already seen, was overdue and should in itself be no cause for concern. But the fundamental factors suggests that the bull market could now be within 10 per cent of its peak. That may be no bad moment for shareholders who have had a good run to be taking at least some profits. -

Perhaps even more than usually, the equity market has taken its cue this year from sterling and falling interest rates. Sterling has been buoyed partly by evidence of a declining inflation rate, but chiefly by the increasingly positive balance of payments position. Bank of England efforts to hold back the pound's advance have only served to encourage more buyers and there is no reason yet to anticipate anything other than a continuing strong pound.

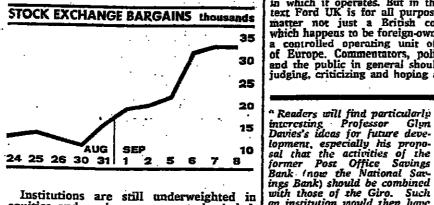

Foreign buying has created additional demand for financial assets, but more importantly it also inflates money supply as long as the authorities persist in taking foreign currency into the reserves to neutralize the effect on the exchange rate. This is precisely where the fear for interest

The Government is committed to allowing money supply to grow by no more than 91 to 13 per cent this financia year. Recently it has been expanding at the upper end of this range, and further uperward pressure will develop in the coming months. Apart from the foreign inflows, there will be the growing balance of payments surplus, and it also now seems that the domestic economy will be increasingly picking up momentum, powered by a revival in real consumer spending as the inflation rate falls. Economic growth could be over 3 per cent next year or even more if the Chancellor

provides some stimulus in the autumn. The cause of holding the money supply within bounds, necessitating a high level of gilt-edged sales in the coming months. may thus tend to push interest rates up in just the same way as it has been doing recently in the United States. The effect will most likely be felt at the short-end of the spectrum where rates have dropped fastest, although in view of the prospect for

inflation there could yet be further scope for long yields to fall, so that the presently steep yield curve could flatten at both ends.

By implication MLR may be almost as low as it is going to go, in which case there will not be much steam left in the short-end of the gilt market. This will be a real source of concern for equities, but given the potential left at the long-end there should be at least enough momentum to take the market through its previous high, and perhaps close to the 600 level.

Institutions are still underweighted in equities and anxious to correct the imbalance. The potential for increasing dividends next year is arguably still not reflected in a market which is currently yielding 5 per cent, and the average p/e ratio of around 10 is, of course, anything but demanding by the standards of previous bull market peaks. Moreover, there continues to be a prospect of real earnings growth next year, although the extent of it must be clouded by the sluggish performance of most other economies and the possibility of a strong pound eroding the benefits of foreign earnings.

All of these factors point to a continuing firm market as the autumn draws on, although there remains the wages hurdle. While it seems likely that, overall, wage increase will be smaller than some have feared, a major confrontation with a powerful group of workers later this year could be profoundly unsettling, especially if it appeared to be precedent setting. Taking some profits on equities now could therefore be a sensible policy for the cautious, although others can reasonably justify stay-

Why Sarabex cried 'foul!'

European Commission threatens to intrude into its affairs. Some of the most worried brows, for example, have been seen in the banking system over the implications of harmonization of EEC banking laws and in particular the licensing of deposit-taking institutions.

Potentially more worrying, however, was the news last week that the Commission had begun an inquiry into the way foreign exchange dealers in London operate since had begun an inquiry into the way foreign exchange dealers in London operate since this strikes at the heart of many of the restrictive practices, or informal agreements as their proponents would prefer to call them, that permeate several areas to show that of activity in the City.

Lord O'Brien, president of the British Bankers'

At issue is the way the 250 or so authorized banks conduct their foreign exchange business. Sarabex, a London-based dealer with close Middle East links, claims that the restrictive rules of the FECDBA have effectively frozen it out of foreign

exchange dealing in London Sarabex's complaint to the EEC is that as a result of an informal agreement in 1967—the "Sterling" letter—and the more

Alarm bells ring in the City whenever the formal circular from Lord O'Brien, president of the British Bankers' Association, two years ago authorized banks have been required to use only members of the 16-strong FECDBA.

Further, membership is so tightly controlled that it is well nigh impossible for outsiders ever to join. Stockbrokers James Capel did indeed make an effort to join a couple of years ago but for one reason or another dropped its application. In addition to the strict membership rules (poaching of other members' staff is forbidden, for example), Sarabex claims that the FECDBA

centre if dealing is left uncontrolled.

Furthermore so the BBA case runs, commission rates are nowhere near as high as Sarabex maintains and levels charged by the large European banks are not so far out of line with those charged by the FECDBA in London.

All familiar enough stuff which the EEC will now have to sieve to see if there is a case for the FECDBA to answer. If proved guilty the FECDBA will be asked to modify its rules and cold be taken to the European Court of Justice as a last resort. One thing both sides are agreed on, however, is that Sarabex is about the only important London dealer left outside the FECDBA so the whole thing looks like taking a sledgehammer to crack a nut. Unfortunately, the real loser could well be the City itself if, as many suspect, the EEC directorate is waiting for iust such a case to flex its muscles.

Making sense of the multinational chess game

Hugh Stephenson

Wales has been greeted as a major industrial shot in the arm for Britain, except perhaps by the workers at Ford's old engine plant at Dagenham. But the reaction displays an anachronistic conception of what large-scale integrated manufacturing industry with an international base is now

about.

The reality is indicated by the far that the final announcement of a pefectly conventional, though large animportant, investment decision shoulbe accompanied by exchanges a between plenipotentaries by Mr For-and Mr Callaghan.

The development of a business lik-Ford is not by itself either necessaril a good or a bad thing for the countrin which it operates. But in this context Ford UK is for all purposes the matter not just a British companwhich happens to be foreign owned but a controlled operating unit of Ford of Europe. Commentators, politicians and the public in general should stop judging, criticizing and hoping as if it

the doors of millions of people who now never cross the thres-

hold of the clearing banks. My hope is that either this Govern-

ment or the next Labour gov-ernment will take up this pro-

posal and so permit the new Bank/Giro to compete with the

'Big Four' banks. I am sure that it would give them a run

for their money in the speed and efficiency of its service to

its customers and in the cheap-ness of its facilities."—Fore-word by the Rr Hon James Callaghan to Professor Glyn

Davies's book, National Giro*.

That was written in 1973 by Mr Callaghan, some four years before he, as Prime

Minister, asked a Treasury study group to examine the feas-

ibility of merging National Giro and the National Savings

Bank. Its conviction should dispel any suggestion that such a merger should be viewed as a political expedient only. Obviously the political con-

The Prime Minister wants to get off the hook of bank nationalization which the

Labour Party's national execu-

offices.
At this stage, however, one

is talking about a dream, a vision which has at least been

partially revealed to the Prime

Minister. Visions can be trans-

lated into reality provided

It is not that an international company, as some claim, is in a position to be footloose and fancy free about placing its investments. Often to the contrary, once made, major capital investments by an international concern can become expensive hostages to fortune in a less than friendly environ-

Though, as we have seen in the ord and countless other cases, before he actual investment decision is made n established and effective internaional company has more options and reedom of choice about when and where it invests than is in practice vailable to companies with a more estricted base of operations.

hat with an international company here is no necessary correlation beween the best interests of the concern and the best interests of any particular country in which it operates. In making a decision like the Ford investment, the company will obviously have done the normal calculations.

It will have considered to what extent low British productivity and interrupted delivery are more than offset by low British wages. It will have noticed that Ford UK's engine operations have caused less trouble over the years than its assembly

But, above all, there must be a much simpler and longer term concept. Ford and other companies like it must think in terms of investment which will be effective in many years' time. During that timescale so much that seems important can change completely— political regimes, attitudes to and of trades unions, business confidence, inflation or whatever.

A major investment in country A will displease collectively all those who did not get it almost as much as it

Again, while a country which experi-enced a steady balance of payments surplus as a result of a foreign company's operations would be happy, one which experienced an equally steady loss would be correspondingly even more unhappy. Since one country's surplus is another's demicit, the inevitably sensible course for an international company wishing to minimize the total volume of unpleasantness is to be as neutral as possible in effect on the individual balances of payments of the countries in which it operates, at

st taking one year with another. It may make sense to Ford of Europe to import cars into the United Kingdom, as has been taking place this year, but the logic is Ford's not Ford UK's, let alone that of a narrow view of the British public interest.

With national companies, they may

in general be said to be operating in the public interest if they offer employment and use resources profitably, and/or contribute to the balance of

The subsidiaries of international groups are, however, not open to these simple tests. That is the force of suggestions that national governments and others such as tax authorities have a legitimate reason for examining their operations in a different light.

A state bank in the high street?

The Treasury study group's report should be available within the next few days in time, in fact, for the Prime Minister to give his own answer to last year's NEC proposals at next mouth's Labour Party conference. The merger proposal has apparently been given approval, but on several consequential issues of principle which would stem from the establishment of a state bank, the Treasury working party has left the questions of the property of

The logic of the proposed merger is attractive. Both the National Savings Bank and National Giro use the counter services of the country-wide network of 22,000 Post Offices. The former is strong on per-sonal business with some 20 million accounts. Most of these are ordinary account holders and there are nearly one mil-

lion investment accounts.

Giro, on the other hand, is long in corporate account business. Its 30,000 business accounts making deposits at an annual rate of £8,000m. Its private clients number 520,000.

Logic apart, the three organi-zations—the Post Office, Giro and the NSB—need each other. On the Post Office counter traffic on bank the the non-banking side is shrinksince its members dominate foreign exchange dealing in Europe as well, where cartel is one that the EEC should look into. Not so, claim the BBA who are representing the case of the FECDBA. For one thing, it claims that Sarabex has never made a formal approach to join. More relevant, the present arrangements were developed to do away with the foreign exchange jungle that existed in the 1950's and which could easily return given London's role as a state banking with the foreign exchange jungle that existed in the 1950's and which could easily return given London's role as a first sample indeed him with at last year's party conference. So a merger of the existing two one's eyes when stuck in an at last year's party conference. So a merger of the existing two or cannot the existing two one's eyes when stuck in an at last year's party conference. So a merger of the existing two one's eyes when stuck in an at last year's party conference. So a merger of the existing two one's eyes when stuck in an at last year's party conference. So a merger of the existing two one's eyes when stuck in an at last year's party conference. So a merger of the existing two one's eyes when stuck in an interminable quieue; 10 years ago the PO Savings Bank (as the normal transmitable quieue; 10 years ago the PO Savings Bank (as the normal transmitable quieue; 10 years ago the PO Savings Bank (as the normal transmitable quieue; 10 years ago the PO Savings Bank (as the normal transmitable quieue; 10 years ago the PO Savings Bank (as the normal transmitable quieue; 10 years ago the PO Savings Bank (as the normal transmitable quieue; 10 years ago the PO Savings Bank (as the last year's party conference. So a merger of the existing two or any and the last transmitable quieue; 10 years ago the PO Savings Bank (as the normal approach to political answer.

20 million customers with balances down to £1,583m; as for down to £1,583m;

as a surprise to the cynics is the fact that other people of a different political line share then they is of the country's 22,000 post of the country's 22,000 post offices. If the three organizations can come together willingly then they have, in the eyes of other commercial bankers, a marketable proposition to be envied. A captive market of some 20 million customers and incomparable number of outlets.

At the moment the clearing banks and the trustee savings banks and the trustee savings banks provide banking services for 60 per cent of the adult population, a further 20 per cent are rectioned to be "unbankable", and the rest, theoretically, could drop into the lap of the new state bank. lated into reality provided sufficient imagination, determination, courage and, because miracles do not come cheap these days, cash are available. In practical language this means high-ranking outside appointments, a City head office, more computerization and inter-union pages all requirements which But there are obstacles.
Much as the individual unions concerned, the Post Office Workers Union and the Society of Civil and Public Servants, peace; all requirements which will need to be met if Mr Caliaghan's dream is to come

the merger, neither seems happy about the prospect of the control passing from either the Department of National Savings to the Post Office Corporation or vice versa. Similarly DNS has its headquarters in Glasgow, a depressed area, while Giro has its in Bootle, another depressed area.

Who is going to be brave enough to take jobs away from either, or, dare one say it, both? It would be a blow, not to mention a virtual vote of no confidence if the government

refused to channel its petty cash—running into millions through its own bank instead of the clearers. Much more fundamental is

the problem of what to do about the NSB's customers who about the NSB's customers who are savers, not potential bank clients. If the state bank operates as a commercial entity, and both the clearers and the trustee savings banks can be expected to register strong disapproval about unfair competition if it does not, what do you do for the small. wnat do you do for the small saver?

The existing range of National Savings schemes (National Savings Certificates, Save-As-You-Earn, Premium Bonds and the like) are not suitable alterstate savings bank?

Immediately this point is raised it begs the question—what is the purpose of the new state bank if it deprives the country of its only savings bank? Obviously the Governits putative venture as a saviner bank, in which case is the enterprise any more likely to succeed than the one it is re-

On the other hand, a savings bank the way the NSB is run ing despite the evidence of ment with the wherewithal to one's eyes when stuck in an answer the battle cry of more funds for industry.

NSB money, apart from the goes into the consolidated funds for savin; "d like Giro's gilt-edged port;"o helps reduce government debt—not fund industry. Again, a savings bank would not offer the strong-minded competition to the clearing banks that the far-sighted think might be very a chequeless then a cashless

So in spite of Mr Callaghan's from the heart belief in a state bank to meet the needs of the people, could it be that the reason for creating it is politi-cal, after all?

Oil checks Mexico's economic slide

peso was devalued after some 22 years of parity with the United States dollar. The ensuing crisis during the final three months of President Echeverra's regime was, in the words of his successor, Jose Lopez Portillo, one of the coun try's darkest hours. In a month prices rose as much as they had done in a year, the trade deficit had reached a record \$3,000 mand the growth of gross domestic product had fallen below an annual rate of 2 per

. But since President Portillo took over last December national confidence is showing signs of returning and the wheels are beginning to turn, the end of next month; 10 per Although some estimates put cent of advertising time on inflation at 30 per cent it is radio and television will be likely to come down to about free; the provision of loans for 22 per cent by the end of the small businesses, and new 22 per cent by the end of the year. The July wholesale price index showed an increase of only 0.7 per cent, the lowest in the present period.

Addressing the 65 million people of Mexico in his first state of the union message on September 1, President Portillo said that there had been a dramatic change in the balance of payments and the crippling deficit had been reduced 500m pesos a month during the first four months of this year and in March a favourable balance had been recorded for ance had been recorded for the first time for 15 years.

During the same months last

year the average about 3,500m pesos.

The Banco Commercio mates the current account deficit to be \$245m in the first four months of this year, com-pared with \$666m during the same period of 1976. President Portillo said that this was largely due to the contraction of the economy, a big reduction in imports, and less overseas borrowing. The International Moneta

Fund has imposed a limit of \$300m borrowing this year and the total overseas debt now stends at slightly under \$21,000m. Although there has been a vicious internal crisis in the fast eight months during which industrial output has stagnated, international confidence has not waivered.

Buropean and American bankers have always considered, never more so than at present, that the country is still a blue chip risk as a bor-rower, mainly because of Mex-ico's record of political stabi-lity and more immediately,

Just a year ago the Mexican because of her comparatively new oil wealth which puts her almost on a par with countries like Kuwait and Saudi Arabia. The internal situation is showing signs of coming under control although the country is unlikely to emerge from its

present recession until the end of 1978. The president has agreed an "alliance for agreed an "alliance for production" with the private sector which has agreed to inject substantial investments into new job creation programmes. Although not legally binding the 10-point programme urges a price freeze until the end of

the year; workers will get half a month's extra salary before efforts are to be made to create more employment. As a gesture of good intent a group of Sonora businessmen

last week agreed to a 13,500m peso investment in the region jobs. Unemployment is the country's biggest problem, as dustrial and economic growth. By 1982 the government had hoped to create 300,000 new jobs, but there would appear to be little chance of this rar-

get being realized. However, the brightest note is undoubtedly oil and gas, which will eventually lead to a complete replanning of the economy. President Portillo warned the country last week to treat the question of this urged moderation and skill in

its development. "Oil has become the most important pillar of our econopensaring factor for our criti-cal deficiencies", he declared when confirming that the latest figure for proven reserves was 14,000 million barrels. This does not include some promising new fields which are still being evaluated.

Last May production reached a second figure of one million

a record figure of one million barrels a day of which one sixth went for export. So much gas was being produced—496,000 million cubic meres, of which only 3,000 million cubic metres was being exported—that the remainder was being "flared off".

seems assured. The question that is exercising Bonn is whether Graf Lambsdorff will be able to submit to the rigours of cabinet discipline. It also remains to be seen how relations develop with the Spcial Democrar members of the caebinet and Germany's powerful trade

The Graf himself may bring an uncomfortable air of independence into his new job. For in addition to carrying out his duties in Parliament, he has over the past few years maintained a position on the board of one of Germany's larger inmance companies. He therefore knows that he can always

effect Jim Callaghan's speech to the TUC will have in moderating pay claims, the Prime Minister has got further than his. Spanish counterpart,

Adolfo Suarez

Adolfo Suarez, who has yet to win a glimmer of support from his trade unions. The British union leadership has agreed that there shall be 12-month interval between pay claims, and now has to sell the idea to the rank and

In Spain, however, the three newly-inlerated trade unious, the general workers (a wing of the main opposition Workers' Socialist Party), the Communist workers commissions and the broadly socialist syndicalists, agree neither with each other

So far, Suirez has come up with little beyond exhortation, although the Economics Minister, Enrique Fuentes Quintana is dispensing with his minis-terial car, and MPs elected in June are deferring discussion of their salaries. Now that's something we don't have here.

It's been a good weekend for four million Italians, who heard before leaving work that they are to escape the advance pay-ment of income tax which the Andreomi Government requires the self-employed and those with unearned income to make on "we're ready for free trade" November 30.

the scheme under its austerity programme. By Italian standards the scheme is a revolution in tax exchange. in tax gathering.

Last June people were required to calculate what their tax liability for 1976 should be and then pay in at a bank in-stead of waiting for an assessment, which could then be haggled over for years. The result showed the Italians

to be more honest than they are sometimes portrayed. Instead of lire (about £1,000m) as forecast in the budget, the measure more conetted about 1,750,000m live round. (nearly £1,167m) according to Minister Filippo Pandolfi.

with the difference to be settled next year.

In view of June's encouraging figures, bowever, the cabinet has decided it can now ease up has decided it can now ease up a little. All those who handed over 250,000 lire (£167) or less are being spared a second income tax payment in one year.

Only three days after reporting for combat, the new American multilateral trade negotiation Alonzo L. McDonald made a lively debut at a weekend pro-claiming himself "a liberal fair trader, but not yet a free trader".

McDonald, who heads the

American trade team at Geneva said he wanted all the free trade the West could absorb, but was uncertain whether

than most, a further doubling in trade could be expected within the next 10 years. Further ahead beyond the mid-1980s horizon it might be

possible to see the attainment of \$100,000m in two-way EEC-US trade he said. MrDonald a former managing director of McKinsey, the man-agement consultants, added that

the multilateral trade negotia-

tion (MTN) were going to be more complex than the Kennedy

One reason was that in hard times support for liberalization was being "whittled away at the was being " whittled away at the edges". It was not only trade agree namer with each other nor with the government.

Wage negotiations start in the autumn in Spain as they do here, but the unions are wary of cooperating with Suarez in of the amount paid for 1976, business except themselves."

Was being "wintfied away at the edges." It was not only trade union protectionism; "United make an advance payment for trade." It was not only trade union protectionism; "United make an advance payment for trade." he said, "for every of the amount paid for 1976, business except themselves."

Youghal

Carpets (Holdings) Limited

INTERIM STATEMENT 1977

The Board of Youghal Carpets (Hildings) Limited has declared an interim dividend of 8.18% on the issued ordinary share capital of the Company in respect of the year ending 31st December 1977. Shareholders will be entitled to a tax credit calculated at 22.25% of this dividend. The comparable dividend in 1976 was 12.5% and the tax credit was 22.25% of this dividend. calculated at 20.48%. The dividend will be paid on 25th October 1977 to shareholders on the register at the close of business on 7th October 1977.

The Directors report that unaudited trading results for the half-year ended 30th June 1977, with comparative figures for the first half of the previous two years, 1975 and 1976, were as shown on the Table below.

Turnover increased over the previous year by 13% and the trading profit was £1.796,000, being 6.3% of turnover, compared to £2,049,000 being 8.1% of turnover in

The drop in trading profitability was due to continued unprofitability in the plants of Morris & Co. (Kidderminster) Ltd. and Youghal Carpets Ltd. The unprofitability of these plants was referred to in the Chairman's Statement accompanying the Report for 1976 and it was hoped that the situation would be rectified more rapidly than proved to be the case. However, it is believed that the measures which have been taken will become effective over the next six months. The losses generated at these plants had a serious effect on the trading profit. In addition, the months of April, May and June were probably the worst trading months for the carpet industry this century.

The profit before tax was further eroded by the high interest charge, being £319,000 higher than in 1976 and £486,000 higher than the first half of 1975, as shown in the accompanying Table. Plans are in hand to drastically cut borrowing during the second half of the year which will be accomplished by stock reduction and tighter stock controls. at all plants. Traditionally July and August give no indication of trading for the second half of the year, as these months are not selling months and accordingly it is not possible to make predictions for the second half of the year.

Clouds still hanging over the carpet manufacturers

collapse, last week saw dismal results from Carpets Inter-national, Britain's biggest car-pet manufacturer, and then from Cork-based Youghal Carpets. But despite this inconspicious background to the opening of the International Carpet Fair in Harrogate, Mr Keith Kirkman, Henry Cooke, Lumsden's textile analyst, found at least some crumbs of com-

Attendances and the level of inquiries were good, and views being aired on the course of business in the coming six months were generally slightly optimistic. Many companies raised prices in April, and a more favourable view is now being taken of home demand.

However, Mr Kirkman notes that export business is becoming increasingly competitive. Profitability in Germany is low and in the United States even worse, and he forecasts a fur-ther fall in what has been an exceptionally high growth rate for exports in the past two years. Overall, he thinks it prudent " to regard improvement for most manufacturers as being a long baul ³.

The focus of attention is in-witably upon what is to hap-en at Bond Worth, however. Provisions of between £6,000 and £450,000 may have to be made by other manufacturers, and Mr Kirkman says there is agreement that the release of sond Worth's estimated £20m of stocks on to the market rapidly could have a depressing effect quite beyond this value.

The biggest fear is that a large discount group will buy the stock cheaply further strengthening its advantage over manufacturers. One suggestion is that interested manu-facturers might finance a con-sortium to hold the stocks and

Brazil and Belgium.

In the wake of Bond Worth's allow a controlled entry to the ollapse, last week saw dismal market. Bowater, meanwhile is being mentioned as a potential buyer for the weaving capacity. Changing patterns of home ownership, the redistribution of wealth and a sharp escalation in wage costs have led to a burgeoning Do-It-Yourself market, and James Capel's Mr M. Brown reckons that the market is set on a rising trend for the next five years, helped by the growth in owner occupation and recent political measures to en-courage the sale of council

On the basis that the volume of DIY materials in 1972 was worth about £370m-£400m, Mr

Brokers' views

ture had grown to £600m in 1975 and to perhaps £1,000m

On top of all the other factors influencing the DIY market, he suggests that in the longer-term builders, trying to cut the cost of new construction, will only do the basic structural work on new houses. Purchasers would then be left to do the interior

decoration themselves. Additionally, he says, the move towards greater standardization of design will lead to the desire to express indivi-duality through original decor. Capel has picked Montague L. Meyer and Magnet Southerns as two companies which are well placed to profit from the expanding DIY market.

Meyer is seen as the continu-ing rationalizing force in the timber industry, while Magnet Southerns is said to have an extremely bright future not just as a manufacturer of timber products to the trade

on the head in a recent note on the stores sector, which argued that the outlook was suffi-ciently favourable to bring about a sustained improvement in share prices which could last for up to four years. That was written before the run-up in the market of the past few days during which time the stores sector has out-performed the market as a whole.

marker as a whole.

Pember's unalyst, Mr C. J.

Carlyle comments that Mothercare and W. H. Smith are expected to maintain the highest rates of expansion over the next few years. However, Boots and Marks and Spencer are baving to look overseas in attempts to sustain historic growth rates. The much savaged Burton Group and UDS are tipped as facing a marked recovery with the improving outlook for the

With a cut in chearing bank base rates expected imminently, Williams de Broe Hill Chaplin is changing its recommendation on Bank of Scotland from a "hold " to a "sell". Analyst Mark Odescalchi is forecasting

profits down by 5 per cent to £25.5m this year, and says the year do not compare favourably with the London clearers which have bigger overseas interests. He says that since the shares have recently outperformed the market the opportunity should be taken to lighten holdings. Despite its recent disappointing results, insurance broker Matthews Wrightson is not without its investment follow-

ing. Both Rowe & Pitnan, Hurst-Brown and Capel-Cure Myers believe that the shares are now standing at such a dis-count to the broking sector to have become attractive on the recovery prospects.

Trade still bad at Illingworth Morris

Down and down go interest rates which is nothing but good news for Illingworth Morris, the manufacturer of wool and cotton restiles taking in names such as Woolcombers, Saits, (Saltaire), John Emsley, George Malinson, Winterborham, Strachan Piayne, and S. Schneiders. & In the year to March 31 last Illingworth made pre-tax profits of £3.769,000 against only £842,000. They would, however have made a lot higher but for a climb in bank interest charges from £2.27m to £3.52m. Clearly, a rise in over drafts from £23.38m to £28.45m took its share of the blome. Interest rates, Mr Ivan Hill, chairman, explains, are important, and swings in these can upset even tentative forecasts. The group is doing what it can through right financial controls, and stock economies.

and stock economies.

The cost of borrowed money apart, prospects seem reasonable. The chairman says: "bearing in mind the continual shares.

reorganisation, it would be dis-appointing if a more continu-ously satisfactory level of profit could not soon be achieved."
With this sober look ahead comes a reminder that business is still tough. The home-market is unresponsive; export markets are more subdued; cheap imports are undermining contour.

imports are undermining common and clothing textiles; and merchanting and combing are down. So one cannot read too much into a first quarter altage of the year before. The pound too, is no longer failing and last year overseas subsidiaries contributed as much as £1.15m to pre-tax profits against only £470,000 in 1975-76.

Ostrer interests remains no clearer. The death of Mr Isidore Ostrer means that his daughter, Mrs Pamela Mason still has around 46 per cent of the voting capital and a similar amount of the "A" ordinary

Tarmac

Hidgs TOMORROW:

Had it not been for a late and sudden spate of interest in large tankers in the Gulf, last week would have passed off as just another dull period of tanker market trading. As it was, the low rate levels paid took away any of the shine the fixtures might have generated.

Five viccs and one ulcc were booked in the spate, and with one exception they were all for Gulf to United Kingdom continental voyages. The lowest rate nental voyages. The lowest rate
—worldscale 20.75—was paid by
Amoco for a 260,000 tonner

ing in worldscale 23 being paid for the two vices involved, level not representative of the current market. This deal in-cluded one ship booked for a

Gulf to Italy trip.

Last week's trading can only add to the pessimism that already abounds in the market about the future. A drop to worldscale 20 for vices now seems even more likely than the transpare is ever. Laid-up tanker to now rising again with the 40 million ton deadweight mark already passed.

Had it not been for a late

Tin is the prime candidate

bas been forced to take further likely to be in balar corrective action, this time by halting production of regular this year of 80 per electrolytic nickel at the Port Colborne refinery in Ontario.

This, however, required the control of the production of the prod comes up at the annual meet-

Some 30 per cent of the 1,300 strong work force at the refinery will lose their jobs. This new action is but another result of the crisis in the nickel industry and is likely to be followed by other curs in the industry.

The prospect of a savage price war in the industry has been much speculated upon, including in this column, and there have been rumours but unconfirmed ones that Inco has made a policy decision to sharply reduce its stocks at virtually any cost, even if it means selling at well below \$2 a pound.

However, the latest isue of Metals Analysis and Outlook (Number 4), published by Charter Consolidated, postulates that although the price in theory could fall to \$1.90 a pound in practice it is unlikely to such the current range. to go below the current range of \$2.10—\$2.15 which the producers are said to be quoting to their customers.

Marler Estates retrenching

Marler Estates looks forward this year to the elimination of short-term debt. At one time high hopes were pinned on the group's big development properties, chief among them those at Banbury and Bournemouth. As Mr Leslie Karler, chairman, put it a year ago: "they could be worth nothing or . . they could be worth a million." could be worth a million."

Now shareholders are told that there seems to be little likelihood of the group being able to develop the four most important sites in the near future, and two of them, at Poole and Folkestone are on the market. When and if sold, the short-term debt will go with
